fran'chis-al (frăn'chĭz-ăl; -chĭs-ăl), *a.* Of, pertaining to, or of the nature of, a franchise

of "immunity" and "privilege" are so closely related that they are not distinctly separable; but the use of the word in the bare sense of "immunity" or "exemption" is now chiefly restricted to exemption from taxation; and the usual sense (in which it is to be generally understood without something in the context to indicate the contrary) is that of a positive right or privilege to do something otherwise legally incompetent; such as, the right to operate a ferry or a railroad; to be, and exercise the powers of, a corporation; to exercise the duties and perform the functions of a public office; to have a patent right in an invention, etc. A franchise is a species of incorporeal hereditament, and is usually granted by a charter. Cf. CHARTER, CORPORATION, DARTMOUTH COLLEGE CASE.

Franchise is a word of extensive signification. It is defined by Finch, whom all subsequent writers have followed, to be "a royal privilege in the hands of a subject." 15 *Serg.& R. (Pa.)* 127, 130.

3. Jurisdiction over which a franchise extends; limits of an immunity or privilege; hence, an asylum or sanctuary. Churches . . . in Spain are *franchises* for criminals. *London Encyc.*

C. Ch.*, a Clare. — **F. tertiaries**, the third order of St. Francis. See FRANCISCAN.

Fran-cis'can, *n. R. C. Ch.* A monk or friar of the Order of St. Francis, a large and widely distributed order of mendicant monks founded in 1209 by St. Francis of Assisi. They are called also *Friars Minor*; and in England, *Gray Friars*, from their habit. The rule of the order as established by St. Francis included, besides the ordinary vows of poverty, obedience, and celibacy, vows to live upon alms and to renounce absolutely all possessions. The habit prescribed was a gray, or brown, gown of coarse cloth, a pointed hood, or capuche, a cord around the waist, and an under tunic and drawers. The members were to go barefoot, or discalced, and never on horseback. Division arose over the interpretation of the vow of religious poverty, some adhering to the letter of the rule, while others held that it was lawful for the community to hold property, although that right was denied to the individual. Women also came to be affiliated with the order, as well as certain secular persons. The entire body now consists of three groups; the **first order**, including the male members of the different observances, bound by solemn vows; the **second order**, consisting of the female religious; the **third order**, or **tertiaries**, including lay persons and certain religious congregations affiliated to the Order of St. Francis. See OBSERVANTINE; CONVENTUAL, 2; CAPUCHIN, 1; RECOLLECT; CLARE; URBANIST; and CAPUCHIN NUN.

fraud (frôd), *n.* [F. *fraude,* L. *fraus, fraudis.*] **1.** Quality of being deceitful; deception deliberately practiced with a view to gaining an unlawful or unfair advantage; deceitfulness; deceit; trickery.

2. *Law.* An intentional perversion of truth for the purpose of inducing another in reliance upon it to part with some valuable thing belonging to him, or to surrender a legal right, a false representation of a matter of fact (whether by words or conduct, by false or misleading allegations, or by concealment of that which should have been disclosed) which deceives and is intended to deceive another so that he shall act upon it to his legal injury. Often called **actual fraud,** or **fraud in fact.** In equity law the term *fraud* has a wider sense, and includes all acts, omissions, or concealments by which one person obtains an advantage against conscience over another, or which equity or public policy forbids as being to another's prejudice, as acts in violation of relations of trust and confidence. This is often called **constructive,** or **legal,** or **equitable, fraud,** or **fraud in equity.** Whether a fraud has been practiced in any case is a conclusion of law; the allegation of it must consist of a statement of the facts constituting it. Cf. DECEIT.

3. The means by which deceit is practiced; an artifice by which the right or interest of another is injured; an injurious stratagem; a deceptive device; a trick.

4. One that practices fraud; one who perpetrates a fraud; a fraudulent person or thing; a cheat; impostor; humbug; as, that man is a *fraud;* the play was a *fraud. Colloq.*

fraud'u-lent (-lĕnt), *a.* [L. *fraudulentus,* fr. *fraus, fraudis,* fraud: cf. F. *fraudulent.*] **1.** Using fraud; tricky; deceitful; dishonest.

2. Characterized by, founded on, or proceeding from, fraud; of the nature of fraud; as, a *fraudulent* bargain.

The essentials of a *fraudulent* representation, according to English law, are that it is: (1) untrue in fact; (2) made with knowledge of its untruth, or without belief in its truth, or with recklessness as to its truth or falsehood; (3) made for the purpose of inducing another to act upon it. It seems not to be material that the maker of the statement should know it to be untrue, or should have an interest in its being acted on, or have any wicked wish to injure. Nor need the statement be addressed specially to the person who suffers. *T. E. Holland.*

3. Obtained or performed by artifice.

Syn. — Deceitful, fraudful, guileful, crafty, wily, cunning, subtle, deceiving, cheating, deceptive, insidious, treacherous, dishonest, designing. See FALLACIOUS.

3. A share of common land allotted to a freeman. *Scot.*
Syn. — FREEDOM, LIBERTY, INDEPENDENCE, LICENSE. *Freedom* and *liberty* are often interchanged. But FREEDOM more frequently implies absence of restraint or repression; LIBERTY commonly suggests previous restraint; as, the *freedom* of the press, to set a slave at *liberty*; "Me this unchartered *freedom* tires" (*Wordsworth*); "Graver hours, that bring constraint to sweeten *liberty*" (*T. Gray*); cf. "My lines and life are *free*; *free* as the road, loose as the wind, as large as store" (*Herbert*). Both *freedom* and *liberty* are used of overfamiliarity; as, to take undue *liberties*, to allow one's self too great *freedom*, with one's superiors or elders. INDEPENDENCE is freedom from dependence or subjection; as, the Declaration of *Independence*; "entire *independence* of all authority, prescription, and routine" (*M. Arnold*); cf. "He cumbers himself never about consequences, about interests, he gives an *independent*, genuine verdict" (*Emerson*). LICENSE is freedom regarded as permission or concession; it sometimes denotes the abuse of freedom; as, "This unemphatic landscape, which suggests but never defines, in which so much *license* is left to conjecture and divination" (*Lowell*); "sometimes, with truly medieval *license*, singing to the sacred music . . . songs from the street" (*W. Pater*); cf. "Close [translation], but not so close as to be servile! *Free*, but not so *free* as to be *licentious!*" (*Cowper*). See EXEMPTION, RELEASE, PERMISSION.

French (frĕnch; 140), *n.* **1.** Collectively, the people of France. Ethnically, the French are one of the most mixed peoples in Europe. Ripley finds among them representatives of three main races: the Teutonic, chiefly in the northern and lowland regions of the Mediterranean, chiefly in southern France; and the Alpine, occupying Brittany and the central highlands of Savoy and Auvergne. Deniker finds representatives of six races: the Northwestern, Adriatic, and Sub-Adriatic of the north; the Cevenole, Littoral, and Ibero-insular of the south. Cf. AUVERGNAT, BASQUE, BRETON, BURGUNDIAN, CELT, CRO-MAGNON, GASCON, GAUL, NORMAN, PICARD, PROVENÇAL, SAVOYARD. **2.** The chief language of the French people. French is directly descended from Latin. As early as the 7th century the language of the common people in what is now France was doubtless felt to be distinct from the scholarly Latin, and it is probable also that in different localities it showed dialect differences. At a later period, when a considerable vernacular literature is found in France, there appear two well-marked groups of dialects, the *langue d'oc*, or Provençal group, spoken in the south of France, and the *langue d'oïl*, or French group, spoken in the north. A third group is also often distinguished, the Franco-Provençal, bordering on the other two and lying northeast of the Provençal and southeast of the French. Both Provençal and French were used in literature, but in the Middle Ages the dialect of Limousin was dominant in the south, while in the north a central French dialect spoken in and near Paris gradually became accepted as the best, and the other dialects became of less importance, though they have not yet ceased to exist.

Many wheals arose, and *fretted* one into another with great excoriation. *Wiseman.*

3. To be agitated, as a stream of water; to be in commotion; as, a brook *frets* over a rock.

4. To be vexed; to be chafed or irritated; to be angry; to utter peevish expressions.

He *frets*, he fumes, he stares, he stamps the ground. *Dryden*
The man who *frets* at worldly strife
Grows sallow, sour, and thin. *J. R. Drake.*

5. To ferment, as liquor; to work. *Obs. or Dial.*

fret, *n.* **1.** Act or state of erosion; a wasting away as if from being gnawed or eaten.

2. A worn or eroded spot, as in the insulation of an electric wire, or a place worn by waters.

3. **a** An ulcer: a spot of decay. *Obs.* **b** Spasmodic bowel pain; colic. *Now Dial.* **c** *Med.* Herpes; tetter.

4. Agitation of mind marked by complaint and impatience; disturbance of temper; irritation; as, he keeps his mind in a continual *fret*. "Furious *fret*." *Pope.*

5. A flurry; a squall. *Obs.*

6. Fermentation; effervescence, as of liquor.

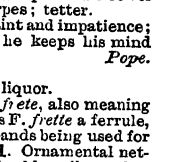
fret (frĕt), *n.* [F. *frette* a saltire, OF. *frete*, also meaning interlaced work, prob. the same word as F. *frette* a ferrule, or strengthening band, crossing spiral bands being used for strengthening. Cf. FRET to adorn.] **1.** Ornamental network, esp. the headdress or net, made of gold or silver wire, in which ladies in the Middle Ages confined their hair.

2. [Perh a different word.] *Music.* A ridge of wire, or other material, which is fixed across the finger board of a guitar or a similar instrument, and against which the finger presses the strings in stopping.

3. *Her.* Orig., an intersection of two bendlets; afterward, two narrow bands in saltire interlaced with a mascle.

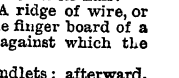
4. Ornamental work in relief, as carving or embossing. See FRETWORK.

5. An ornament consisting of small straight lines or bars, intersecting one another in right or oblique angles, often of solid fillets or slats intersecting each other.



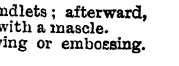
His lady's cabinet is adorned on the *fret*, ceiling, and chimney piece with . . carving. *Evelyn*

fret, *v. t.* [ME. *fretten* to adorn, prob. fr. OF. *freter*, p. p. *freté*, adorned with interlaced work, F. *fretté*, prob. fr. *frette*, OF. *frete*, interlaced work. Cf. FRET a network.] **1.** To adorn with lines or figures that interlace; to embroider with gold or silver; hence, to variegate; diversify.



Whose skirt with gold was *fretted* all about. *Spenser.*

2. *Arch.* To enrich with embossed or carved patterns.



1, 2, 3, 4 Greek Frets; 5 Japanese Fret.

fret, *v. t.* To furnish with frets, as a stringed instrument.

fret'ful (frĕt'fo͝ol), *a.* [See FRET to devour.] **1.** Gnawing; corrosive; corroded. *Obs.*

2 Disposed to fret or such as to cause fretting, ill-humored; peevish; angry; in a state of vexation; as, a *fretful* temper; a *fretful* occupation.

3. Showing agitation, troubled, as water.

4. Coming brokenly, or in gusts, as wind.

Syn. — Ill-humored, ill-natured, irritable, waspish, captious, petulant, spleeny, passionate, angry. See PEEVISH. — **fret'ful-ly**, *adv.* — **fret'ful-ness**, *n.*

fret saw. A saw for cutting frets, scrolls, etc. — **fret'-saw'ing**, *n.*

frett (frĕt), *n.* [See FRET to devour.] *Mining.* An exposure or accumulation of ore on the worn side of the bank of a river.

fret'ted (frĕt'ĕd; -ĭd; 151), *p. a.* [From FRET to devour.] **1.** Rubbed or worn away; chafed.

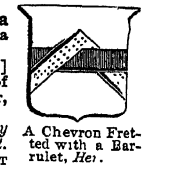
2. Agitated, vexed; worried.

O *fretted* heart tossed to and fro. *C. G. Rossetti.*

3. Agitated so as to form waves or ruffles, as water.

fret'ted, *p. a.* [See FRET to adorn.] **1.** Ornamented with fretwork; furnished with frets; variegated; made rough on the surface.

2. *Her.* Interlaced one with another; — said of charges and ordinaries.



A Chevron Fretted with a Barrulet, *Her.*

fret'ty (frĕt'ĭ), *a.* Inclined to fret: **a** Fretful. **b** Festering; inflamed, as a sore. *Colloq.*

fret'ty, *a.* [See FRET ornamentation.] **1.** *Her.* **a** Bearing a device consisting of narrow bands, usually eight in number, interlacing saltierwise. **b** = FRETTED.

2. Marked as by fretwork. "Wings *fretty* with fire." *Maurice Hewlett.*

fret'work' (frĕt'wûrk'), *n.* [See FRET ornamentation.] Work adorned with frets; ornamental openwork or work in relief, esp. when elaborate and minute in its parts; hence, any minute play of light and shade, or the like.

On the turf in the *fretwork* of shade and sunshine. *Macaulay.*

Frey (frā), **Freyr** (frā'r), *n.* *Teut. Myth.* A Vanir deity of fruitfulness, love, prosperity, and peace. Phallic emblems were sacred to him; his union with the giantess **Gerth** is doubtless a mythical account of the spring awakening of vegetation. The chief seat of his worship was in Sweden, especially at Upsala. He resides in Alfheim, and at Ragnarok is to be slain by Surt. See VANIR.

Frey'a (frā'ȧ), **Frey'ja** (frā'yȧ), *n.* [Icel. *Freyja*.] *Norse Myth.* The goddess of love and beauty, who also presides over the regions of the dead (cf. FRIGG, with whom she is much confused). She is one of the Vanir and daughter of Njorth and sister of Frey. Her famous possession is the jewel, or necklace, **Brisingamen**, obtained from the dwarfs, which Loki tried to steal and Heimdall defended. See VANIR; cf. GEFJON.

Freyja is a goddess invented by the scalds, a female deity corresponding to the male Freyr . . She did not remain a mere poetic abstraction, but was zealously worshiped, by the side of, or in the place of, Frigg. *Vos (Chantepie de la Saussaye).*

2. *Print.* A white or pale patch on a printed page.

3. Any of numerous small fishes of the family Atherinidæ.

Syn. — See MONK.

Friar Bacon. The English philosopher Roger Bacon (1214?–94). Popular legend made him a great necromancer and related that he constructed a head of brass, which, if he should hear it speak, would enable him to surround England with a wall of brass. His servant Miles, set to watch the head while his master slept, heard it say "Time is," "Time was," "Time is past," but failed to wake Bacon, and at the third utterance the head fell down and broke in pieces.

friar bird. An Australian honey eater (*Philemon cornuculatus*), having the head destitute of feathers; — called also *coldong*, *poor soldier*, *four-o'clock*, etc., on account of its peculiar notes. The name is extended to related species.

Friar Bird (*Philemon corniculatus*). 1/6

Friar John. In Rabelais's romance of "Pantagruel," Jean des Entommeures, a valiant, genial friar of loose life and free speech. See THÉLÈME, ABBEY OF.

Friar Rush. A personage celebrated in ancient popular legend, in which he is represented as a devil disguised as a friar. As the emissary of Satan he worked much mischief among men, esp. in corrupting monks and friars.

fri'ar's bal'sam (frī'ẽrz). *Pharm.* A stimulating application for wounds and ulcers, being an alcoholic solution of benzoin, storax, balsam of Tolu, and aloes; technically called *compound tincture of benzoin*.

fri'ar's-cowl' (frī'ẽrz-koul'), *n.* **a** An araceous plant of southern Europe (*Arisarum vulgare*) with a spathe or involucral leaf resembling a cowl. **b** The cuckoopint.

friar skate. A European skate (*Raja alba* or allied species).

friar's lantern. Ignis fatuus, or will-o'-the-wisp. *Milton.*

Friar Tuck (tŭk). A fat and jovial friar, a constant associate of Robin Hood, to whom he acted as father confessor. He is introduced in Scott's "Ivanhoe."

fri'ar-y (frī'ẽr-ĭ), *a.* [From FRIAR, *n.*] Like a friar; pertaining to friars or to a convent.

fri'ar-y, *n.*; *pl.* FRIARIES (-ĭz). [Cf. OF. *frerie*, *frairie*, fr. *frére*. See FRIAR.] **1.** A monastery, a convent or brotherhood of friars.

2. The institution or practices of friars. *Obs.*

frib (frĭb), *n.* *Woolen Manuf.* One of the short or small loose locks, or second cuts, of a fleece of wool.

frib'ble (frĭb'l), *a.* [Cf. F. *frivole*, L. *frivolus*.] Frivolous; trifling; silly.

frib'ble, *n.* A frivolous person or thing; also, frivolity.

frib'ble, *v. i.*; FRIB'BLED (-l'd); FRIB'BLING (-lĭng). **1.** To act in a trifling or foolish manner; to act frivolously

> The fools that are *fribbling* round about you. *Thackeray.*

2. To totter; stammer; falter. *Obs.* *Tatler.*

frib'ble, *v. t.* **1** To utter falteringly. *Obs.*

2. To trifle or fool (away).

frib'bling (frĭb'lĭng), *p. a.* Frivolous; trifling; captious.

fric'an-deau' (frĭk'ăn-dō'), **fric'an-do'**, *n.* [F. *fricandeau*.] A ragout or fricassee of veal; a fancy dish of veal or of boned turkey, served as an entrée.

fric'as-see' (frĭk'ă-sē'), *n.* [F. *fricassée*, fr. *fricasser* to fry, fricassee.] A dish made of fowls, veal, or other meat of small animals cut into pieces, and stewed in a gravy.

fric'as-see', *v. t.*; FRIC'AS-SEED' (-sēd'); FRIC'AS-SEE'ING. To cook as a fricassee.

fri-ca'tion (frī-kā'shŭn), *n.* [L. *fricatio*, fr. *fricare*, *fricatum*, to rub.] **1.** Friction; specif., rubbing of the body with the hands.

2. A fricative sound.

> One may bring these organs [the tongue and the palate] so near together that a *frication*, a consonantal rustling, begins to appear. *W. D. Whitney.*

fric'a-tive (frĭk'ă-tĭv), *a.* [L. *fricare*, *fricatum*, to rub.] **1.** *Phon.* Characterized by distinct frictional rustling of the breath (voiced or voiceless) as it is emitted with the oral passage greatly narrowed, but not completely closed, as by the close approach of the tongue to the palate or to the back of the teeth; — said of certain consonants, as *f*, *v*, *s*, *z*, etc. See *Guide to Pron.*, § 58.

2. Played by rubbing, as with the finger; as, *fricative* musical instruments.

fric'a-tive, *n.* A fricative consonant.

fric'tion (frĭk'shŭn), *n.* [L. *frictio*, fr. *fricare*, *frictum*, to rub: cf. F. *friction*. Cf. FRAY to rub; cf DENTIFRICE.]

1. Act of rubbing one body against another; attrition; in hygiene, act of rubbing the body with the hand, with flannel, or with a brush, etc., to stimulate the skin.

2. *Mech.* **a** A resistance to motion, or to a tendency to motion, between two surfaces in contact; — called also **external friction.** **b** An analogous resistance between the particles of a substance — in a fluid, opposing flow; in a solid, opposing distortion; — called also **internal friction.** True solid friction is the resistance to sliding bodies, or to those which tend to slide, and is therefore called **sliding friction.** **Rolling friction** is the resistance to rolling motion, and is really a form of internal friction due to the distortion of the rolling body or of the surface on which it rolls. When the bodies in contact are at rest, only so much friction is called into play as is necessary to prevent motion. As the conditions are altered so that the tendency to motion increases, the friction also increases up to the point where motion ensues, when it remains unaltered (for true solid friction). The friction occurring just on the point of motion is called **limiting friction.** Friction between lubricated surfaces is properly a case of fluid friction so long as the surfaces are kept apart by the lubricant. Friction can occur between a fluid and a solid, but when the fluid sticks to the solid, as a liquid that can wet it, friction only takes place between successive layers of the fluid and is practically fluid friction. Energy expended in overcoming friction is usually converted into heat. See also ANGLE OF FRICTION, COEFFICIENT OF FRICTION, etc.

3. A clashing between two persons or parties in opinions or work; a disagreement tending to prevent or retard progress.

4. *Mach.* Short term for *friction* wheel, clutch, gear, etc.

friction of a rubber belt, *Mech.*, the tenacity with which the different plies are held together by the India-rubber mixture. See RUBBER BELT.

fric'tion-al (frĭk'shŭn-ăl), *a.* Relating to friction; moved by friction; produced by friction; as, *frictional* electricity. — **fric'tion-al-ly**, *adv.*

frictional gearing = FRICTION GEARING. — **f machine**, *Elec.*, a machine in which electricity is produced by friction. It usually consists of a glass disk made to revolve between leather cushions or rubbers, with apparatus for collecting the electricity. See ELECTRICAL MACHINE, *Illust.* — **f. resistance.** *Naut.* See RESISTANCE.

friction axis. *Mech.* The direction line of the resultant force acting on a link having friction at its joints The friction axis is never coincident with the geometrical axis of the link.

friction ball. *Mach.* A ball for reducing friction, as in a ball bearing. Cf. FRICTION ROLLER.

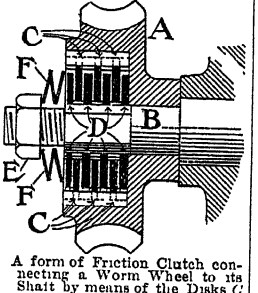
friction band. *Mach.* The band of a friction brake.

friction block. *Mech.* Any block which is pressed against the moving part to be slowed or stopped, in a brake operating by friction.

friction brake. **a** A brake operating by friction. **b** *Mech.* Any kind of absorption dynamometer which absorbs power by friction. The Prony brake is a common form.

friction circle. *Mech.* A circle, used in geometrical constructions for solving problems concerning the equilibrium of pin joints with friction, whose radius is $r \sin \phi$, where r = radius of pin joint, ϕ = angle of friction.

friction clutch *or* **coupling.** *Mach.* Any clutch or coupling, operating by friction, for engaging or disengaging revolving parts or for use as a safety appliance for permanently coupled shafts or parts, permitting slip when the transmitted power becomes excessive or is suddenly increased or diminished.



A form of Friction Clutch connecting a Worm Wheel to its Shaft by means of the Disks *C* and *D*. *A* Worm Wheel free to revolve on Shaft *B*; *C* Disks attached to *A*; *D* Disks attached to *B*, *E* Nut; *F* Spring Washer.

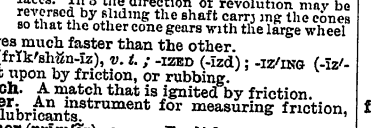
friction composition. Any composition which readily ignites by friction, as the various kinds used for matches. See 1st MATCH.

friction drop hammer. A drop hammer in which the hammer is raised for striking by the friction of revolving rollers which nip the hammer rod. See DROP HAMMER, *Illust.*

friction fremitus. *Med.* A form of fremitus produced by the rubbing together of two roughened surfaces by pleuritic adhesions in pleurisy.

friction gearing. Gearing for transmitting motion by surface friction instead of by teeth.

friction glazing. *Paper Manuf.* A method of glazing paper by passing the web of paper between two rolls one of which revolves much faster than the other.



Friction Gearing, 1 with conical Gripping Rings, 2 with Plain Surfaces; 3 Bevel with Plain Surfaces. In 3 the direction of revolution may be reversed by sliding the shaft carrying the cones so that the other cone gears with the large wheel

fric'tion-ize (frĭk'shŭn-īz), *v. t.*; -IZED (-īzd); -IZ'ING (-īz'-ĭng). To act upon by friction, or rubbing.

friction match. A match that is ignited by friction.

friction meter. An instrument for measuring friction, as in testing lubricants.

friction primer (prĭm'ẽr), *or, in English usage,* **friction tube.** A device used for igniting the charge in a cannon. The primer consists of a tube containing rifle powder and a friction composition to be ignited by the friction of a serrated wire.

friction roller. *Mach.* A roller or wheel for lessening friction by converting sliding friction into rolling friction, as a roller in a roller bearing or any of a set of antifriction wheels.

friction slip. *Mach.* A slipping friction clutch or coupling.

friction sound. *Med.* An auscultatory sound caused by the rubbing together of two inflamed serous surfaces, as of the pleural membranes in pleurisy.

fric'tion-tight', *a.* Tight enough to operate by friction.

friction wheel. **a** A wheel operating by friction, as in a friction gearing. **b** Any of a set of antifriction wheels.

Fri'day (frī'dā), *n.* [AS. *frīgedæg*, fr. *Frīg*, name of a goddess + *dæg* day, cf. Icel. *Frigg* name of a goddess, the wife of Odin or Wodan, OHG. *Frīa*, D. *vrijdag* Friday, G *freitag*, OHG *frîatag*, Icel. *frjádagr*. AS. *Frīg* is from the root of E. *friend*, *free*, orig. meaning beloved, or loving; cf. Skr. *priyā* wife. See FREE; DAY.] **1.** The sixth day of the week, following Thursday and preceding Saturday. It is the Mohammedan sabbath. In the Roman Catholic Church and the churches of the Anglican Communion every Friday, unless it is Christmas, is a day of fasting or abstinence. Friday was long known as hangman's day, because it was the customary day for hangings.

2. See CRUSOE, ROBINSON.

Frie'del'-Crafts' re-ac'tion (frē'dĕl'-krăfts'). [After Ch. *Friedel* (1832–99), French chemist, and James M. *Crafts* (b. 1839), American chemist.] *Org. Chem.* An important synthetic reaction in which anhydrous aluminium chloride acts as a catalytic agent, as in the production of ethyl benzene ($C_6H_5C_2H_5$) from benzene (C_6H_6) and ethyl bromide (C_2H_5Br), or of acetophenone ($CH_3COC_6H_5$) from benzene.

friend (frĕnd), *n.* [ME. *frend*, *freond*, AS. *frēond*, prop. p. pr. of *frēon*, *frēogan*, to love; akin to D. *vriend* friend, OS *frund* friend, *frīohan* to love, OHG. *frunt* friend, G. *freund*, Icel. *frændi* kinsman, Sw. *frände*, Goth. *frijônds* friend, *frijôn* to love. See FREE; cf. FIEND.] **1.** One who entertains for another such sentiments of esteem, respect, and affection that he seeks his society and welfare; a well-wisher; an intimate associate; sometimes, an attendant.

> A *friend* that sticketh closer than a brother. *Prov.* xviii. 24.

2. One not inimical or hostile; one not a foe or enemy; also, one of the same nation, party, kin, etc., whose friendly feelings may be assumed. The word is sometimes used as a term of friendly address.

> *Friend*, how camest thou in hither? *Matt.* xxii 12.

3. One who looks propitiously on a cause, an institution, a project, or the like; a favorer; a promoter, as, a *friend* to commerce, to poetry, to an institution.

4. A kinsman, a relative; — now only *pl.*

5. A paramour of either sex. *Obs.*

6. [*cap.*] One of a religious sect characterized by disuse of outward rites and an ordained ministry, by simplicity of dress and speech, and esp. by opposition to war, and a desire to live at peace with all men. They are popularly called *Quakers*. The Friends in America are divided into four bodies: (1) **Orthodox Friends**, by far the most numerous branch; (2) **Hicksite Friends** (separated from (1) in 1827–28); — so called, although they object to the name, from Elias Hicks (1748–1830), who so stated the doctrines of the deity, incarnation, etc., of Christ that he was charged with being more or less in sympathy with Unitarianism; (3) **Wilburite Friends**, a very conservative branch, opposed to evangelistic and missionary work; — so called from their principal leader, John Wilbur (1774–1856) of New England; (4) **Primitive Friends**, who are in faith and practice the same as the Wilburite Friends.

Syn. — See COMPANION.

a friend at court *or* **in court**, one disposed to act as a friend in a place of special opportunity or influence. — **Friends of God**, *Eccl. Hist.*, a secret union of clerical and lay mystics in Germany and Switzerland, during the 14th and 15th centuries. The name alludes to *John* xv. 14, 15. — **Friends of Light**, *Eccl.*, the Free Congregations. — **to be friends with**, to have friendly relations with. "He's . . . *friends with* Cæsar." *Shak.* — **to make friends with**, to become reconciled to or on friendly terms with. "Having now *made friends with* the Athenians." *Jowett* (*Thucyd.*).

friend, *v. t.*; FRIEND'ED; FRIEND'ING. **1.** To make friends of; to join as friends.

2. To act as the friend of; befriend. *Now Rare.*

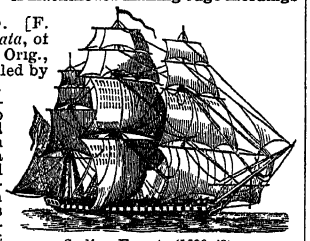
frig'ate (frĭg'ăt), *n.* [F. *frégate*, fr. It. *fregata*, of uncertain origin.] Orig., a light vessel propelled by sails and by oars. The name was transferred in Europe to larger vessels, and by 1750 it had been appropriated for a class of ship-rigged war vessels intermediate between corvettes and ships of the line. Frigates, from about 1750 to 1850, had a full battery on the gun deck and, often, a light battery on the spar deck. A **double-banked frigate,** or **double-banker,** carried guns on two decks and had a flush upper deck. They carried sometimes as many as fifty guns, and were analogous to the modern cruiser. The later **steam frigates** were of largely increased size and power, and formed the main part of the navies of the world till about 1870, when the introduction of ironclads superseded them.



Sailing Frigate (1800-40).

frigate bird. A very long-winged totipalmate sea bird of the genus *Fregata* and family Fregatidæ; — called also *man-of-war bird.* The frigate birds are noted for their extraordinary powers of flight and rapacious habits, obtaining much of their food (which is chiefly fish) by robbing other birds of their prey. *F. aquila* is widely distributed in the tropics and occurs on the southern coasts of the United States and in the West Indies. Though it has a spread of wing of seven or eight feet the body is small and the legs are weak. *F. minor,* the only other species, is a slightly smaller form frequenting the South Pacific and Indian oceans.

1. Any of numerous tailless leaping amphibians of the genus *Rana* and other more or less nearly allied genera. The term is not a definitely limited one. A typical frog differs externally from a typical toad (genus *Bufo*) in its more aquatic habits, smooth skin, webbed feet, much greater agility in leaping and swimming, as well as in certain anatomical characters, but many intermediate forms occur which are called by either name. (Cf. TREE FROG and TOAD.) The ordinary frogs feed on small fishes, worms, etc, and lay their eggs in water, in large clusters inclosed in a jellylike secretion. The young hatch out as tadpoles, in which state some species pass a year, or even more, before assuming the adult form. (See TADPOLE.) Their flesh, esp that of the hind legs, is highly esteemed. Two species, the common frog (*Rana temporaria*) and the larger edible frog (*R. esculenta*), are common European species. Among the best-known American species are the bullfrog, leopard frog, and pickerel frog (see these terms).

Leopard Frog (*Rana pipiens*).

pea, bean, pumpkin, squash, eggplant, cucumber, etc., are vegetables; while the tomato and melon are variously regarded. In general it may be said that a *fruit* is more frequently eaten in the raw state as a dessert; that it possesses a characteristic aroma and flavor, due to the presence of various organic esters, and when cooked requires sugar to counteract its acidity. A vegetable is ordinarily eaten cooked, or when raw as a salad or relish; it is the product of a herbaceous plant, rarely of a shrub or tree. *Fruit* is occasionally applied to certain other vegetable structures of pronounced flavor eaten as a sauce or dessert, as the stalks of rhubarb.

3. *Bot.* In general, any product of fertilization with its modified envelopes or appendages, as the cystocarp in certain algæ, the sporogonium of a moss, etc; specif., and more commonly, the ripened ovary of a seed plant and its contents, including such adjacent tissues as may be inseparably connected with it, as the pod of a pea, the capsule of many annuals, a nut, grain, berry, etc. The principal types of fruit (in the botanical sense) are as follows:

TRUE { INDEHISCENT { *Monocarpellary:* Achene, Utricle, Drupe / *Polycarpellary:* Cypsela, Caryopsis, Nut, Schizocarp, Berry, Pepo. / DEHISCENT { *Monocarpellary* Follicle, Legume, Loment. / *Polycarpellary:* Capsule, Silique, Silicle, Strobile.

See FUGITIVE.] *Music.* A polyphonic composition, developed from a given theme or themes, according to strict contrapuntal rules. The subject theme (*dux*) is first given out by one voice part, which then proceeds with a counterpoint, while the subject, now called the answer (*comes*), is repeated by another at the interval of a fifth or fourth, and so on, until all the parts have answered one by one, continuing their several melodies and interweaving them in one complex progressive whole, in which the theme is often lost and reappears. A fugue has the general divisions, *exposition*, *development*, and *conclusion*, which are constructed with symmetry and strict counterpoint in a **strict fugue**, and with irregularity or incompleteness in a **free fugue**. From its subject theme or from its manner of development, a fugue is called *diatonic*, *Doric*, *real*, *tonal*, *fugue by inversion*, etc. The greatest masters in the fugue form are Bach and Handel.

All parts of the scheme are eternally chasing each other, like the parts of a *fugue*. *Jer. Taylor.*

7. Profession, occupation; office; as, the clerical *function*; also, *Obs.*, body or class of persons of one trade or profession.

8. *Math.* A magnitude so related to another magnitude that to values of the latter there correspond values of the former. Either magnitude is a function of the other, but the one whose values are observed or arbitrarily assigned is called *argument* or *independent variable.* A magnitude may be a function of any number of *arguments.* Thus the surface and volume of a sphere are functions of its radius; the velocity of sound is a function of the elasticity, etc., of the air. In algebra, any expression involving x is a function of x, as x^n, a^x, $\log x$, $\sin x$.

9. Any quality, trait, or fact so related to another that it is dependent upon and varies with that other.

The position of the prime minister is a *function* of the British Constitution. *B Bosanquet.*

function of limited variation, *Math.*, a function the sum of all whose changes of value, all counted positive, for a definite range of value of the argument, is finite.

func'tion (fŭnk'shŭn), *v. i.*; -TIONED (-shŭnd); -TION-ING. To fulfill a function; to act; operate; work; as, the engines failed to *function*; the heart should *function* regularly.

func'tion-al (-ăl), *a.* **1.** Of, pertaining to, or connected with, a function or functions.

2. *Biol.* Performing its regular function; as, a *functional* organ, as distinguished from a rudimentary or abortive one. **functional determinant,** *Math.*, one whose constituents are partial derivatives of one set of variables as to another set, each row containing derivatives of only one variable, and each column derivatives as to only one variable. See JACOBIAN. — **f. disease,** *Med.*, a disease of which the symptoms cannot be referred to any organic lesion or change of structure; — opposed to *organic disease.* — **f. equation,** *Math.*, an equation determining or characterizing not a magnitude, but a functional operator, as $F^2 = -1$. — **f. unity.** See UNITY.

func'tion-al'i-ty (-ăl'ĭ-tĭ), *n.* Functional state, quality, or relation; specif., *Math.*, the general relation of function and argument subsisting between two magnitudes (see FUNCTION).

func'tion-a-ry (fŭnk'shŭn-ȧ-rĭ), *n.*; *pl.* -RIES (-rĭz). [Cf. F. *fonctionnaire.*] One that serves in a certain function; esp., one charged with the performance of a function; as, a public *functionary.* — **func'tion-a-rism** (-ȧ-rĭz'm), *n*

func'tion-a-ry, *a.* Functional.

func'tion-ate (-āt), *v. i.*; FUNC'TION-AT'ED (-āt'ĕd), FUNC'TION-AT'ING. To perform a function; to act, operate; as, this does not *functionate.* — **func'tion-a'tion** (-ā'shŭn), *n.* *Rare.*

fund, *v. t.;* FUND'ED; FUND'ING. **1.** To provide and appropriate a fund or permanent revenue to pay the interest of; to make permanent provision of resources (as by a pledge of customs revenue) for discharging the interest or principal of; as, to *fund* government notes.
2. To convert into a more or less permanent debt bearing regular interest; as, to *fund* the floating debt.
3. To place in a fund or store; to accumulate; to store up.
4. To invest (money) in the funds. *Eng.*
5. To provide funds or means for carrying on; to finance; as, to *fund* an enterprise.

fun'da-ment (fŭn'dȧ-mĕnt), *n.* [ME. *fundament*, *fondement*, OF. *fundement*, *fondement*, F *fondement*, fr. L. *fundamentum* foundation, fr. *fundare* to lay the bottom, to found, fr. *fundus* bottom. See FUND.]
1. Foundation. *Obs.* *Chaucer.*
2. The part of the body on which one sits; the buttocks; specif., *Anat.*, the anus.
3. = ANLAGE.

fun'da-men'tal (-mĕn'tăl), *a.* [Cf. F. *fondamental.*]
1. Of or pertaining to the foundation or basis; serving for the foundation. Hence: Essential, as an element, principle, or law; important; original; elementary; primary; basal; as, a *fundamental* truth; a *fundamental* axiom.
The *fundamental* reasons of this war. *Shak.*
2. Of or pertaining to the foundation of a building. *Obs.*
3. *Geol.* Situated at the bottom; being or constituting the lowest formation; basal; as, the *fundamental* rock.
4. *Music.* Having the root in the bass; — said of a chord or its position.
5. Of or pert. to the fundament, or buttocks. *Humorous.*
Syn. — See RADICAL.
fundamental bass (bās), *Music*, the root note of a chord; the generating tone of a series of harmonics; a bass formed of the roots or fundamental tones of the chords. — **f. circle, f. sphere,** *Math.*, the circle or sphere that returns into itself under a Fuchsian (or hyperfuchsian) transformation. — **f. colors** *or* **colours,** primary colors. See COLOR. — **f. complex,** *Geol*, a widespread complex series of highly metamorphic rock, regarded as the foundation of the geological column, — nearly synonymous with *Archæan*. — **F. Constitutions,** *Amer. Hist.*, an elaborate scheme of government prepared for the colony of Carolina, which had been granted in 1663 to Albemarle, Shaftesbury, Clarendon, and several others as proprietors. The philosopher John Locke was employed to draw this up, but the constitutions as completed are ascribed by a contemporary to Shaftesbury. Three orders of nobility, — landgraves, caciques, and barons, — with landed estates, were provided for, the eldest of the proprietors was to be the superior, with the title of palatine, and the people were to be serfs. A complex system of courts was to be established, and a legislature capable on nonagreement of being resolved into four chambers according to the orders in its composition. The scheme was never to any great extent operative and was abandoned in 1693. — **f. equations of a surface,** *Math*, three partial differential equations connecting the six fundamental magnitudes of a surface. — **f. magnitudes of a surface,** *Math.*, the six magnitudes denoted by E, F, G, D, D', D'', where $E=\left(\frac{\partial x}{\partial u}\right)^2+\left(\frac{\partial y}{\partial u}\right)^2+\left(\frac{\partial z}{\partial u}\right)^2$, $G=\left(\frac{\partial x}{\partial v}\right)^2+\left(\frac{\partial y}{\partial v}\right)^2+\left(\frac{\partial z}{\partial v}\right)^2$, $F=\frac{\partial x}{\partial u}\cdot\frac{\partial x}{\partial v}+\frac{\partial y}{\partial u}\cdot\frac{\partial y}{\partial v}+\frac{\partial z}{\partial u}\cdot\frac{\partial z}{\partial v}$, and D, D', D'' are fractions with the denominator $\sqrt{EG-F^2}$, the numerators being determinants whose first rows are pure 2d derivatives of x, y, z as to u, as to v, and mixed 2d derivatives as to u and v, the other rows being the first derivatives of x, y, and z as to u and v. — **f. region,** *Math.*, any of the congruent interchangeable portions into which a plane is divided by the operations of a group, the points in any two such regions being in one-to-one correspondence for any operation of the group, and no two points in the same region being interchangeable by any operation of the group. — **f. relation,** *Math.*, the inclusion of one class completely in another, denoted by $\prec\!\!\prec$; as, $x \prec\!\!\prec y$ means that every element of x is also an element of y. — **f. right.** *Law.* See RIGHT, *n.*, *adj.* — **f. sequence,** any progression or regression that belongs to a given series (Cantor's *Fundamentalreihe*). — **f. spiral.** *Bot.* = GENETIC SPIRAL. — **f. tissue,** *Bot.*, the primary, essentially undifferentiated, parenchymatous tissue forming the greater part of the initial plant body. The whole tissue of the lower plants may be considered fundamental tissue, and in the higher plants it includes all tissues not belonging to the tegumentary or vascular systems, such as the pith, pulp of leaves and fruits, etc

fun'da-men'tal (fŭn'dȧ-mĕn'tăl), *n.* **1.** A principle, rule, law, or article, which serves as the groundwork of a system; essential part; as, the *fundamentals* of the Christian faith.
2. *Music.* A fundamental bass or tone.

fun'da-men-tal'i-ty (fŭn'dȧ-mĕn-tăl'ĭ-tĭ), *n.* State or quality of being fundamental.

fund'ed (fŭn'dĕd; -dĭd; 151), *p. a.* **1.** Converted into a debt that is (as originally used) permanent or runs for a fixed, usually a considerable, period of time, and bears regular interest; existing in the form of obligations to pay interest, and in the case of bonds the principal also, at certain fixed dates; as, a *funded* debt.
This expression [*funded* debt] was originally used as a description of debt, the service of which was secured by a special fund (e. g., the produce of a certain tax), but gradually the meaning acquired by the term was that of debt raised for permanent purposes and either repayable at a distant date or not repayable at any definite date. . . . The *funded* debts of most or all (i. e., other than British) countries are nominally repayable at fixed dates either gradually, by yearly purchases or drawings, the funds being supplied by a regular sinking fund, or by simultaneous repayment of the whole issue. *Dict. of Pol. Econ*
2. Invested in the funds, as, *funded* property. *Eng.*
3. Forming, or accumulated into, a fund or store, stored up.

fund'er (fŭn'dẽr), *n.* One who favors the funding of a debt or debts or the payment of indebtedness by means of a sinking fund; esp., in Virginia, in 1878 and for some years thereafter, one of those who advocated the funding and paying of the State debt, in opposition to the readjusters.

fun'di (fŭn'dĭ), *n.* [Prob. fr. the native name.] A tropical African grass (*Paspalum exile*) cultivated by the natives of the west coast for its seed, which resembles millet.

fund'ing, *p. pr. & vb. n.* of FUND.
funding system, a system of finance by which a debt is funded, specif., and usually, the system of converting a floating or short-time debt, or esp. a number of different debts, into one that is payable either at a distant date (usually with an option to the debtor to redeem after a certain time) or at no definite date, and that bears a fixed interest.

fun'dus (fŭn'dŭs), *n.* [L., bottom.] **1.** *Rom. & Civil Law.* Land.
2. *Anat.* The bottom or base of (or part opposite the aperture of) the internal surface of a hollow organ. The *fundus* of the stomach is the greater curvature, that of the bladder the lower back part, that of the uterus the large upper end, that of the eye the part opposite the pupil.

fu-ne'bri-al (fū-nē'brĭ-ăl), *a.* [L. *funebris* belonging to a funeral, fr. *funus* funeral.] Funereal. *Now Rare.*

fu'ner-al (fū'nẽr-ăl), *n.* [LL. *funeralia*, prop. neut. pl. of *funeralis* of a funeral, fr. L. *funus*, *funeris*, funeral: cf. F. *funérailles*, OF. also *funeraille*.] **1.** The rites used in the disposition of a dead human body, whether such disposition be by interment, burning, or otherwise; esp., the ceremony or solemnization of interment; obsequies; burial.
King James his *funerals* were performed very solemnly in the collegiate church at Westminster. *Fuller.*
2. Hence, specif.: **a** The procession attending the burial of the dead; the show and accompaniments of an interment.
"The long *funerals*." *Pope.* **b** A funeral sermon. *Obs.*
Mr. Giles Lawrence preached his *funerals* *South*
c Death. *Obs.* **d** A grave. *Obs* **e** A monument. *Obs.*
☞ The plural form, *funerals*, was formerly common in the senses of the singular. Cf. OBSEQUY.

fu'ner-al, *a.* [LL. *funeralis* · cf. OF. *funeral.* See FUNERAL, *n.*] Pert. to a funeral; used at the burial of the dead; befitting a funeral; as, *funeral* honors; a *funeral* benefit. Also, *Obs. or R.*, funereal. — **funeral pile,** a pyre.

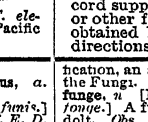
fu'ner-a-ry (-ă-rĭ), *a.* [L. *funerarius.* See FUNERAL, *n.*] Pertaining to, or associated with, a funeral or burial.

fu-ne're-al (fū-nē'rē-ăl), *a.* [L. *funereus*, fr. *funus* a funeral.] Suiting a funeral; pertaining to burial; sad and solemn; dismal; mournful; as, a *funereal* countenance.

fu-nest' (fū-nĕst'), *a.* [L. *funestus*, fr. *funus* a funeral, destruction: cf. F. *funeste.*] Portentous; lamentable; doleful. *Rare.* "*Funest* and direful deaths." *Coleridge.*

fun'gate (fŭn'gāt), *v. i.;* FUN'GAT-ED (-gāt-ĕd); FUN'GATING (-gāt-ĭng). *Med.* To assume a fungous form; to undergo granulation rapidly; as, a *fungating* sore.

fun'gi (fŭn'jī), *n. pl.* [L.] **1.** *pl.* of FUNGUS.
2. [*cap.*] *Bot.* A primary division of thallophytic plants, including those destitute of chlorophyll, and reproducing mainly by means of asexual spores, which are developed in various ways. The Fungi are all saprophytic or parasitic in habit, and appear to have originated by degeneration from various algæ. They are commonly divided into three classes: the Phycomycetes, in which sexual reproduction often occurs, the Ascomycetes, and the Basidiomycetes. A number of forms whose complete life history is unknown are grouped as the Fungi Imperfecti The Myxomycetes, or slime molds, are usually classed in a distinct phylum. See FUNGUS and the names of the above classes in the Vocabulary. Cf. also THALLOPHYTA.



Fungia (*F. elegans*) of Pacific Coast. 1/3

Fun'gi-a (fŭn'jĭ-ȧ), *n.* [NL., fr. L. *fungus* mushroom.] *Zoöl.* A genus of large simple stony corals; — so called because their skeleton is usually flat and circular, with radiating plates, like the gills of a mushroom. It is the type of a family, *Fungiidæ*, syn. *Fungidæ*, some of which form small colonies. — **fun'gian** (fŭn'jĭ-ăn), *a. & n.*

fun'gi-bil'i-ty (fŭn'jĭ-bĭl'ĭ-tĭ), *n.* Quality or state of being fungible.
Profoundly convinced of the *fungibility* and pliability of mankind, he [Jeremy Bentham] was but too ready to draw a code for England . . . at the shortest notice. *Encyc. Brit.*

fun'gi-ble (fŭn'jĭ-b'l), *n.*, usually in *pl.* [LL. (*res*) *fungibiles*, fr. L. *fungi* to discharge. "Called *fungibiles*, *quia una alterius vice fungitur.*" *John Taylor* (1755). Cf. FUNCTION.] A thing that is fungible; specif., *Law*, a thing of a class or kind such that one individual or part may be used in place of any other individual or equal part in satisfaction of an obligation. The classification is important with reference to the rights of the borrower in the contract of mutuum (which see), the usufructuary of goods that perish or are alienated in the using, etc.

fun'gi-ble, *a.* **1** *Law.* Of such a kind or nature that one specimen or part may be used in place of another specimen or equal part in the satisfaction of an obligation; — applied, in the Civil law and various Civil-law systems, and in jurisprudence, to things that in general are estimated in number, weight, or measure, and cannot be used except by permanently appropriating them, as in consumption or alienation. See FUNGIBLE, *n.*
2. Interchangeable; capable of mutual substitution.
Leibnitz expressed this by rather an odd phrase, borrowed from the Roman law itself, calling them [the writers of the Pandects] *fungible* persons *John Austin.*
3 *Econ.* Capable of continued or prolonged use, as a house. *Obs. or Hist.*

fun'gi-cide' (fŭn'jĭ-sīd'), *n.* [*fungus* + *-cide*] Any substance that destroys fungi. — **fun'gi-cid'al** (-sīd'ăl), *a.*

fun'gi-form (-fôrm), *a.* [*fungus* + *-form.*] Shaped like a fungus or mushroom.
fungiform papillæ, *Anat.*, numerous small eminences having a narrowed base on the upper surface of the tongue.

Fun'gi Im'per-fec'ti (fŭn'jī ĭm'pẽr-fĕk'tī), *pl.* [L. *imperfecti* imperfect.] *Bot.* A large and heterogeneous group of fungi of which the complete life history is not known. Some of them undoubtedly represent the conidial stages of various ascomycetes, others may be thus connected but fail to produce ascospores, and still others are perhaps perfect forms whose relations have not yet been determined. The group is divided for convenience into the orders Sphæropsidales, Melanconiales, and Moniliales.

fun'gin (fŭn'jĭn), *n.* [L. *fungus* mushroom.] *Chem.* A variety of cellulose found in the cell walls of fungi.

fun'goid (fŭn'goid), *a.* [*fungus* + *-oid.*] Resembling, or characteristic of, a fungus, fungal — *n.* A fungus.

fun-gos'i-ty (fŭn-gŏs'ĭ-tĭ), *n.*; *pl.* -TIES (-tĭz). [Cf. F. *fungosité*, *fongosité.*] Fungous excrescence.

fun'gous (fŭn'gŭs), *a.* [L. *fungosus.*] **1.** Pertaining or relating to a fungus or the fungi.
2. Of the texture of a fungus; spongy. *Obs. or R.*
3. Growing or springing up suddenly, as a fungus does, and not substantial or durable.

fun'gus (fŭn'gŭs), *n.*; *pl.* L. FUNGI (fŭn'jī), E. FUNGUSES (fŭn'gŭs-ĕz; -ĭz, 151). [L., a mushroom; perh. akin to a doubtful Gr. σφόγγος sponge, for σπόγγος: cf. F. *fongus*, *fungus.* Cf. SPONGE.] **1.** Any of a group of thallophytic plants known as the Fungi, comprising the molds, mildews, rusts, smuts, mushrooms, toadstools, puffballs, and the allies of each. Fungi range in size from the microscopic cells of the yeast plant to the highly organized body of a mushroom often of considerable size and extent. The vegetative system consists of septate or unseptate filaments called *hyphæ* which collectively form the *mycelium*. The spores are produced in various ways, often in sporophores of definite structure; in some groups several different types of spores are developed. See FUNGI.
2. *Med.* A morbid spongy growth; esp., a mass of morbid spongy granulations.

fun'gused (fŭn'gŭst), *a.* Having a fungous growth.
fungus gall. *Bot.* A malformation produced in a plant by the attack of a parasitic fungus.
fungus gnat, *or* **fungus midge,** any of the numerous small nematocerous gnats constituting the family Mycetophilidæ. Their larvæ commonly live in fungi.

fun'gus-y (fŭn'gŭs-ĭ), *a.* Having a fungous growth or disease.

fu'ni-cle (fū'nĭ-k'l), *n.* [L. *funiculus*, dim. of *funis* cord, rope.] **1.** A small cord; a funiculus.
2. *Bot.* **a** The stalk of an ovule. **b** In certain fungi of the family Nidulariaceæ, the hyphal cord attaching the peridiolum to the peridium.

fu-nic'u-lar (fū-nĭk'ū-lar), *a.* **1.** Consisting of a small cord or fiber.
2. Pertaining to, or dependent on, the tension of a cord.
3. *Anat. & Zoöl.* Pertaining to, like, or consisting of, a funiculus or funiculi.
funicular action, *Mech.*, the force or action exerted by a rope in drawing together the supports to which its ends are fastened, when acted upon by forces applied in a direction transverse to the rope, as in the archer's bow. — **f. cord,** the umbilical cord. — **f. curve,** a catenary. — **f. machine,** *Mech.*, an apparatus, consisting in its usual form of a string passed over two pulleys and tautened by weights at its ends, supporting one or more weights in the span between the pulleys. It is used for demonstrating certain important theorems on the equilibrium of forces in statics. — **f. polygon.** *Mech.* **a** The polygonal figure assumed by a cord supported at its extremities, and sustaining weights or other forces at different points. **b** A closed diagram obtained by drawing, in the compartments between the directions of the forces and reactions that keep a beam in

fus'co- (fŭs'kō-). A combining form from Latin *fuscus*, meaning *dark-colored, tawny;* specif., *Chem.*, designating certain complex salts of cobalt containing ammonia; as, *fusco*-cobaltic chloride, $Co_2(NH_3)_8Cl_3(OH)_2{\cdot}2H_2O$.

fus'cous (fŭs'kŭs), *a.* [L. *fuscus.*] Brown or grayish black; darkish.

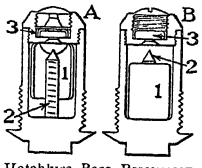
Fuscous colors, as black or brown, or deep purple. *Burke.*

fuse (fūz), *v. t.;* FUSED (fūzd); FUS'ING (fūz'ĭng). [L. *fusus*, p. p. of *fundere* to pour. See FOUND to cast, cf. FUTILE.] **1.** To liquefy by heat; to render fluid; dissolve; melt. **2.** To unite or blend, as if melted together.

Whose fancy *fuses* old and new. *Tennyson.*

fuse, *v. i.* **1.** To be reduced from a solid to a fluid state by heat; to be melted; to melt. **2.** To be blended, as if melted together.

fuse, fuze (fūz), *n.* [Cf. It. *fuso* spindle. See FUSEE of a watch.] **1.** Any of various devices, as a tube, casing, cord, or the like, filled or impregnated with combustible matter, or a kind of detonator, by means of which an explosive charge is ignited, as in firing a cannon, blasting, exploding a shell, etc. Fuses may be classified according to the manner of ignition, as: **chemical fuse**, in which are brought together substances which by their chemical union produce ignition; **concussion** or **percussion fuse**, producing explosion by concussion; **electric fuse**, fired electrically; **friction fuse**, ignited by frictional heat; **time fuse**, arranged so as to fire the charge after a certain definite interval of time has elapsed; **combination fuse**, a combination of the percussion and time fuses. Fuses for projectiles are classified according to position, as **base** and **point fuses**.



Hotchkiss Base Percussion Fuse. 1 Plunger; 2 Striker; 3 Cap. *A* Position before discharge; *B* Position after discharge with Plunger forced back by its own inertia along the Striker. At impact the Plunger drives the Striker against the Cap.

2. *Elec* A wire, bar, or strip of fusible metal inserted for safety in an electric circuit. When the current increases beyond a certain safe strength, the metal melts, interrupting the circuit and thereby preventing possibility of damage.

fuse, fuze, *v. t.* To attach a fuse to.

fuse, *or* **fuze, auger.** An instrument for removing part of the filling of a fuse, to regulate its time of burning, the depth of the bore being indicated by a scale.

F Fusee. *B* Barrel.

2. *Horol.* A conoidal spirally grooved pulley from which a chain or gut is unwound on to the barrel which contains the spring. The lessening of the power of the spring is compensated for by the increasing diameter of the fusee. The going fusee is provided with a maintaining power to drive the train while being turned to wind up the spring. The fusee is now practically replaced by the isochronous balance. **3.** *Veter.* A bony excrescence on the leg of a horse. **4.** A fuse; a detonator. *Obs. or R.* **5.** *Railroads.* A signal used principally for the protection of trains, consisting of a tube filled with a composition which burns with a bright colored light for a definite time. **6. a** A friction match for smokers' use having a bulbous head which when ignited is not easily blown out even in a gale of wind. **b** A kind of match made of paper impregnated with niter and having the usual igniting tip.

fuse, *or* **fuze, gauge,** *or* **gage.** A fuse-cutting instrument, consisting of a block of wood, with a brass scale on one side, and a hinged knife.

fu'sel (fū'zĕl), *n.*, **fusel oil.** [G. *fusel* bad liquor.] *Chem.* **a** An acrid, oily liquid, of unpleasant odor, accompanying many raw, or insufficiently distilled, alcoholic liquors (as potato whisky, corn whisky, etc.) as an undesirable ingredient. It consists of several higher alcohols, fatty acids, etc., but chiefly of amyl alcohol. Hence: **b** Specif., amyl alcohol.

fuse, *or* **fuze, plug.** **a** *Ordnance.* A plug fitted to the fuse hole of a shell to hold the fuse. **b** A fusible plug that screws into a receptacle, used as a fuse in electric wiring.

fuse, *or* **fuze, wire.** *Elec.* Wire suitable for fuses.

fu'si-bil'i-ty (fū'zĭ-bĭl'ĭ-tĭ), *n.* [Cf. F. *fusibilité.*] Quality of being fusible, or degree of this quality. The fusibility of minerals is, for purposes of comparison, usually expressed in terms of the following scale: 1. Stibnite (easily fusible in candle flame). 2. Natrolite (fusible in candle flame). 3. Almandite garnet (easily fusible with blowpipe). 4. Actinolite (fairly fusible). 5. Orthoclase (difficultly fusible). 6. Calamine (finest edge rounded in hottest flame). 7. Quartz (infusible with blowpipe).

fu'si-ble (fū'zĭ-b'l), *a.* [F. *fusible.* See FUSE, *v. t.*] Capable of being melted or liquefied.

fusible metal *or* **alloy,** any easily fusible metal or alloy, as those composed of bismuth, lead, and tin, or of these three metals and cadmium. They are used for soft solders, filling cavities in teeth, taking impressions of woodcuts, coins, or the like, for safety plugs for boilers, etc. The leading fusible alloys (named after their inventors) are:

NAME.	Composition per cent.				Melting point.	
	Bismuth.	Lead.	Tin.	Cadmium		
Lichtenberg's alloy	50	30	20	—	F. 196.9°	C 91.6°
Lipowitz's alloy	50	27	13	10	140.	60
Newton's alloy	20	50	30	—	202 1	94 5
Rose's alloy	50	25	25	—	200.75	93.75
" "	50	20	30	—	—	—
Wood's alloy	50	25	12 1-2	12 1-2	159 8	71.
" "	50	27	13	10	—	—

— fusible plug, a gun-metal plug with a core of fusible alloy which melts at a definite desired temperature, screwed into the crown of a boiler fire box or furnace so that the steam shall blow out the fire when overheating occurs, as through shortness of water. **— f. porcelain.** = CRYOLITE GLASS

Fusiform Root of Radish.

G

G (jē). **1.** The seventh letter of the English, as of the Latin, alphabet (see ALPHABET, *Illust.*). It was originally a differentiated form of C devised by the Romans when the sounds of *g* "hard" (as in *go*) and *k* (as in *king*), both until then represented by C, became distinguished. The name is also from the Latin, and probably comes to us through the French. G has in modern English two chief sounds, commonly called "hard" *g* and "soft" *g.* The former, a simple sound, as in *gave, go, gull,* was the original sound; the other, a compound sound (= *j* = *d-zh*), as in *gem, gin, dingy,* belongs mainly to the Romance portion of the language. Etymologically G is most closely related to *c* "hard," *k, y,* and *w;* as in *corn, grain, kernel; kin,* L. *genus,* Gr. γένος; E. *garden, yard; drag, draw;* also to *ch* and *h,* as in *get, prehensile; guest, host* (an army); *gall, choler; gust, choose.* See C, and also *Guide to Pron.,* §§ 163–171.
2. As a *symbol,* used to denote or indicate: **a** The seventh in a series; seventh in order or class; sometimes, the numeral 7; as, Company *G.* **b** [*cap.*] *Astron.* A prominent Fraunhofer line caused by iron. **c** [*l. c.*] *Physics.* The constant of gravitation (see under CONSTANT). **d** [*cap.* or *l. c.*] *Elec.* Conductance. **e** *Music.* (1) The fifth tone of the model major scale (that of C), or the seventh tone of its relative minor scale (that of A minor). (2) In notation, any symbol representing this tone, as a note on a certain line or space. See CLEF, *Illust.* (3) On a keyboard, any key giving this tone. See KEYBOARD, *Illust.*
3. As medieval Roman numeral, G stands for 400, and $\overline{\text{G}}$ for 40,000.
4. As an *abbreviation:* **a** In the form **G.:** Various proper names, as George, Grace; German; Germany; Grand; Gulf. **b** In the form **g.** or **G.:** gauge; gelb (G., yellow); gelding; genitive; (in the log book, in the form *g*) gloomy weather, *Naut.;* gram; grand; green; (in the log book, in the form *G*) ground swell, *Naut.;* guide, guinea or guineas. **G clef,** *Music,* the treble or violin clef. See CLEF. — **G flat** (G♭), the tone a half step below G. — **G flat major,** G major, the major scales or keys having the signatures respectively of six flats and one sharp. — **G minor,** G **sharp minor,** the minor scales or keys relative to B flat major and B major, and having the same signatures respectively of two flats and five sharps. — **G sharp,** *Music,* the tone (G♯) a half step above G. — **G string.** **a** *Music.* A string tuned to G, as the lowest string of the violin. **b** A garment, much worn by savages, consisting of a strip of cloth passed round the waist and between the legs.

gait (gāt), *n.* [See GATE a way.] **1.** A going; walk; way.

Good gentleman, go your *gait*, and let poor folks pass. *Shak.*

2. Manner of walking, running, or moving on foot.

I do know him by his *gait*. *Shak.*

3. Specif., of horses, foot movement in going; — the *pl.* was formerly (and is still rarely) used in the sing. sense. The various *gaits* of the horse have been carefully analyzed by means of instantaneous photography. In the following table the figures 1 and 3 represent respectively the left fore foot and the left hind foot, and the figures 2 and 4 the right fore foot and right hind foot. Each gait is divided into a series of phases with reference to the feet that are on the ground at any instant, a new phase commencing whenever a foot touches or leaves the ground. Thus, in the *walk* (see below), at the time when the observation begins, 3, 1, and 4 are on the ground. In the next phase the animal is supported only by 1 and 4, 3 having been raised, and so on. Each horizontal row of figures gives the complete cycle, returning again to the original phase. A zero means that all four feet are in the air. These phases (separated below by commas) do not represent equal time intervals; thus, in the trot and the pace, the feet strike the ground almost in pairs, so that the time during which only one foot is on the ground is very short

Walk	3 1 4, 1 4, 1 4 2, 4 2, 4 2 3, 2 3, 2 3 1, 3 1, 3 1 4
Single foot (rack, amble)	4 2, 2, 2 3, 3, 3 1, 1, 1 4, 4, 4 2
Canter	4, 4 2, 4 2 3, 2 3, 2 3 1, 3 1, 1, 0, 4

gall, *n.* [F. *galle*, noix de *galle*, fr. L *galla.*] A swelling or excrescence of the tissues of plants resulting from the attacks of certain parasites, which cause an abnormal and sometimes very extraordinary proliferation of the cells of the host plant. Galls are produced both by vegetable organisms (certain fungi, bacteria, and slime molds) and by various insects and mites and a few worms. The chief gall-producing insects are the hymenopterous gallflies (Cynipoidea), the dipterous gall gnats (Cecidomyiidæ), and certain aphids. In most cases the insect punctures the bark or leaf and lays its egg or eggs in the wound, and the larva lives in and feeds on the gall. Many galls contain much tannic acid and are important in commerce, esp. those produced on certain oaks (esp. *Quercus lusitanica*) by some of the cynipoid gallflies. These resemble nuts in size and hardness when dry, and are called also *nutgalls* and *gallnuts.* They come largely from eastern Europe, Syria, etc. The best are called **blue, black,** or **Aleppo galls**; the so-called **white galls** are inferior. Cf. OAK APPLE.

3. Bravery; intrepidity; as, the *gallantry* of soldiers.

4. A gallant action or speech.

5. The life or conduct of a gallant.

6. Civility or polite attention to ladies; in a bad sense, attention or courtesy designed to win illicit favors from a female; freedom of principle or practice with respect to female virtue; intrigue.

Syn. — See COURAGE.

gall apple. An applelike gall. Cf. OAK APPLE.

gal'late (găl'āt), *n.* [See GALL gallnut.] *Chem.* A salt or ester of gallic acid.

gall bladder. *Anat.* A membranous and more or less muscular sac, present in most vertebrates, in which the bile from the liver is stored until required. In man it is pear-shaped and lodged in a fossa on the under surface of the right lobe of the liver. Its duct, the gall duct or cystic duct, joins the hepatic duct, forming the common bile duct.

gal'le-ass (găl'ē-ăs), *n.* [F. *galéasse, galéace*, fr. It. *galeazza;* cf. LL. *galea* a galley. See GALLEY.] *Naut.* A large galley propelled by both sails and oars and mounting heavy guns in broadside; esp., such a vessel used by the southern nations of Europe in the 16th and 17th centuries. See GALLEON, and GALLEY.

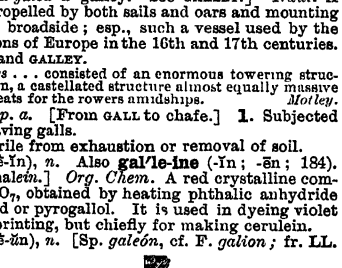
The *galleasses* . . . consisted of an enormous towering structure at the stern, a castellated structure almost equally massive in front, with seats for the rowers amidships. *Motley.*

galled (gôld), *p. a.* [From GALL to chafe.] **1.** Subjected to galling; having galls.

2. *Agric.* Sterile from exhaustion or removal of soil.

gal'le-in (găl'ē-ĭn), *n.* Also **gal'le-ine** (-ĭn; -ēn; 184). [*gallo-* + phthale*ein*.] *Org. Chem.* A red crystalline compound, $C_{20}H_{10}O_7$, obtained by heating phthalic anhydride with gallic acid or pyrogallol. It is used in dyeing violet and in calico printing, but chiefly for making cerulein.

gal'le-on (găl'ē-ŭn), *n.* [Sp. *galeón*, cf. F. *galion;* fr. LL. *galeo, galio.* See GALLEY.] *Naut.* A sailing vessel of the 15th and following centuries, often having three or four decks, and used for war or commerce, esp. by the Spaniards as treasure ships in their American trade. The term is often rather indiscriminately applied to any large sailing vessel.



Galleon.

The *galleons* . . . were huge, round-stemmed, clumsy vessels, with bulwarks three or four feet thick, and built up at stem and stern, like castles. *Motley.*

gal'ler-y (găl'ēr-ĭ), *n.; pl.* GALLERIES (-ĭz). [F. *galerie*, fr. LL. *galeria*, of uncertain origin.] **1.** A long and relatively narrow room, hall, or other artificial inclosure; esp., a covered space for walking, more or less open at the sides; a roofed promenade; an ambulatory; esp., in the southern United States, a veranda; in English country houses, a main corridor having windows continuously on one side, these probably replacing open arches.

2. A corridorlike platform, passage, or walking way, esp. one projecting from a wall and open at the outer edge or having there a rail or balustrade; as: **a** A balcony. **b** A raised platform on a roof. **c** A passage, either within the thickness of a wall, or projecting on corbels, or between the main wall and an arcade, as in the front or flank of a Gothic church, and included in the architectural design as a decorative feature, though also serving useful purposes These are often filled with statuary, as the Gallery of the Kings (or royal gallery) at Notre Dame of Paris.

3. A room for the exhibition of works of art, because typically long and narrow, of the nature of a corridor, as, a picture *gallery;* hence, a large or important collection, as the National *Gallery*, London.

4. A platform attached to one or more sides of an auditorium, as in a church or theater, usually, when large, for the audience or part of it, or, when small, for some special use; specif., in a theater, the highest of such platforms, commonly having the cheapest seats.

5. The occupants of such a gallery, as in a legislative chamber; esp., the part of the audience in the cheapest seats of a theater, and hence the less refined or educated part of the public; also, any body of spectators at a game, as of golf or tennis, or of auditors of a speech or debate.

6. A place of business or pleasure shaped like a gallery or analogous to a gallery (in any sense); as, a photograph *gallery;* a shooting *gallery.*

7. *Naut.* A platform at the quarters or around the stern, common in old-time vessels (the "quarter gallery" and "stern gallery"); — called also *balcony.*

8. A raised walk, usually railed, as one to facilitate oiling or examining the upper parts of a big engine.

9. Specif.: **a** *Mining.* A working drift at level. **b** A passage made by an animal, as by moles or ants underground. **c** *Fort.* Any sunk or cut passageway which is covered overhead as well as at the sides.

10. *Court Tennis.* Any of several netted openings below the side penthouse, the one farthest from the dedans being the winning gallery, because a ball played into it is counted as winning; a ball going into any other is counted a chase.

11. An ornamental or protective railing or parapet; as: **a** A barrier or railing along the edge of a table, shelf, etc. **b** A ring to support a lamp shade or globe. **c** *Jewelry.* A setting with perforated sides.

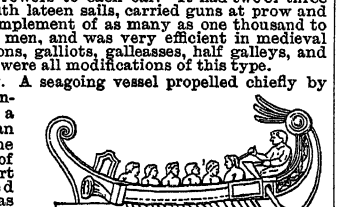
gal'let, *v. t.;* -LET-ED; -LET-ING. *Masonry.* To fill in the fresh mortar joints of (rubble masonry) with gallets.

gal-le'ta grass (ga-lā'tă). [Sp. *galleta* hard-tack] **a** A perennial forage grass (*Hilaria rigida*) of arid regions in the southwestern United States and Mexico, where it forms the principal source of hay. **b** The black bunch grass. See under BLACK.

gal'ley (găl'ĭ), *n.* [ME. *galeie*, fr. OF. *galie, galée*, LL. *galea*, LGr. γαλέα; of unknown origin.] **1.** A large, low, usually one-decked, vessel propelled by both oars and sails, used throughout the Middle Ages, esp. in the Mediterranean, for war, trading, ceremonial, and pleasure purposes. The typical war galley of the Mediterranean was from one hundred to two hundred feet long, often having twenty oars on each side with many rowers to each oar. It had two or three masts rigged with lateen sails, carried guns at prow and stern, and a complement of as many as one thousand to twelve hundred men, and was very efficient in medieval warfare. Galleons, galliots, galleasses, half galleys, and quarter galleys were all modifications of this type.

Venetian Galley.

2. *Class. Antiq.* A seagoing vessel propelled chiefly by oars, though generally having a mast carrying an oblong sail. The earliest type of galley was a short crescent-shaped vessel, which was superseded by the penteconter, characterized by decks fore and aft and carrying fifty rowers, and later by the bireme, with two tiers of rowers, the second tier occupying a raised deck. The trireme, supposed to have been introduced into Greece about 700 B.C., has been viewed as a vessel with three tiers of rowers, but is more plausibly regarded as one with three rowers to a bench, each rowing a separate oar, but all through the same port. The bench is supposed to have been in three steps and to have inclined aft, so that the outermost rower, or thalamite, sat somewhat in advance of and below the second rower, or zygite, while the third rower, the thranite, was higher and farther back than either of the others. The quadrireme and quinquereme are supposed to have been vessels in which the rowers were arranged in an extension of this same plan, that is, four and five to the bench respectively. Later yet, galleys are mentioned having from six or seven (hexeris, hepteris) to as many as thirty (triaconter) or forty (tessaracon-ter) banks of oars, and it is probable that these were bargelike vessels having from six to forty to the oar, or sweep. Galleys of all these types were in use in the Mediterranean in medieval times.



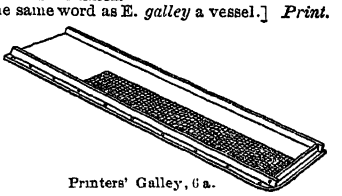
Galley (Trireme).

3. A large, open, rowing boat, such as was formerly used in England by customs officers, press gangs, etc, by captains of war vessels, and as a river pleasure boat. In England sailors apply the name to any long open boat using both oars and sails.

4. The cookroom or kitchen and cooking apparatus of a vessel; — sometimes on merchant vessels called *caboose.*

5. *Chem.* = GALLERY FURNACE.

6. [F. *galée;* the same word as E. *galley* a vessel.] *Print.* **a** An oblong tray, commonly of brass, with upright sides, to hold type which has been set. **b** A galley proof.



Printers' Galley, 6 a.

galley half-penny. A silver coin, one of the various small Continental pieces circulated in England at a time when there was a dearth of English small coin; — said to be so called from being introduced by sailors. Its circulation was prohibited by a law of Henry IV.

galley proof. *Print.* A proof from type on a galley before it is made up in pages.

galley punt. A clinker-built open boat with dipping lugsail, using oars when required, used esp. by English pilots.

galley slave. A slave who works at the oar on board a galley; also, a criminal condemned to such work.

gall'flow'er (gôl'flou'ĕr), *n.* **1.** The degenerate pistillate flower found in certain varieties of the cultivated fig. These flowers cannot develop seed, on account of their aborted ovaries, and appear to be produced for the benefit of the fig wasp, which pollinates the fertile flowers.

2. = GALLWEED.

gall'fly' (gôl'flī'), *n.; pl.* -FLIES (-flīz'). An insect that deposits its eggs in plants, and occasions galls; — often used esp. of the hymenopterous gall insects (see CYNIPIDÆ) as distinguished from the dipterous gall gnats.

gall fungus. Any parasitic fungus causing galls in plants.

gall gnat. Any of numerous gall-making dipterous gnats of the family Cecidomyiidæ (which see); also, as a general name, any member of that family.

gal'li-am'bic (găl'ĭ-ăm'bĭk), *a.* [L. *galliambus* a song used by the priests of Cybele; *Gallus* (a name applied to these priests) + *iambus.*] *Gr. & Lat. Pros.* Consisting of two iambic dimeters catalectic, the last of which lacks the final syllable; — said of a kind of Ionic verse, also regarded as consisting of four Ionic a minore feet, varied by resolution, contraction, etc. — *n.* = GALLIAMBUS.

gal'li-am'bus (-bŭs), *n.; pl.* -BI (-bī). [See GALLIAMBIC.] *Gr. & Lat. Pros.* A galliambic verse or meter.

gal'liard (găl'yărd), *a.* [F. *gaillard.*] *Archaic.* **1.** Gay in spirits or appearance; lively; gallant.

2. Hardy; valiant.

gal'liard, *n.* A galliard man. *Archaic.*

Selden is a *galliard* by himself. *Cleveland.*

gal'liard, *n.* [F. *gaillarde.* See GALLIARD, *a.*] A dance of gay, lively character, or its music, generally in triple time, which in old scores comes after the stately pavan.

gal'liard-ise' (-ēz'), *n.* [F. *gaillardise.* See GALLIARD, *a.*] Excessive gayety; merriment. *Archaic.*

gal'lic (găl'ĭk), *a.* [From GALLIUM.] *Chem.* Of, pertaining to, or containing, gallium.

gal'lic (găl'ĭk), *a.* [From GALL the excrescence.] *Chem.* Pertaining to or designating a white crystalline acid, $C_6H_2(OH)_3{\cdot}CO_2H$, very widely distributed among plants, being found in the free state in galls, tea, etc. It is also produced artificially. *Gallic acid* is used in medicine as an astringent and in photography as a reducing agent. It is usually prepared from tannin, and they both give a dark color with iron salts, forming tannate and gallate of iron, which are the essential ingredients of common black ink.

Gal'lic (găl'ĭk), *a.* [L. *Gallicus* belonging to the Gauls, fr. *Galli* the Gauls, *Gallia* Gaul, now France: cf. F. *gallique.*] Pertaining to Gaul or France; Gallican.

Gal-li'næ (găl-lī'nē), *n. pl.* [NL., fr. L. *gallina* a hen, *gallus* a cock.] *Zool.* An order of birds of largely terrestrial habits, of which the barnyard fowl is a familiar example They are mostly rather large, heavy-bodied birds, with comparatively short wings, poorly adapted for long flights, though many species fly swiftly for a short distance. The legs are adapted for running and scratching the ground, where most of their food (consisting of seeds, worms, etc.) is found. With few exceptions they nest on the ground, and lay numerous eggs. They are often polygamous, and the young are precocial. They are schizognathous and schizorhinal, the crop is large, and there is a muscular gizzard. This group includes the pheasants, turkeys, grouse, partridges, quails, etc., and the megapodes and curassows. Used in a broad sense, certain other forms, as the hemipodes and the hoactzin, the sand grouse, etc., have been included. Other names of the group, or of a subdivision including most of its members, are *Gallinaceæ, Gallinacei, Galli*, and *Alectoromorphæ*. Cf. GALLIFORMES, RASORES.

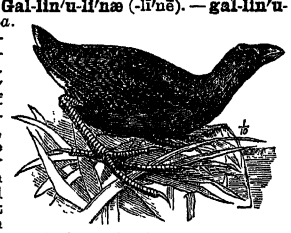
gal'li-nule (găl'Ĭ-nūl), *n.* [L. *gallinula* chicken, dim. of *gallina* hen.] Any of certain birds of the rail family, related to the coots, which they resemble in having a horny frontal shield, though their toes are long and slender, and without lobes. The common gallinule of Europe (*Gallinula chloropus*), called also *water hen, moor hen*, etc., is one of the most common and familiar aquatic birds, and may often be seen swimming on the ponds of parks, even in large cities. There is a closely related American species, the Florida gallinule (*G. galeata*), but it is much less common and familiar. The purple gallinules, as *Porphyrio cæruleus* of southern Europe and *Ionornis martinica* of tropical America and the southern United States, have handsome blue and greenish plumage.



Purple Gallinule (*Porphyrio cæruleus*).

Gal'li-o (găl'Ĭ-ō), *n. Bib.* The proconsul (*A. V.*, deputy) of Achaia, who refused to try St. Paul when the Jews of Corinth accused him, and who refrained from interposing when Sosthenes, the chief ruler of the synagogue, was beaten before the judgment seat. Gallio was a brother of Seneca and an uncle of Lucan. From the statement or comment in Acts xviii. 17, "And *Gallio* cared for none of those things," he has been taken as a type of the indifferent man or the careless, easy-going person.

Gal-lip'o-li oil (găl-lĭp'ō-lĭ). A rancid olive oil, from Gallipoli, Italy, used in Turkey-red dyeing.

gal'li-pot (găl'Ĭ-pŏt), *n.* [Prob. *galley* + *pot*, as being brought in galleys.] A small earthen pot or vessel, esp. as used by druggists and apothecaries to hold medicines, etc.; hence, a nickname for a druggist or druggist's clerk.

gal'lo-fla'vin, gal'lo-fla'vine (-flā'vĭn; -vēn; 184), *n.* [*gallo-* + *flavin.*] A yellow dyestuff obtained as a paste by exposing gallic acid in alkaline solution to air. See DYE.

Gal'lo-ma'ni-a (-mā'nĭ-ă), *n.* [L. *Galli* Gauls + *mania* madness.] A strong prejudice in favor of what is French. — **Gal'lo-ma'ni-ac** (-ăk), **Gal'lo-man** (găl'ō-măn), *n.*

gal'lon (găl'ŭn), *n.* [OF. *galon, jalon*, LL. *galo, galona*, fr. *galum* a liquid measure; cf. F. *jale* large bowl.] **1.** A measure of capacity, containing four quarts; — used for the most part in liquid measure, but sometimes in dry measure. The standard gallon of the United States contains 231 cubic inches, or 8.3389 pounds avoirdupois of distilled water at its maximum density, and with the barometer at 30 inches. This is almost exactly equivalent to a cylinder of seven inches in diameter and six inches in height, and is the same as the old English **wine gallon**. It equals 3.7853 liters. The old **ale gallon** or **beer gallon** contained 282 cubic inches (4.62 liters). The English **imperial gallon** contains 10 pounds avoirdupois of distilled water at 62° of Fahrenheit, equal to 277.420 cubic inches or 4.5436 liters, which is almost exactly 1.2 United States gallons. For the gallon of Argentina and Peru, see MEASURE, *Table*. **2** A vessel for liquids; a pitcher. *Obs.*

gal-loon' (găl-lōōn'), *n.* [F. *galon*, fr. *galonner* to adorn with galloons.] A narrow tapelike binding or trimming; esp., a bordering or binding of rich material, as silk or gold lace. — **gal-looned'** (-lōōnd'), *a.*

gal'lop (găl'ŭp), *v. i.*; GAL'LOPED (-ŭpt); GAL'LOP-ING. [ME. *galopen*, F. *galoper*, OF. also *gualoper, waloper*; of G. or D. or Scand. origin, the first part being uncertain, and the second prob. akin to E. *leap*, G. *laufen*. Cf. WALLOP to move quickly.] **1.** To move or run in the mode called a gallop, as a horse; to go at, or as if at, a gallop.

Such superficial ideas he may collect in *galloping* over it *Locke.*

gallows, *or* **gal'low, tree** (găl'ō). The gallows.

gall'stone' (gôl'stōn'), *n.* A concretion, or calculus, formed in the gall bladder or biliary passages. See CALCULUS, *n.*, 1.

Gal'lus (găl'ŭs), *n.* [L., cock.] *Zool.* The genus of the pheasant family which consists of the barnyard fowl and its wild allies the jungle fowls (which see). It is distinguished by the vertically folded tail, which in the male has long drooping median feathers.

gall'–wind' (gôl'wĭnd'), *n.* A water gall.

gall'y (gŏl'Ĭ), *a.* Like gall; bitter as gall.

Ga'lois' field (of order p^n) (gȧ'lwȧ'). [See GALOISIAN.] *Math.* A field composed of the p^n classes of residues of an arbitrary integral function $F(\iota)$ to the modulus p (any prime) and $P(\iota)$, a rational integral function (of degree n) with integral coefficients not all divisible by p.

Galois group. *Math.* The group of substitutions among the n roots of an equation, $f(x) = 0$, corresponding to (or isomorphic with) the group of the Galois's domain $\Omega(p)$ of that equation.

Ga-loi'si-an (găl-wä'zĭ-ăn), *a.* Designating the French mathematician Evariste Galois (1811–32), or his work.

Galoisian corpus, *Math.*, a corpus $\Omega(a)$ that is identical with each of its conjugates, $\Omega(a_1)$, $\Omega(a_2)$, . . . $\Omega(a_{n-1})$; a normal corpus. See CONJUGATE.

Galois imaginaries. *Math.* Hypercomplex numbers introduced as solutions of congruences, such as $F(x) \equiv 0$ (mod. p), that are satisfied by no integral x, — $F(x)$ being irreducible to the prime p.

Galois resolvent. *Math.* That resolvent of an equation whose roots are unchanged by any permutation of the group of the equation.

Ga'lois's' cri-te'ri-on (gȧ'lwäz') (for the solution of an algebraic equation by radicals). *Math.* The fact that the factors of composition of its Galois group must all be primes.

Galois's domain (of an equation $f(x) = 0$). *Math.* The corpus or domain of rationality obtained by adjoining to any domain Ω all the n (supposed) distinct roots $(r_1, r_2, \ldots r_n)$ of $f(x) = 0$, so as to form the domain $\Omega(r_1, r_2, \ldots r_n)$.

gal'op (găl'ŭp; gă'l'ō; 277), *n.* [F.] *Music.* A kind of lively dance, in $\frac{2}{4}$ time; also, the music to the dance.

ga-lore' (gȧ-lōr', 201), *adv.* [Gael. *gu leòr* enough; *gu*, to, also an adverbial prefix + *leòr, leòir*, enough; or fr. Ir *goleor*, the same word.] *Chiefly Colloq.* In abundance; plentifully — *n.* Abundance; plenty.

ga-losh', **ga-loshe'** (gȧ-lŏsh'), *n.* [F. *galoche* galosh, perh. altered fr. LL. *calopedia, calopodium*, wooden shoe, or shoe with a wooden sole, Gr. καλοπόδιον, dim. of καλόπους, καλάπους, a shoemaker's last; κᾶλον wood + πούς foot.] **1.** A clog; a shoe with a heavy sole; hence, a boot or shoe of any sort. *Obs.* **2.** An overshoe worn in wet weather. *Rare in U. gal'thrope, gal'trop. † CAL-

Galtonian curve, a curve, resembling the curve of probability, representing graphically the deviation of any given characteristic from the norm of that characteristic in the species under consideration. — **G. theory,** *or* **Galton's law,** of inheritance (gôl'tŭnz), *Biol.*, the law or theory that the parents of an individual together contribute on an average 50 per cent of the total inherited characters, the four grandparents together 25 per cent, the third generation of ancestors together 12.5 per cent, etc. Cf. MENDEL'S LAW.

Galton whistle. *Acous.* A short pipe with a bulb attachment and scale, used to produce sounds of definite short wave length, as in determining the highest audible pitch.

gal-van'ic (găl-văn'ĭk), *a.* [After Luigi *Galvani*, professor of physiology at Bologna, on account of his connection (about 1780) with the discovery of dynamical or current electricity : cf. F. *galvanique.*] Of or pert. to, or exhibiting the phenomena of, galvanism, voltaic; hence, fig., affected or affecting as by an electric shock or stimulus

galvanic battery. = BATTERY, *n.*, 8 **a.** — **g circuit** *or* **circle.** = CIRCUIT, 8 **a.** — **g. couple.** = COUPLE, *n.*, 6. — **g. pile.** = VOLTAIC PILE

gal'va-nism (găl'vȧ-nĭz'm), *n.* [After *Galvani*: cf. F. *galvanisme.* See GALVANIC.] **1.** *Physics.* **a** Dynamical or current electricity, esp. as produced by chemical action. **b** The branch of physical science which treats of dynamical electricity, or the properties and effects of electrical currents. *Galvanism* and *galvanic* are now rarely used, for the latter, *voltaic* is commonly used.

2. *Med.* The use of the uninterrupted electric current for therapeutic purposes, as in treating nervous disorders.

gal'va-ni-za'tion (-nĭ-zā'shăn ; -nī-zā'shăn), *n.* Act or process of galvanizing; specif., *Med.*, application of an electric current to the human body. In **stabile galvanization** both electrodes are stationary ; in **labile galvanization** one electrode is fixed and the other is slid over the parts.

gal'va-nize (găl'vȧ-nīz), *v. t.* ; -NIZED (-nīzd) ; -NIZ'ING (-nīz'ĭng). [Cf. F. *galvaniser.*] **1.** To affect with galvanism, to subject to the action of electrical currents ; hence, to stimulate or excite as if by an electric shock.

2. To plate, as with gold, silver, etc., by means of an electric current ; by extension, to coat (iron) with zinc.

galvanized iron, iron coated with zinc to protect it from rust. The iron is sometimes first electroplated with tin, and afterward immersed in melted zinc, but ordinarily it is merely cleaned by friction with the aid of acid to remove scale, and then plunged at once into the zinc bath. Zinc is preferable to tin because, being electropositive with respect to iron, it acts as long as any zinc remains.

gal'va-no- (găl'vȧ-nō- ; găl-văn'ō-). Combining form for *galvanic, galvanism.*

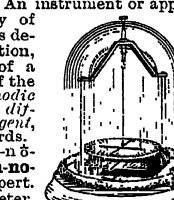
gal'va-no-caus'tic (-kôs'tĭk), *a.* [*galvano-* + *caustic.*] Relating to use of galvanic heat as a caustic, esp. in medicine.

gal'va-no-cau'ter-y (-kô'tẽr-ĭ), *n. Med.* Cautery effected by a wire heated by an electric current.

gal'va-no-graph' (găl'vȧ-nō-grăf', găl-văn'ō-), *n.* [*galvano-* + *-graph.*] *Engraving.* A copperplate produced by galvanography ; also, a picture printed from such a plate.

gal'va-nog'ra-phy (găl'vȧ-nŏg'rȧ-fĭ), *n.* [*galvano-* + *-graphy.*] **a** Electrotypy. **b** A method of producing by means of the electrotypic process (without etching) copperplates which can be printed from in the same manner as engraved plates ; — called also *electrography.* — **gal'va-no-graph'ic** (-grăf'ĭk), *a.*

gal'va-nom'e-ter (-nŏm'ĕ-tẽr), *n.* [*galvano-* + *-meter :* cf. F. *galvanomètre.*] *Elec.* An instrument or apparatus for measuring the intensity of an electric current, as well as detecting its presence or direction, usually by the deflection of a magnetic needle. Varieties of the galvanometer are the *aperiodic* or *dead-beat, astatic, ballistic, differential, marine, sine, tangent,* and *reflecting.* See these words.



Astatic Galvanometer.

gal'va-no-met'ric (gă l' v ȧ-n ŏ-mĕt'rĭk ; găl-văn'ō-), **gal'va-no-met'ri-cal-ly,** *adv.*

gal'va-nom'e-try (găl'vȧ-nŏm'ĕ-trĭ), *n.* Art or process of measuring the force of electric currents.

gal'va-no-plas'tics } (găl'vȧ-nō-plăs'tĭks ; -plăs'tĭ ; găl-
gal'va-no-plas'ty } văn'ō-), *n.* [See GALVANO- ; -PLASTIC, -PLASTY.] Electrometallurgy, esp. that branch of it known as electrotypy. — **gal'va-no-plas'tic** (-tĭk), **-plas'ti-cal** (-plăs'tĭ-kăl), *a.* — **gal'va-no-plas'ti-cal-ly** *adv.*

Galvanoscope : 1 Coil of Fine Wire ; 2 Dial.

gal'va-no-scope' (găl'vȧ-nō-skōp' ; găl-văn'ō-), *n.* [*galvano-* + *-scope.* cf. F. *galvanoscope*] *Elec.* An instrument or apparatus, as a magnetic needle, for detecting the presence and direction of electrical currents, esp. those of feeble intensity. — **gal'va-no-scop'ic** (-skŏp'ĭk), *a.* — **gal'va-nos'co-py** (găl'vȧ-nŏs'kō-pĭ), *n.*

gal'va-no-ther-mom'e-ter (găl'vȧ-nō-thẽr-mŏm'ĕ-tẽr ; găl-văn'ō-), *n.* [*galvano-* + *thermometer.*] **a** An instrument for measuring the heat developed by a current passing through a conductor. **b** = ELECTRIC THERMOMETER.

gam (găm), *n.* [Orig. uncert.] *Naut.* **a** A herd, or school, of whales. **b** A visit between whalers at sea ; a holding of social intercourse between those on different vessels at sea, or, *local U. S.*, between persons ashore.

gam-beer' (-bẽr'), *v. t. ;* -BEERED' (-bẽrd') ; -BEER'ING. [Cf. F. *gambier* a kind of hook.] *Fishing.* To gaff, as mackerel.

gam'be-son (găm'bĕ-sŏn), *n.* [OF. *gambeson, gambaison,* fr. *gambais, wambais,* of Ger. origin : cf. OHG *wamba* stomach See WOMB.] A medieval garment of cloth or leather, stuffed and quilted, orig. worn under the habergeon to prevent bruises, later as the principal defensive garment.

gam'bier (-bēr), *n.* [Malayan *gambîr*, name of the plant.] A yellowish catechu derived from a Malayan rubiaceous climbing shrub (*Ouroupara gambir*) , — called also *yellow,* or *cubical, catechu.* It is used for chewing with the betel nut, and is exported for tanning and dyeing.

gam'bit (găm'bĭt), *n.* [It. *gambitto* gambit, *gambetto* gambit, a tripping up, fr. *gamba* leg : cf. F. *gambit.* See GAMBOL, *n.*] A chess opening in which the first player voluntarily gives up a pawn or a piece, or several successively, for the sake of an advantage in position. See CHESS.

gam'ble (găm'b'l), *v. i. ;* GAM'BLED (-b'ld) ; GAM'BLING (-blĭng). [E. dial also *gammle*, prob. fr. ME. *gamenen* to amuse one's self, *gamen* game, amusement. See GAME sport.] **1.** To play or game for money or other stake, as at cards, dice, billiards, horseracing, cockfighting, etc. See GAME, *v. & n. ;* GAMBLING.

2. Hence : To stake money or any other thing of value upon an uncertain event ; to hazard something upon a chance ; to wager , as, to *gamble* in stocks or in wheat.

gam'ble, *v. t.* **1.** With *away :* To lose by gaming. *Rare.*

2. To stake or wager in gaming. *Rare.*

gam'ble, *n.* A gambling , a transaction involving gambling; hence, anything involving similar uncertainty. *Colloq.*

gam'bler (-blẽr), *n.* One who gambles ; specif. : **a** Formerly, a sharper or fraudulent gamester. **b** One who makes a practice of playing or following games of chance for the purpose of winning money or other property.

gam'bling (găm'blĭng), *n.* The action of one who gambles ; specif. : **a** Properly, the act of playing or gaming for stakes. **b** Loosely, the act of risking or staking anything on an uncertain event ; wagering. In the strict sense of the term *gambling* implies a playing or gaming, as at checkers, dice, cards, horseracing, cockfighting, or some other sport or contest, as well as a staking or risking of money to be lost or won on the issue. In this sense it does not include cases of mere wager or betting on the issue of an uncertain event, not involving any game or contest conducted in order that its event may determine the result of the wager, as lotteries, bets upon elections, and other forms of wagering contracts, etc. Modern legislation makes illegal many forms of pure wagering contracts, less properly called **gambling contracts,** as injurious to the public morals. See WAGERING CONTRACT.

gambling device A device used in gambling ; — interpreted sometimes to include anything actually used for the purpose, at others only such as are adopted, designed, and used for the purpose by professional gamblers.

gambling house. A house where gambling is carried on or allowed as a business ; a place kept as a gambling resort.

gambling table. A table for gambling purposes ; also, loosely, the gambling resort where it is kept. — sometimes interpreted as meaning any table specially used for gambling, sometimes as only one specially designed for, and necessary to, the playing of the game, or one kept and exhibited in order to obtain betters.

gam-boge' (găm-bōj' , -bōōj' ; 277), *n.* [From *Cambodia.*] An orange-red gum resin becoming bright yellow when powdered. It is derived from various species of *Garcinia*, the best quality (obtained from *G. hanburii*) being exported from Cambodia, Siam. It is used by artists as a yellow pigment, also in medicine as a strong emetic and cathartic. — **gam-bo'gi-an** (-bō'jĭ-ăn ; -bōō'jĭ-ăn), *a.*

gam'boised (găm'boĭzd), *p. a.* [OF. *gamboisé.*] Quilted or padded like a gambeson.

gam'bol (găm'bŏl), *n.* [Earlier *gambolde, gambalde,* F. *gambade* gambol, fr. It. *gambata* kick, fr. *gamba* leg, akin to F. *jambe,* OF. also *gambe,* fr. L. *gamba* hoof, or perh. joint : prob. of Celtic origin ; cf. W., Ir., & Gael. *cam* crooked, but also Gr. *καμπή* a bending, winding. Cf. JAMB, *n.*, GAMMON ham, 3d GAMBADO.] A skipping or leaping about in frolic ; a hop ; a sportive prank.

gam'bol, *v. i. ;* -BOLED (-bŏld) or -BOLLED ; -BOL-ING or -BOL-LING. To bound or spring as in dancing or play , to skip about in sport, as lambs or children ; to frisk.

gam'brel (găm'brĕl), *n.* [OF. *gamberel* (in sense 2), dim. in dial. form fr. F. *jambier* in same sense ; fr. OF. *gambe, jambe,* leg, F. *jambe.* Cf. CAMBREL, CHAMBREL ; see GAMBOL, *n.*] **1.** The hock of an animal, esp. of a horse.

4. A contest, physical or mental, conducted according to set rules, and undertaken for amusement or recreation, or for winning a stake. **Games of chance** include all games in which chance is the sole or a considerable factor in determining the outcome, as in dice and in most card games. Most *gambling games* are of this description. **Games of skill** include those in which skill is the sole or chief factor, as in chess, whist, draughts, billiards. **Athletic games** include all contests having in view the development or exercise of muscular strength and skill, or agility, as baseball, football, tennis, the field and water sports, etc. Cf. SPORT. The public contests of the ancients (Gr. *ἀγῶνες*, L. *ludi*), which included dramatic and gladiatorial shows as well as athletic contests, are commonly called *games* in English. See AGONES.

But war 's a *game,* which, were their subjects wise,
Kings would not play at. *Cowper.*

5. Hence, in the terminology of games : **a** A single contest lasting until a (certain) definite limit is reached, as a set time, a certain number of innings, a given result, or the like ; a single match at play ; as, a *game* at cards.

Talk the *game* o'er between the deals. *Lloyd*

b That which is gained as the result of a game ; the number of points necessary to be scored in order to win a game , as, in short whist five points are *game.* **c** A prize to be gained by contest. *Obs.* **d** *Card Playing.* (1) In some games, as seven-up, a point or points credited on the score to the player whose cards count up the highest. (2) In pedro, cinch, etc., the ten-spot of trumps, which counts a point to the one securing it in play. **e** *Sports.* The state of the contest as shown by the points gained at any time ; as, the baseball players stopped play when the *game* was four to three.

6. A scheme or art employed in the pursuit of an object or purpose ; method of procedure , projected line of operations ; plan ; project , — often in the phrase *the* (*his,* etc.) *game is up,* the (or his) project or scheme has failed.

Your murderous *game* is nearly up. *Blackw. Mag*

7. Sport in the hunting field. *Obs.*

8. An animal or animals under pursuit or taken in hunting , quarry ; in a collective sense, the various animals (chiefly birds and mammals) which are considered worthy of pursuit by sportsmen. Cf. GAME FISH. The term implies that a certain amount of skill is required in their capture, and usually (in the case of birds nearly always) that they are of value as food. Among birds the order

Ga-noi'de-i (gā-noi'dē-ī), *n. pl.* [NL. See GANOID.] *Zool.* A subclass of fishes containing numerous extinct and a few living forms, — so named from the hard enameled scales (often rhomboidal in outline) characteristic of many of its members. The living members are the sturgeons and paddlefishes; the bichir and its allies (*Polypterus*, *Erpetoichthys*); the gar pikes (*Lepisosteus*); and the bowfin. In the Paleozoic and earlier part of the Mesozoic they were abundant and represented by a great variety of forms. The existing kinds, at least, have a conus arteriosus, a spiral valve in the intestine, and an optic chiasma. As now restricted, the group contains the orders Crossopterygii, Chondrostei, and Holostei, but as originally constituted by Agassiz it (then ranking as an order) was much more inclusive, containing the siluroids, lophobranchs, and some other teleosts. Many modern zoölogists no longer recognize it, making its several orders constitute with the Teleostei the subclass Teleostomi.

ga-no'sis (gā-nō'sĭs), *n.* [NL, fr. Gr. γάνωσις brightening.] *Sculpture* A process of toning down the glare of marble, esp. on nude parts, as practiced in classical antiquity.

gas. Obs. pres. indic. 2d and 3d person sing. of GO.

Gas (găs), *n.* [Invented by the chemist Van Helmont of Brussels (d. 1644); applied by him to a supposed vapor produced from water by cold. This form was suggested to him by L. *chaos,* Gr. χάος, chaos.] **1.** An aëriform fluid, having neither independent shape nor volume, but tending to expand indefinitely. See *kinetic theory of gases,* under KINETIC. The term was used at first by chemists as synonymous with *air,* but afterwards applied to all fluids that could not be liquefied by pressure at any attainable temperature, as oxygen, hydrogen, etc., in distinction from vapor, as steam, which becomes liquid on a reduction of temperature. But in present usage, since all of the gases formerly called "permanent" have been liquefied by cold and pressure, any distinction made between gases and vapors is recognized to be one of degree only. See LIQUID.

In many books of recent years, it has been the custom, following a suggestion of Andrews, to restrict the term "*gas*" to temperatures above the critical temperature, and the term "vapor" to temperatures below. But this is often inconvenient in practice, as there is no sudden change in the gaseous phase at ordinary pressures on passing the critical temperature. It is more convenient to employ the term "vapor" only when discussing the properties of the gaseous phase in relation to the liquid or solid, and to follow the common usage in describing substances like CO_2, or even SO_2 and NH_3, as *gases* at ordinary temperatures and pressures. *Encyc. Brit.*

2. In popular usage, any gas, or gaseous mixture, with the exception of atmospheric air; specif.: **a** Laughing gas. **b** Any combustible gaseous mixture used for illuminating or as a fuel; — called, according to its source, **natural gas, coal gas, water gas,** etc.

gas disease. A disease of fish, caused by an excess of dissolved gas in the water and characterized by the formation of gas blebs in the tissues, and free gas in the blood vessels and about the eyes, causing the eyeballs to bulge and assume the appearance termed *popeye.*

gas'e-lier' (găs'ē-lēr'), *n.* [Formed from *gas,* in imitation of chandelier.] A chandelier arranged to burn gas.

gas engine. *Mach.* A kind of internal-combustion engine (which see) using fixed gas; also, broadly, any internal-combustion engine.

gas'e-ous (găs'ē-ŭs; 277), *a.* [From GAS.] **1.** In the form, or of the nature, of gas; pertaining to gases; as, *gaseous* matter, *gaseous* laws; also, superheated, as steam.

2. Lacking substance or solidity; tenuous. "Unconnected, *gaseous* information." *Sir J. Stephen.*

gaseous spectrum. See SPECTRUM.

gas field. A tract or district yielding natural gas.

gas'-fired' (găs'fīrd'), *a.* Heated by the combustion of gaseous fuel; as, a *gas-fired* furnace. — **gas'-fir'ing,** *a.*

gas fitter. A workman who installs or repairs gas pipes and fixtures.

gas fitting. a The trade or occupation of a gas fitter. **b** *pl.* The piping, elbows, meters, etc., for conveying gas from the main to the gas fixtures, etc. 160 *Pa.* 303.

gas fixture. A device for conveying illuminating or combustible gas from the pipe to the gas burner, consisting of an appendage of metal, usually ornamented, with tubes upon which the burners, keys, etc., are adjusted. Cf. GAS FITTING.

gas furnace. A furnace using gas for fuel, or one for making gas.

gas generator. An apparatus for generating gas; as: **a** A retort in which volatile hydrocarbons are evolved by heat. **b** A carburetor. **c** A machine for the production of carbonic acid gas, for aërating water, bread, etc.

gash (găsh), *v. t.;* GASHED (găsht); GASH'ING. [For older *garsh* or *garse,* OF. *garser* to scarify, F. *gercer* to chap, of uncertain origin.] To make a long, deep incision in; — applied chiefly to incisions in flesh.

Grievously *gashed* or gored to death. *Hayward.*

gash, *n.* [ME. *garce, garse.* See GASH, *v.*] **1.** A deep and long cut; an incision of considerable length and depth, particularly in flesh.

2. Act of gashing.

gash vein. *Mining.* A vein resulting from the enlargement of a joint or shrinkage crack and not extending beyond the stratum in which it occurs.

gas'i-fi-ca'tion (găs'ĭ-fĭ-kā'shŭn), *n.* [See GASIFY.] Act or process of converting into gas.

gas'i-form (găs'ĭ-fôrm), *a.* In the form of gas; gaseous.

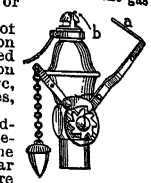
gas'i-fy (-fī), *v. t.;* GAS'I-FIED (-fīd); GAS'I-FY'ING (-fī'ĭng). [*gas* + *-fy.*] To convert into gas or aëriform fluid, as by means of heat or a chemical process. — *v. i.* To become gas.

gas jet. A flame of illuminating gas; also, a gas burner.

gas'ket (găs'kĕt; -kĭt; 151), *n.* [Cf. F. *garcette,* It. *gascheta,* Sp. *cajeta* caburn, *garceta* reef point.] **1.** *Naut.* A line or band used to lash a furled sail securely. Sea **gaskets** are common lines; **harbor gaskets** are plaited or decorated lines or bands.

2. *Mech.* Plaited hemp or tallowed rope for packing pistons, making pipe joints, etc.; hence, metal packing or any composition for the same purpose.

gas'ket, *v. t.;* GAS'KET-ED; GAS'KET-ING. *Naut.* To fasten with a gasket or gaskets.



Electric Gas Burner. A pull on the chain turns on the gas (by means of the ratchet) and ignites it by a spark produced by bringing *a* close to *b*, *a* & *b* being connected with opposite poles of a battery.

gas'e-lier'. Var. of GASELIER.

Ga-san' (gu-sän'), *a.* = GATHIC. See AVESTA.

gash'es (gäsh'ĕz; -ĭz), *n.* Hairy cirrus clouds which precede tropical hurricanes. *Rare.*

gash'ful, *a.* [Perh. for *ghastful,* confused with *gash.*] Ghastly, frightful. *Obs or Dial. Eng.*

gash'ly, *a. Obs. or Dial.* Ghastly; dismal. — **gash'li-ness,** *n.*

gash'ly, *adv.* of GASH. *Scot.*

Gash'mu (gäsh'mū). *Bib.*

gasht. Gashed. · *Ref. Sp.*

gash'y, *a.* Like, or having, a gash or gashes. *R.* [See -ABLE.

gas'i-fi'a-ble (găs'ĭ-fī'ă-b'l), *a.*

gas'i-fi'er, *n.* One that gasifies.

gas'kin (găs'kĭn), *n.* [Cf. GALLIGASKIN.] **1.** *pl.* Galligaskins; gaiters. *Obs. or Dial. Eng.*
2. That part of the hind leg of a horse or other quadruped between the stifle and the hock.
gas'light' (-līt'), *n.* **1.** The light yielded by the combustion of illuminating gas.
2. A gas jet or gas burner.
— gas'light'ed, *a.* **— gas'light'ing,** *n.*
gas lime. Lime that has been used in purifying illuminating gas, and hence contains large amounts of carbonate, sulphide, etc. It is used as a soil dressing.
gas liquor. A liquid obtained in the manufacture of illuminating gas from coal and valued as a source of ammonia. It is an aqueous solution of ammonia in the form of carbonate, sulphide, and chloride, with a little of other salts and tarry matters. The water comes partly from distillation of the coal and partly from the scrubbers or washers.
gas machine. An apparatus for carbureting air for use as illuminating gas.
gas'man (găs'măn), *n.*; *pl.* **-MEN** (-mĕn). **1.** A man connected with the manufacture, installation, or distribution of gas; a gas fitter.
2. *Coal Mining.* A man who examines the mine for fire damp in dangerous quantities. *U. S.*
gas meter. An instrument for recording the quantity of gas consumed at a particular place. See METER, *n.*, 2.
gas microscope. An oxyhydrogen microscope.
gas'o-e-lec'tric (găs'ō-ē-lĕk'trĭk), *a. Mach.* Designating, or pertaining to, a system of automobile propulsion in which both a gasoline engine and an electric motor are used. Cf. AUTOMIXTE SYSTEM.
gas oil. One of the fractions obtained by distilling petroleum, having a specific gravity of about 0.865 and used in the manufacture of illuminating gas.
gasoline, *or* **gasolene, engine** *Mach.* A kind of internal-combustion engine; — in British countries called usually petrol engine.
gas'o-line (găs'ō-lēn; -lĭn; 277), **gas'o-lene** (-lēn), *n.* [*gas* + 2d *-ol* + *-ine.*] A volatile inflammable liquid used as a solvent for oils, fats, etc., as a carburetant, and to produce heat and motive power. See PETROLEUM; cf. PETROL.
gas-om'e-ter (găs-ŏm'ē-tĕr), *n.* [*gas* + *-meter.* Cf. F. *gazomètre.*] **1.** An apparatus for holding and measuring gas; a gas burette.
2. Less properly, but commonly, a tank for collecting and holding gas; in gas works, a huge iron cylinder or reservoir closed at one end and having the other end immersed in water, in which it is made to rise or fall according to the volume of gas it contains or the pressure required.
gas-om'e-try (-trĭ), *n.* Science or art of measuring gas.
— gas'o-met'ric (găs'ō-mĕt'rĭk), **-met'ri-cal** (-rĭ-kăl), *a.*
gas'o-scope (găs'ō-skōp), *n.* [*gas* + *-scope.*] An apparatus for detecting the presence of dangerous gas escaping into a coal mine or a dwelling house.
gasp (găsp), *v. i.*; GASPED (găspt); GASP'ING. [ME. *gaspen, gaspen*, to yawn, gasp, Icel. *geispa* to yawn, for *geipsa;* akin to Sw. *gäspa*, Dan. *gispe* to gasp; cf. D. *gijpen*, AS. *gīpung* a gaping.] **1.** To catch the breath convulsively, or in laborious respiration, with wide open mouth; to labor for breath; to respire convulsively; to pant violently.

She *gasps* and struggles hard for life *Lloyd.*

2. To pant with eagerness; to show vehement desire.

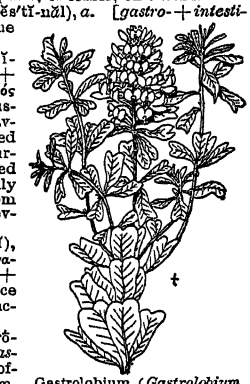
Quenching the *gasping* furrows' thirst with rain. *Spenser.*

gasp, *v. t.* To emit or utter with gasps; — with *forth, out, away,* etc.; as, he *gasped* out a plea for mercy.

And with short sobs he *gasps* away his breath *Dryden.*

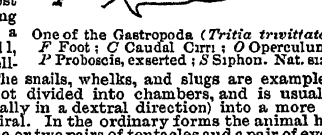
gasp, *n.* Act of opening the mouth convulsively to catch the breath; a labored respiration or catching of the breath.
gas plate. *Ordnance.* In the Krupp breech mechanism, a steel plate resting in a recess in the face of the breech block and supporting the obturator ring.
Gas-se'ri-an (gă-sē'rĭ-ăn), *a.* Of or relating to the early German physician Gasser (L. *Gasserius*).
Gasserian ganglion, *Anat.*, a large ganglion on the chief or sensory root of the trifacial or fifth cranial nerve.
gas'sing (găs'ĭng), *n.* **1.** Act or process of subjecting to the action of gas, as lime to chlorine gas in making bleaching powder, or cotton yarn or cloth to minute gas jets to singe off small protruding fibers; also, the poisoning of persons exposed to noxious gases or fumes.
2. The fizzing or bubbling of the acid in a storage battery.
3. Boasting; insincere or empty talk. *Slang.*

Gas'siot's' wheel (gă'syōz'). *Physics.* A device for the rotation of a Geissler tube about an axis at right angles to the axis of the tube. If such a tube be excited by a rapidly interrupted current, when at rest it appears, by persistence of vision, to be continuously illuminated; when it is rotated the intermittent character of the discharge becomes evident and the appearance is that of a wheel with luminous spokes.
gas spectrum. **a** The spectrum, consisting of bright lines or bands, obtained by dispersing the light from a glowing gas or vapor. **b** An absorption spectrum obtained by passing light through a gas or a vapor.
gas spurts. *Geol.* Little heaps observed on the surface of certain strata containing organic matter; — so called because believed to be due to the escape of gas.
gas'sy (găs'ĭ), *a.*; GAS'SI-ER (-ĭ-ẽr); GAS'SI-EST. Full of gas; like gas; hence, *Colloq.*, inflated; full of boastful or insincere talk, as, a *gassy* demagogue.
gas tar. Coal tar obtained as a by-product in the manufacture of illuminating gas.
gas'ter-o- (găs'tẽr-ō-), **gas'ter-.** *Biol.* Combining forms equivalent to *gastro-, gastr-.*
Gas'ter-o-my-ce'tes (-mī-sē'tēz), *n. pl.* [NL.; *gastero-* + *-mycetes.*] *Bot.* A group of basidiomycetous fungi in which the spores are borne in a peridium, as in the puffballs, stinkhorns, etc. This name is now often abandoned, the orders of the group being included with others in the subclass Autobasidiomycetes. **— gas'ter-o-my-ce'tous** (-tŭs), *a.*
gas thread. *Mech.* A special kind of thread, much finer in pitch than the ordinary standard threads, used esp. on wrought iron tubes for conveying gas. Gas threads usually run from 28 threads per inch in a pipe ⅛ inch in diameter to 11 threads per inch in a 2-inch pipe.
gas'-tight' (găs'tīt'), *a.* Impervious to gas.
gas-træ'a (găs-trē'ȧ), *n.* [NL., fr. Gr. *γαστηρ, γαστρός,* the stomach.] *Biol.* A hypothetical animal having the structure of a gastrula of the type formed by invagination. According to a theory of Haeckel, called the **gastræa theory,** such an animal was a common ancestor of the Metazoa.
gas-tral'gi-a (găs-trăl'jĭ-ȧ), *n.* [NL., *gastro-* + *-algia.*] Pain in the stomach or epigastrium, esp. of a neuralgic type.
gas-tral'gic (-jĭk), *a. Med.* Pert. to, or affected with, gastralgia. **—** *n.* A person subject to attacks of gastralgia.
gas-treo'to-my (găs-trē'ŏt-mĭ), *n.* [*gastro-* + *-ectomy.*] *Surg.* Excision of a portion of the stomach.
gas'tric (găs'trĭk), *a.* [Gr. *γαστήρ, γαστρός,* stomach.] Of, pertaining to, or situated near, the stomach.
gastric artery. *Anat.* **a** A branch of the cœliac artery which passes to the cardiac end of the stomach and along the lesser curvature. **b** Any of several small branches of the splenic artery distributed to the greater curvature of the stomach. **— g. crisis,** *Med.*, a sudden attack of gastric pain with vomiting, a frequent symptom of locomotor ataxia. **— g. digestion,** *Physiol.*, the conversion of the albuminous portion of food in the stomach into soluble and diffusible products by the solvent action of gastric juice. **— g. fever,** *Med.*, a fever attended with prominent gastric symptoms; typhoid fever. **— g. glands,** *Anat.*, the glands in the walls of the stomach which secrete the gastric juice. In the human stomach they occupy the whole thickness of the mucosa, but do not extend beyond it, and are of two kinds, *cardiac glands* and *pyloric glands* (see these terms). **— g. juice,** *Physiol.*, the digestive fluid secreted by the glands in the mucous membrane of the stomach. It is a thin watery fluid with an acid reaction, due to the presence of hydrochloric acid to the extent of 0.2 to 0.3 per cent or more, and contains several enzymes, esp. pepsin and rennin. It has a strong digestive action on proteids and gelatin-forming substances, and curdles milk. **— g. mill,** *Zoöl.*, a grinding apparatus consisting of several movable calcareous or chitinous pieces in the pharynx or stomach of certain invertebrates.
gas-tri'tis (găs-trī'tĭs), *n.* [NL.; *gastro-* + *-itis.*] *Med.* Inflammation of the stomach, esp. of its mucous membrane.
gas'tro- (găs'trō-), **gastr-.** A combining form from Greek *γαστήρ, γαστρός, the stomach, or belly.*
gas'tro-cele (găs'trō-sēl), *n.* [*gastro-* + *-cele.*] *Med.* Hernia of the stomach.
gas'troc-ne'mi-us (găs'trŏk-nē'mĭ-ŭs), *n.*, *pl.* **-MII** (-mĭ-ī). [NL., fr. Gr. *γαστροκνημία* the calf of the leg.] *Anat.* The largest and most superficial muscle of the calf of the leg. It arises by two heads from the lower condyles of the femur, and its tendon of insertion unites with that of the soleus to form the Achilles tendon (which see). **— gas'troc-ne'mi-al** (-ăl), *a.* **— gas'troc-ne'mi-an** (-ăn), *a.*
gas'tro-du'o-de'nal (găs'trō-dū'ō-dē'năl), *a* [*gastro-* + *duodenal.*] *Anat.* Pert. to the stomach and duodenum.
gas'tro-du'o-de-ni'tis (găs'trō-dū'ō-dē-nī'tĭs), *n.* [NL. See GASTRODUODENAL; -ITIS.] *Med.* Inflammation of the stomach and duodenum, a frequent cause of jaundice.
gas'tro-el'y-trot'o-my (-ĕl'ĭ-trŏt'ō-mĭ), *n.* [*gastro-* + *elytro-* + *-tomy.*] *Surg.* The operation of cutting into the upper part of the vagina, through the abdomen (without opening the peritoneum), to remove a fetus. It is a substitute for the Cæsarean operation, and less dangerous.
gas'tro-en-ter'ic (-ĕn'tẽr'ĭk), *a.* [*gastro-* + *enteric.*] *Anat. & Med.* Gastrointestinal.
gas'tro-en'ter-i'tis (-ĕn'tẽr-ī'tĭs), *n.* [NL. See GASTROENTERIC; -ITIS.] *Med.* Inflammation of the lining membrane of the stomach and the intestines.
gas'tro-en'ter-os'to-my (-ŏs'tŏ-mĭ), *n.* [*gastro-* + *entero-* + *-stomy.*] *Surg.* The formation of an opening between the stomach and the upper portion of the small intestine.
gas'tro-ep'i-plo'ic (-ĕp'ĭ-plō'ĭk), *a.* [*gastro-* + *epiploic.*] *Anat.* Of or pertaining to the stomach and great omentum.
gas'tro-he-pat'ic (-hē-păt'ĭk), *a.* [*gastro-* + *hepatic.*] *Anat. & Med.* Pertaining to the stomach and liver; hepatogastric; as, the *gastrohepatic,* or lesser, omentum.
gas'tro-in-tes'ti-nal (-ĭn-tĕs'tĭ-năl), *a.* [*gastro-* + *intestinal.*] Of or pertaining to the stomach and intestines.
Gas'tro-lo'bi-um (-lō'bĭ-ŭm), *n.* [NL.; *gastro-* + Gr. λόβιον, dim. of λοβός pod.] *Bot.* A genus of Australian fabaceous shrubs having opposite or whorled leaves, showy yellow or purple flowers, and 2-seeded pods. They are commonly called **poison bushes,** from their effect on cattle. Several are cultivated.



Gastrolobium (*Gastrolobium bilobum*)

gas'tro-ma-la'ci-a (găs'trō-mȧ-lā'shĭ-ȧ), *n.* [NL.; *gastro-* + *malacia.*] *Med.* A softening, usually post mortem, of the coats of the stomach.
gas'tro-nome (găs'trō-nōm) } *n.* [F. *gastronome,* fr.
gas-tron'o-mer (găs-trŏn'ō-mẽr) } *gastronomie.* See GASTRONOMY.] One fond of good living; an epicure.
gas'tro-nom'ic (găs'trō-nŏm'ĭk) } *a.* [Cf. F. *gastronomique.*]
gas'tro-nom'i-cal (-nŏm'ĭ-kăl) } Pertaining to gastronomy. **— gas'tro-nom'i-cal-ly,** *adv.*
gas-tron'o-mist (găs-trŏn'ō-mĭst), *n.* A gastronomer.
gas-tron'o-my (-mĭ), *n.* [Gr. *γαστρονομία; γαστήρ, γαστρός,* stomach + *νόμος* law; cf. F. *gastronomie.*] The art or science of good eating; epicurism.
gas'tro-pa-ri'e-tal (-pă-rī'ē-tăl), *a.* [*gastro-* + *parietal.*] *Zoöl.* Connecting the stomach and body wall.
gas'tro-pod (găs'trō-pŏd), *a.* Also **gas'ter-o-pod** (-tẽr-ō-pŏd). *Zool* Of or pertaining to the Gastropoda. **—** *n.* One of the Gastropoda.
Gas-trop'o-da (găs-trŏp'ō-dȧ), *n. pl.* **Also Gas'ter-op'o-da** (găs'tẽr-ŏp'ō-dȧ). [NL.; *gastro-* + *-poda.*] *Zoöl.* A large and varied class of mollusks comprising most of the existing forms having a univalve shell, and many shell-less forms. The snails, whelks, and slugs are examples. The shell is not divided into chambers, and is usually twisted (generally in a dextral direction) into a more or less conical spiral. In the ordinary forms the animal has a head with one or two pairs of tentacles and a pair of eyes, which are often borne on the tentacles. Within the mouth



One of the Gastropoda (*Tritia trivittata*). *F* Foot; *C* Caudal Cirri; *O* Operculum; *P* Proboscis, exserted; *S* Siphon. Nat. size.

gas'tro-pneu-mat'ic, g a s'tro-pneu-mon'ic, *a.* [*gastro-* + *pneumatic, pneumonic.*] Gastropulmonary.

(which may be at the end of a proboscis) is usually a flexible band, the *radula*, bearing fine teeth. It is moved back and forth over a pulleylike odontophore, and serves to rasp off and draw in particles of food. The ventral surface of the body, or a part of it, forms a muscular disk, or *foot*, on which the animal creeps about, carrying its shell upon its back. Some (see PTEROPODA) have winglike lobes to the foot, used in swimming. Most of the terrestrial and many fresh-water forms breathe by a lunglike sac, the marine forms usually by one or more gills (see CTENIDIUM). Gastropods are oviparous, rarely ovoviviparous, and the embryo in typical cases passes through trochosphere and veliger stages. They are found fossil from the Cambrian onward. The class is now usually divided into the subclasses Streptoneura and Euthyneura, the Amphineura and Scaphopoda, formerly included, being made separate classes. — **gas-trop'o-dous** (găs-trŏp'ō-dŭs), *a.*

gas'tro-pore (găs'trō-pōr; 201), *n.* [*gastro-* + *pore.*] *Zoöl.* A pore occupied by a gastrozooid in a hydroid coral. It is larger than that occupied by a dactylozooid.

gas'trop-to'sis (găs'trŏp-tō'sĭs), *n.* [NL., *gastro-* + *ptosis.*] *Med.* Prolapse of the stomach into the lower abdomen.

gas-tror'rha-phy (găs-trôr'ä-fĭ), *n.* [Gr. γαστρορραφία; γαστήρ, γαστρός, stomach + ῥαφή a sewing.] *Surg.* The operation of sewing up wounds of the stomach or abdomen.

gas'tro-scope (găs'trō-skōp), *n.* [*gastro-* + *-scope.*] *Med.* An instrument for viewing or examining the interior of the stomach. — **gas'tro-scop'ic** (-skŏp'ĭk), *a.* — **gas-tros'co-py** (găs-trŏs'kŏ-pĭ), *n.*

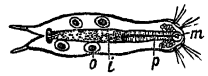
gas'tro-splen'ic (găs'trō-splĕn'ĭk), *a.* [*gastro-* + *splenic.*] *Anat.* Pertaining to the stomach and spleen.

gas'tro-stege (găs'trō-stēj), *n.* [*gastro-* + Gr. στέγη roof.] *Zoöl.* One of the large scales on the belly of most snakes. — **gas-tros'te-gal** (găs-trŏs'tē-găl), *a.*

gas-tros'to-my (găs-trŏs'tŏ-mĭ), *n.* [*gastro-* + *-stomy.*] *Surg.* The operation of making a permanent opening into the stomach, for the introduction of food.

gas-trot'o-my (găs-trŏt'ō-mĭ), *n.* [*gastro-* + *-tomy:* cf. F. *gastrotomie.*] *Surg.* A cutting into, or opening of, the abdomen or the stomach.

Gas-trot'ri-cha (-rĭ-kä), *n. pl.* [NL.; *gastro-* + Gr. θρίξ, τριχός, hair.] *Zoöl.* A small group of minute fresh-water multicellular animals superficially resembling infusorians, having cilia on the ventral side. They are generally regarded as a class related to the rotifers.



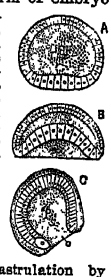
One of the Gastrotricha (*Ichthydium*). Much enlarged. *m* Mouth, *p* Pharynx, *i* Intestine; *o* Eggs.

gas'tro-vas'cu-lar (găs'trō-văs'kū-lär), *a.* [*gastro-* + *vascular.*] *Zool.* Functioning both as digestive and circulatory organs; as, the *gastrovascular* canals of coelenterates.

gas'trox-yn'sis (găs'trŏk-sĭn'sĭs), *n.* [NL.; *gastro-* + Gr. ὀξύνειν to make acid.] *Med.* Nervous dyspepsia attended by excessive acidity of the gastric juice.

gas'tro-zo'oid (găs'trō-zō'oid), *n.* [*gastro-* + *zooid.*] *Zoöl.* A zooid provided with a mouth and digestive organs.

gas'tru-la (găs'trōō-lä), *n.*; *pl.* **-LÆ** (-lē). [NL., dim. fr. Gr. γαστήρ the stomach.] *Embryol.* A form of embryo consisting typically of a cup or open-mouthed sac with walls composed of two layers of cells, an outer (epiblast) and an inner (hypoblast). The mouth is called the *blastopore*, and the interior cavity the *archenteron*. A recognizable, though often greatly modified, gastrula stage occurs in the early development of at least a very large proportion of the Metazoa, or multicellular animals. In typical cases it follows the one-layered, hollow blastula stage from which it is derived by invagination of a part of the wall to form the hypoblast, but if the cells of this part are very large and greatly distended with yolk, the process is modified so that the other part (epiblast) grows around and incloses them. This is called **epiboly**, or **epibolic invagination**. A gastrula may also be produced by *delamination* (which see). Cf. GASTRÆA. — **gas'tru-lar** (-lär), *a.*



Gastrulation by Invagination. *A* Blastula of Amphioxus; *d* The Segmentation Cavity; *B* Invagination of the Blastula; *C* Gastrula. Invagination completed; the outer layer of cells is the Epiblast, the inner layer the Hypoblast, *o* Blastopore; *p* Archenteron [Cuts after those of B Hatschek.]

gas'tru-la'tion (-lā'shŭn), *n. Embryol.* The process of forming a gastrula.

gas washer. *Gas Manuf.* An apparatus within which gas from the condenser is brought in contact with falling water, to precipitate the tar remaining in it.

OF. *gauge* gauge, measuring rod, F. *jauge;* of uncertain origin; cf. also F. *jalon* a measuring stake in surveying, and E. *gallon.*] **1.** To find the exact measurement of, as of rainfall.
2. To measure or ascertain the amount of contents of or the capacity of, as of a pipe, barrel, or keg.
3. To measure the capacity, character, or ability of; to estimate; to judge of.

You shall not *gauge* me
By what we do to-night. *Shak.*

4. To measure or limit by or as by a gauge, esp. so as to conform to a standard; to measure off or set out; as, to *gauge* a wire, a line, etc.
5. To render (bricks or stones) of a uniform size by cutting or rubbing.
6. *Plastering.* To mix (plaster) in certain definite proportions, as for quick drying; also, to mix plaster of Paris with (mortar) to make it set quicker: — so called because the plaster is added in definite and fixed proportions.
7. To draw into equidistant gathers by running a thread through it, as cloth or a garment.

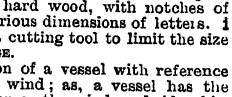
gauge, gage (gāj), *n.* [OF. *gauge*. See GAUGE, *v.*] **1.** A measure, a standard measure of dimensions, distance, or capacity, a standard. See WIRE GAUGE.

There is not in our hands any fixed *gauge* of minds. *I. Taylor.*

2. Measure; dimensions; extent.

The *gauge* and dimensions of misery. *Burke.*

3. Any of various instruments or apparatus used for gauging or measuring, as: **a** A gauging rod. *Obs.* **b** An instrument for measuring the state of, or recording facts about, a phenomenon; as, a rain *gauge*, a wind *gauge*, etc. **c** A device for indicating the height of water in a boiler; a water gauge. **d** An instrument for registering gaseous pressure; as, a steam *gauge* for a boiler. **e** Any of various instruments for measuring or templating work to be wrought to a given form or dimensions, as, a button maker's *gauge*. Gauges for interchangeable mechanical work are made in pairs, one gauge being a minute fraction of an inch over the desired size and the other the same amount under size. The work must be an easy fit with the one gauge and must not fit at all with the other. Such gauges are known as **inside** and **outside**, or **low** and **high, gauges.** **f** A carpenter's tool for scribing a line parallel to the edge of a piece of work, — called in full *marking gauge*. Cf. MORTISE GAUGE. **g** *Print.* A strip, as of wood or metal, for use in determining exact space, as length of pages or width of margin. **h** *Type Founding.* A strip of steel or other metal, or of hard wood, with notches of proper size for regulating various dimensions of letters. **i** A checking device fixed to a cutting tool to limit the size of the cut. Cf. BORING GAUGE.



Gauge, 3 *f*

4 *Naut.* **a** Relative position of a vessel with reference to another vessel and the wind; as, a vessel has the **weather gauge** of another when on the windward side of it, and the **lee gauge** when on the lee side of it. **b** The depth to which a vessel sinks in the water when fully loaded.
5. **a** The distance between the rails of a railroad or railway. **Standard gauge** in most countries is now 4 feet 8½ inches; **broad** or **wide gauge** is any larger gauge than this, and **narrow gauge** is any smaller gauge. **b** The distance between the wheels of a vehicle.
6. *Building.* That part of a shingle, slate, or tile, exposed to the weather when laid; also, one course as laid.
7. *Plastering.* **a** The quantity of plaster of Paris used with common plaster to accelerate its setting. **b** Gauge stuff.
8. *Astron.* = STAR GAUGE.

gauge, *or* **gage, cock.** *Steam Boilers.* Either of two cocks placed one above and the other below the water line, to ascertain the water level.

gauge, *or* **gage, concussion.** *Railroads.* The jar caused by a car-wheel flange striking the edge of the rail

gauged, gaged (gājd), *p. a.* Tested or measured by, or conformed to, a gauge.

gauge, *or* **gage, glass** *Steam Boilers.* The glass indicating tube of a water gauge.

gauge, *or* **gage, knife.** A knife with a gauge to limit the cut.

gauge, *or* **gage, lath** *Roofing.* Any of a number of laths fixed accurately in position to support a tile, slate, etc

gauge, *or* **gage, lathe.** *Mach.* An automatic lathe for turning a round object having an irregular profile, as a baluster or chair round, to a template or gauge.

gauge, *or* **gage, notch.** *Engin.* A notch of definite shape and size used in measuring the flow of rivers, etc.

gauge, *or* **gage, pin.** *Print.* A pin on the platen of a job press marking the place for the sheets in feeding.

gauge, *or* **gage, point.** A point marked on a gauging rod, slide rule, or other instrument used in gauging casks, etc., to indicate the diameter of a cylinder having an altitude of one inch and a given capacity.

gaug'er, gag'er (gā'jẽr), *n.* One that gauges; esp., an officer whose business it is to ascertain the contents of casks; hence, an exciseman.

gauge, *or* **gage, rod.** A cylindrical rod for gauging internal diameters; also, a gauging rod for casks.

gauge *or* **gage, saw.** A saw with a gauge to regulate the depth of cut.

gauge, *or* **gage, stick.** *Founding.* A gauge whose full length is that of outside diameter and on which the diameter of the core is marked by notches.

gauge, *or* **gage, stuff.** *Plastering.* Mortar containing plaster of Paris, used in making cornices, moldings, etc., also, gauged mortar (see GAUGE, *v. t.*, 6).

gauge, *or* **gage, weir.** A weir that may be opened and closed by paddles or shutters.

gauge, *or* **gage, wheel.** A front wheel on a plow beam to determine the depth of the furrow. See PLOW, *Illust.*

gaug'ing, gag'ing (gā'jĭng), *p. pr. & vb. n.* of GAUGE. Specif.: *vb. n.* **a** *Coal Mining.* A heap of rubbish fencing off a heading. *Eng.* **b** *Needlework.* See GAUGE, *v. t.*, 7.

gauging, *or* **gaging, rod,** a graduated rod for measuring the capacity of barrels, casks, etc.

Gaul (gôl), *n.* [F. *Gaule;* cf. L. *Gallia*, fr. *Gallus* a Gaul.]
1. The Anglicized form of *Gallia*, which in the time of the Romans included what are now France and Upper Italy (Transalpine Gaul and Cisalpine Gaul).
2. [L. *Gallus.*] One of the natives or inhabitants of ancient Gaul, or a member of the race to which they belonged. The Gauls were described by classical writers as tall, blond, and large-bodied; Cæsar, and after him many historians, identified the Gauls with the Celts of northern Gaul, but some ethnologists now distinguish the two peoples, at least so far as to make the Belgic Gauls of Cæsar's time only one type or branch of the Celtic-speaking population of Gaul. See CELT, CYMRY, cf. GALATIAN.

Gaul'ish (gôl'ĭsh), *a.* Of or pertaining to Gaul or the Gauls.

Gaul'ish, *n.* The idiom of Celtic spoken in ancient Gaul, of which there are few existing monuments. Its alphabet, of Greek derivation, is imperfectly known. See INDO-EUROPEAN.

gault, *v. t.* [See GAULT, *n.*] *Dial. Eng.* To cover (soil) with clay obtained from the subsoil. — *v. i.* To dig Gault for embankments.

gaul'ther-ase (gôl'thẽr-ās), *n.* [See GAULTHERIA; -ASE.] *Chem.* An enzyme accompanying gaultherin, which it is capable of decomposing into glucose and oil of wintergreen (methyl salicylate).

Gaul-the'ri-a (gôl-thē'rĭ-ă), *n.* [NL.; after M. *Gaulthier*, Canadian botanist and physician.] **a** *Bot.* A large genus of ericaceous shrubs, natives mostly of the Andes, having evergreen foliage, white bell-shaped flowers, and, often, edible berries. It includes the American wintergreen (*G. procumbens*), and the larger-fruited salal of northwestern America (*G. shallon*). See WINTERGREEN, SALAL. **b** [*l. c.*] *Pharm.* Oil of wintergreen.

gaul'ther-in (gôl'thẽr-ĭn), *n. Chem.* A glucoside, $C_{14}H_{18}O_8$, in the bark of the black birch and probably in wintergreen (*Gaultheria procumbens*) and other plants. See GAULTHERASE.

gaum (gôm), *v. t.*; GAUMED (gômd), GAUM'ING. [Cf. GOME grease, GORM.] To smear or daub, as with grease or tar. "*Gauming* honey on their wings." *J. W. Riley.*

gaunt (gant; gônt; 277), *a.* [Cf. Norw. *gand* a thin pointed stick, a tall and thin man.] **1.** Of slender form; slim. *Obs.*
2. Attenuated, as with fasting or suffering; lean; meager; pinched; haggard.

Visible pestilence, striding *gaunt* and fleshless. *Nichols.*

3. Forbidding; grim; desolate; barren "*Gaunt* suits of mail." *Dickens.* "*Gaunt* stone walls." *Lowell.*

Syn. — See THIN.

gaunt'let (gânt'lĕt; gônt'-; 277), *n.* [F. *gantelet*, dim. of *gant* glove, LL. *wantus*, of G. or Scand. origin; cf. Sw. & Dan. *vante*, Icel. *vöttr*, for *vantr*, D. *want*, G. dial. *want* or *wante.*]
1. A glove of such material that it defends the hand from wounds The gauntlet of the Middle Ages was sometimes of chain mail, and was then a prolongation of the sleeve of the hauberk, a slit in the side of the sleeve allowing the hand to pass through when protection was not needed. It was sometimes of leather partly covered with metal plates, scales, etc., sewed to it, and in the 14th century became a covering of small, minutely articulated steel plates for the whole back of the hand, fingers, and thumb. See ARMOR, *Illust.*

Gauntlet.

2. Hence: **a** A long stout glove, covering part of the arm. **b** The part of a glove that covers the wrist.
3. *Surg.* A bandage for hand and wrist like a long glove.

gauss (gous), *n.* [After Karl F. *Gauss*, German mathematician.] *Elec.* The C. G. S. unit of density of magnetic flux or of intensity of magnetic field, equal to a field of one line of force per square centimeter, or to the intensity of magnetic field at one centimeter distance from a unit pole. It was adopted as an international unit at Paris in 1900. It was previously suggested as unit of magnetomotive force.

gauss'age (-ăj), *n. Elec.* The intensity of a magnetic field expressed in C. G. S. units, or gausses.

Gauss'i-an (-ĭ-ăn), *a. Math.* Pert. to or named from Karl Friedrich Gauss, the German mathematician (1777–1855).

Gaussian analogies *or* **equations,** *Math.*, four equations in spherical trigonometry connecting the sine and cosine of half an angle of a spherical triangle and of half the opposite side with the sines and cosines of half the sums and differences of the other angles and of the other sides. From them Napier's analogies may be deduced. — **G. curvature,** *Math.*, the reciprocal of the product of the two principal radii of curvature of a surface at any of its points. — **G. function,** *Math.*, a hypergeometric function of second order. — **G. logarithms.** = GAUSS'S LOGARITHMS. — **G. series,** *Math.*, the hypergeometric series.

Gauss'i-an, *n. Optics.* An achromatic objective figured on curves derived by Gauss.

Gauss's logarithms (gous'ĭz). *Math.* Addition and sub-

4. A kind of light muffin.

5. *Print.* A size of type body between brilliant and diamond, not in common use.

6. *Bot.* A bud. *Obs.*

Syn. — GEM, JEWEL. In modern usage, GEM more frequently suggests a precious stone as cut or polished, JEWEL, a precious stone as set and worn for ornament; as, "the last finish of the *gem* engraver blowing away the last particle of invisible dust" (*W. Pater*), "I would be the *jewel* that trembles in her ear" (*Tennyson*). Fig. (often colloq.) both are used like *treasure,* as terms of enthusiastic commendation; as, "Do . . . look at the church! . . . It is such a *gem!*" (*Owen Wister*); "'Marry, sir, I carried Mistress Sylvia the dog you bade me.'—'And what says she to my little *jewel?*'" (*Shak.*).

gem, *v. t.*; GEMMED (jĕmd); GEM'MING. **1.** To put forth in the form of buds. *R.* "*Gemmed* their blossoms." *Milton.*

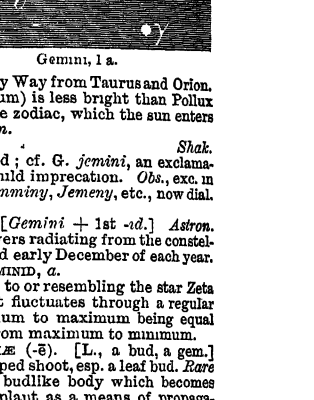
[L., twins, pl. of *geminus.*] **1.** *Astron.* **a** The third zodiacal constellation, pictorially represented as the twins, Castor and Pollux (cf. DIOSCURI), sitting together, the two bright stars named after them marking the position of their heads. It is on the opposite side of the Milky Way from Taurus and Orion. The star Castor (α Geminorum) is less bright than Pollux (β). **b** The third sign of the zodiac, which the sun enters about May 20th. See SIGN, *n.*



Gemini, 1 a.

2. [*l. c.*] A pair. *Obs.* *Shak.*

3. [Perhaps a different word ; cf. G. *jemini,* an exclamation.] Used as an oath or mild imprecation. *Obs.*, exc. in various corrupt forms, as *Jimminy, Jemeny,* etc., now dial. or vulgar.

Gem'i-nid (jĕm'ĭ-nĭd), *n.* [*Gemini* + 1st *-id.*] *Astron.* **a** One of the meteors of showers radiating from the constellation Gemini in October and early December of each year. **b** A Geminid star. See GEMINID, *a.*

Gem'i-nid, *a. Astron.* Pert. to or resembling the star Zeta (ζ) Geminorum, whose light fluctuates through a regular period, the rise from minimum to maximum being equal in duration to the decline from maximum to minimum.

gem'ma (jĕm'ä), *n.*; *pl.* -MÆ (-ē). [L., a bud, a gem.] **1.** *Bot.* **a** A bud or undeveloped shoot, esp. a leaf bud. *Rare or Obsoles.* **b** An asexual budlike body which becomes detached from the parent plant as a means of propagation. Unicellular gemmæ are produced by certain algæ, fungi, and hepatics, those of the fungi being known as *chlamydospores.* Multicellular, or *bi ood,* gemmæ are found in many mosses, hepatics, and some ferns. Cf. BULBIL.

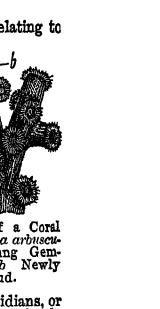
2. *Zool.* A bud ; an outgrowth which develops into a new organism. See GEMMATION.

3 [*cap.*] *Astron.* See ALPHECCA.

gem-ma'ceous (jĕm-ā'shŭs), *a.* Pertaining or relating to buds or gemmæ.

gem'mate (jĕm'āt), *a.* [L. *gemmatus,* p. p. of *gemmare* to put forth buds, fr. *gemma* bud] *Biol.* Having gemmæ ; reproducing by buds or gemmæ.

gem'mate (-āt), *v.i.*; -MAT-ED (-āt-ĕd); -MAT-ING (-āt-ĭng). To produce, or propagate by, buds, as certain corals.



Branch of a Coral (*Cladocora arbuscula*) showing Gemmation. *b* Newly formed Bud.

gem-ma'tion (jĕm-ā'shŭn), *n.* [Cf. F. *gemmation.*] **1.** *Biol.* A form of asexual reproduction in which the new organism develops from a projection or protuberance, called a *bud,* of some part of the body of the parent ; budding. The buds may remain attached to the parent, in which case compound animals or colonies are formed, as in polyzoans, most corals and compound ascidians, or they may completely separate, forming distinct simple organisms (see HYDRA, *Illust.*). In some cases the term is extended to cover the formation of new individuals by a similar process within the body of the parent. In unicellular organisms, as the yeast plant, gemmation is similar to conjugation.

2. *Bot.* The arrangement of buds in the leaf axils.

gem'ma-tive (jĕm'ä-tĭv), *a.* Pert. to gemmation.

gemme. ✝ GEM

gem'mel. Var. of GEMEL.

gem'mi-fer (jĕm'ĭ-fĕr), *n.* [F. *gemmifère.*] *Bot.* A plant bearing gemmæ.

gem-mif'er-ous (jĕm-ĭf'ĕr-ŭs), *a.* [*gemma* + *-ferous.*] Bearing gemmæ.

gem'mi-form (jĕm'ĭ-fôrm), *a.* [*gemma* + *-form.*] Having the form of a gemma.

gem'mi-gen (jĕm'ĭ-jĕn), *n.* [*gemma* + *-gen.*] *Biol.* A substance which causes gemmation.

gem'mi-gen-ous (jĕm-ĭj'ĕ-nŭs), *a.* [*gemma* + *-genous.*] *Biol.* Producing gemmæ.

gem'ming (jĕm'ĭng), *n.* [From GEM, *v.*] Ornamentation with gems.

gem'mip-a-rous (jĕm-ĭp'ă-rŭs), *a.* [*gemma* + *-parous.*] *Biol.* Producing gemmæ.

gem'mi-pos (jĕm'ĭ-pŏs), *n.* [*gemma* + *-pous.*] *Biol.* A gemmiparous animal.

gem'mo-log'ic (jĕm'ō-lŏj'ĭk), *a.* Pert. to gemmology.

gem-mol'o-gist (jĕm-mŏl'ō-jĭst), *n.* One who is versed in gemmology.

gem-mol'o-gy (jĕm-mŏl'ō-jĭ), *n.* [*gem* + *-logy.*] The science of gems.

gem'my (jĕm'ĭ), *a.* Containing gems ; set with gems ; like a gem.

gem'ol-o-gy (jĕm-ŏl'ō-jĭ), *n.* [*gem* + *-logy.*] Gemmology.

gem'ot (jĕm'ŭt), *n.* [Cf. F. *gemot.*] *Eng. Hist.* A meeting or assembly ; a moot.

Geneva award. See ALABAMA CLAIMS. — **G. band.** See BAND, *n.*, 6 a. — **G.,** *or* **Genevan, Bible,** a version based on a revision of the Great Bible and Tyndale's Bible, and containing marginal notes, made by English refugees in Geneva (Geneva, 1560; London, 1576). It was the first English Bible printed in Roman type instead of black letter, the first to make the division into verses, and the first to omit the Apocrypha. In form it was a small quarto, and soon superseded the large folio of the Great Bible, attaining about 160 editions. — **G. black,** a black obtained by dyeing with logwood and fustic, with copperas and blue vitriol as mordants. — **G. catechism,** either of two catechisms made by John Calvin. The *Smaller Catechism* was published in 1536, and the *Larger Catechism* in 1541 or 1542, both being in French. — **G. cloak.** = GENEVA GOWN. — **G. convention,** an agreement made by representatives of the great European powers at Geneva in 1864, drawing new and more humane regulations regarding the treatment of the sick and wounded in war and the status of those who minister to them. Ambulances and military hospitals are made neutral, and this condition affects physicians, chaplains, nurses, and the ambulance corps. A second conference, held at Geneva in 1868, drew up a supplementary agreement, partly interpreting the former one and partly applying its principles to maritime war. The agreement has now received the adherence of all the European powers, the United States, and many other countries. — **G. cross,** *Mil.*, a red Greek cross on a white ground; — the flag and badge adopted in the Geneva convention to be displayed by hospitals, hospital ships, etc, and all connected with them and by neutrals succorng the sick and wounded, and when properly so displayed assuring immunity from injury or capture; — more commonly called the *red cross.* — **G. gown,** the loose, large-sleeved, black academic gown adopted as a vestment for preaching by the Calvinistic clergy of Geneva, and widely used by Protestants. — **G. name,** *Org. Chem.*, a name formed according to the system adopted by the Geneva Congress of 1892. See OFFICIAL NOMENCLATURE. — **G. print,** the print or type used in the Geneva Bibles. *Obs.* — **G. stop,** *Horol*, a device used in watches other than fusee watches to prevent overwinding. It consists of two disks, one (*A* in *Illust.*) with a projecting tooth, *P*, which gears with slots in the other, the former being fixed on the winding arbor. Winding is completed when the convex part of the disk *A* meets the convex portion *E* of the disk *B*.

[L. *genius* tutelar deity or genius of a person or place, taste, talent, genius, from *genere, gignere*, to beget, bring forth. See GENDER.] **1.** *[often cap.] Rom. Relig.* An attendant godling or spirit of a person or place; tutelar deity. Primarily, the genius is the spirit of the masculine energy or virility of a man with whom it is born and dies, and the genius of the head of a household was worshiped along with the lares and penates. By extension, the genius of the householder became viewed as a ‖ **ge'ni-us do'mus** (jē'nĭ-ŭs dō'mŭs) (of the house), or ‖ **ge'ni-us fa-mi'li-æ** (fa-mĭl'yĭ-ē) (of the family). Finally the primary idea was lost and the genius was viewed merely as a tutelary or guardian, as ‖ **ge'ni-us lo'ci** (lō'sī) (of the place), ‖ **ge'ni-us tu-te'læ** (tū-tē'lē) (of protection), which eventually became an independent goddess ‖ **Tu-te'la,** who, in late Roman paganism, was introduced into household worship as the feminine counterpart of the *genius* (but cf. JUNO). The ‖ **ge'ni-us po'pu-li Ro-ma'ni** (pŏp'ū-lī rō-mā'nī) was the presiding genius of the state, whose worship was in charge of the Arval Brothers. Gods, also, had their genii, to which separate sacrifices were made.

2. Hence: **a** With a more or less distinct reference to the Roman notion: *[often cap.]* A spirit presiding over the destiny of a person or place; a familiar spirit or a tutelary; as, each man is said to have a good and an evil *genius.* Cf. DEMON, 1. "Britannia's *Genius.*" *Collins.*

He was the very *Genius* of Famine. *Shak.*

b A nature spirit or an elemental spirit, esp. a spirit of fire or air (see ELEMENTAL, 1); specif., one of the powerful nature demons of Arabian and Mohammedan lore believed to interfere in human affairs and to be sometimes subject to magic control; a jinni (which see).

The pyromantic *genii*
Are mighty, swift, and of far-reaching power. *Greene.*

☞ It is often difficult to distinguish the Oriental from the Roman source of the use of the word in this sense. The Oriental use seems to have originated from the French use of *génie* (genius) to translate the Arabic word properly written *jinnî* in English. In English *genie* (from the French) is still a common equivalent of *jinn*, while *genii* (pl. of *genius*) is ordinarily used for *jinn* (pl. of *jinnî*).

3. The mental endowment peculiar to an individual; that disposition or aptitude of mind which qualifies a person for certain kinds of action or special success in a given pursuit; special taste, inclination, or disposition; natural bent; as, a *genius* for history, for poetry, or painting.
4. Peculiar character or inherent nature; esp., animating spirit, as of a nation, a religion, a language, a period; as, the *genius* of the 18th century; the *genius* of the French people; the *genius* of the common law.
5. The associations, history, traditions, and influences (of a place or locality); as, his character was largely molded by the *genius* of Edinburgh.
6. Extraordinary mental superiority; uncommon native intellectual power; esp., highly unusual power of invention or origination of any kind; as, a man of *genius.*

Talent is that which is in a man's power, *genius* is that in whose power a man is. *Lowell.*

7. A man endowed with genius; as, Milton was a rare *genius.*

☞ In the senses of defs. 1 and 2 the Latin plural, *genii*, is now the only correct plural form. For the other senses *geniuses* is the correct plural.

Syn. — GENIUS, TALENT are variously, but in present usage always sharply, distinguished: as exalted, often supreme native endowment, in contrast with a high degree of mere aptitude; as original creative power, frequently working through the imagination, in contradistinction to a faculty for effective dealing with existent material; as the intuitive and spontaneous, in opposition to the merely disciplined and trained; as the inexplicable, unanalyzable, and as it were inspired, over against what works in the main by rule and line. See GIFT.

Enough that we recognize in Keats that undefinable newness and unexpectedness that we call *genius.* *Lowell.*

This difficulty [of original writing] can only be mastered by a peculiar *talent*, strengthened and rendered nimble by practice, and the commerce with original minds. *G. H. Lewes.*

8. Moderate; as, a *gentle* warmth; a *gentle* declivity.

Syn. — Kind, tender, soft, quiet, peaceful, calm, tranquil, placid; bland, soothing, indulgent, clement, mollifying; yielding, submissive, pacific; unassuming, humble, lowly; spiritless, subdued; flat, insipid, dull, unexhilarating. — GENTLE, MILD, MEEK, DOCILE, TAME. GENTLE, as here compared, has more positive connotations (esp. quietness, kindness, tenderness, refinement) than MILD, which frequently suggests little more than the negation of harshness, severity, or violence; one is MEEK who is patient under provocation, or whose spirit has been schooled to mildness by discipline or suffering; in modern usage, *meek* is frequently a term of mild contempt; as, "Her voice was ever soft, *gentle*, and low" (*Shak.*); "She nurtured him with the *gentle* care of one who handles a butterfly" (*Hawthorne*); "Confused pain looked *mildly* from them [Coleridge's eyes], as in a kind of *mild* astonishment" (*Carlyle*); "Her forehead was *mild* and benevolent between the smooth curves of gray hair; there were *meek* downward lines about her nose and mouth; but her eyes . . . looked as if the *meekness* had been the result of her own will, never of the will of another" (*Mary Wilkins*); "Mr. Glegg [spoke] rather warmly, for, though a kind man, he was not as *meek* as Moses" (*G. Eliot*). DOCILE (see DUCTILE) suggests pliancy and tractability; TAME, as here compared, spiritless or timid docility or meekness; as, "The untamable young creature was *docile* and *gentle* in Laura's presence" (*Thackeray*), "A deceitful concubine, who shore me . . . like a *tame* wether, . . . then turned me out ridiculous" (*Milton*); "Heirs to all his vices, without . . . his *tame* virtues" (*Byron*). Both *mild* and *tame* (the stronger term) are used in the sense of flat, insipid, unexhilarating; as, *mild* excitement, "*tame* and tiresome uniformity" (*Gibbon*). See CALM, DECOROUS.

gentleman usher. A gentleman who acts as usher to a sovereign or to one of superior rank.

Gentleman Usher of the Black Rod. See BLACK ROD.

gen′tle-men's a-gree′ment (jĕn′t'l-mĕnz). An agreement binding only as a matter of honor, often, specif., such an agreement among the heads of industrial or mercantile enterprises, the terms of which could not be included and enforced in a legal contract.

gen′tle-ness, *n.* Quality or state of being gentle; esp., softness of manners, disposition, etc.; freedom from harshness or roughness; mildness.

gen′tle-wom′an (jĕn′t'l-wŏŏm′ăn), *n.*; *pl.* -WOMEN (-wĭm′ĕn; -ĭn). A woman of good family or breeding; also, *Now Hist.*, a woman who attends a lady of rank. — **gen′tle-wom′an-hood,** *n.* — **gen′tle-wom′an-like′,** *a.* — **gen′tle-wom′an-ly** (-lĭ), *a.*

Gen-too′ (jĕn-tōō′), *n*; *pl.* -TOOS (-tōōz′). [Pg. *gentio* gentile, heathen. See GENTILE.] **1.** A Hindu; specif., a Telugu; also, the language of the Gentoos.

2 [*l. c.*] A penguin (*Pygoscelis tæniata*) *Falkland Is.*

gen′trice (jĕn′trĭs), *n* [OF. *genterise* See GENTRY.] **1.** Gentility of birth; rank; nobility. *Archaic or Scot.*

> Did you ever hear that *gentrice* put money in folks' pockets? *Stevenson.*

2. *pl.* **a** The nobility. *Obs.* **b** Fine garments. *Obs.*

3. Gentle feeling; courtesy; good breeding. *Archaic.*

gen′try (jĕn′trĭ), *n.* [ME. *genterie*, *gentrie*, noble birth, nobility, cf. OF. *genterise*, *gentelise* (see GENTLE), but also ME. *gentelerī* high-mindedness, i. e., *gentle* + *-ry.*] **1.** Birth; condition; rank by birth; esp., gentle birth. *Obs.* "Pride of *gentrie*." *Chaucer.*

2. People of education and good breeding; in England, in a restricted sense, those between the nobility and the yeomanry.

3. The qualities appropriate to those of gentle birth, as courtesy, generosity, good breeding.

> To show us so much *gentry* and good will. *Shak.*

4. People; persons of a class; — usually with contemptuous or humorous significance; as, the light-fingered *gentry*.

"elder statesmen" of Japan. See ELDER STATESMEN.

‖ **gens** (zhäN), *n. pl.* [F.] People; a particular class of persons. — **g. d'église** (dē-glēz′), ecclesiastics; clergymen; churchmen. — **g. de guerre** (dē gâr′), military men; soldiery. — **g. de lettres** (lĕt′r'), littérateurs collectively. — **g. de loi** (lwȧ′), lawyers. — **g. du monde** (dü mōⁿd′), people of the world; fashionable or society people.

gen′seng. Var. of GINSENG.

gen′son (jĕn′s'n), *n.* [See GENTIAN.] The feverroot.

gens′ to-ga′ta (jĕnz′ tō-gā′tə). [L.] The nation clad in the toga, i. e., the Romans.

Vergil (*Æneid*, I. 282).

gent. *Abbr.* Gentleman.

‖ **gen′te** (hĕn′tē; 172), *n.* [Sp.] People; esp., the common people, the lower classes (called also **gen′te ba′ja** [bä′hä]), as distinguished from the **gen′te fi′na** (fē′nä) or **gen′te flus-tra′da** (flŏŏs-trä′thä; 146), who are the educated and prosperous class of the native population. *Phil. I.*

gen′tee, *a.* Genteel. *Obs.*

gen-teel′ish, *a.* See -ISH.

gen-teel′ize, *v. t.* See -IZE.

gen-teel′ly, *adv.* of GENTEEL.

gen-teel′ness, *n.* See -NESS.

gen′tel. † GENTLE.

Gentele's green. A beautiful and comparatively nonpoisonous green pigment, consisting of stannate of copper.

gen′tel-y. † GENTLY.

genterie, gentrie. † GENTRY.

genterise. † GENTRICE.

gen′tes (jĕn′tēz), *n. pl.* of GENS, a clan. [DYE.]

gentian blue. Aniline blue. See

gen′ti-an′ic (jĕn′shĭ-ăn′ĭk), *a.* *Chem.* Designating a so-called acid, better known as *gentianin*.

gen′tian-ose (jĕn′shĭ-ōs), *n.* *Chem.* A crystallizable sweetish substance, from the gentian.

gentian violet An artificial violet stain used in microscopy.

gen′tian-wort′ (-wûrt′), *n.* Any gentianaceous plant.

gentil, *a.* & *n.* † GENTEEL, GENTILE, GENTLE.

gen′tile. † GENTLE

gen′tile-dom, *n.* See -DOM.

gen′tile-fal′con, *n.* = FALCON-GENTIL. [al.

gent′ish (jĕn′tĭsh), *a.* Like, or characteristic of, a "gent." — **gent′ish-ness,** *n.* *Both Vulgar.*

gen′ti-sin (jĕn′tĭ-sĭn), *n.* = GENTIANIN.

gen′ti Gentle *Ref. Sp.*

gen′tle-heart′ed, *a.* Having a gentle heart — **-heart′ed-ness,** *n.*

gen′tle-man-hood′, *n.* See -HOOD.

gen′tle-man-ism (-tz′m), *n.* See -ISM.

gen′tle-man-ize, *v. t.* See -IZE.

gen′tle-man-ly, *a.* Gentlemanly. *Obs. or Scot.*

gentleman pensioner. See GENTLEMAN-AT-ARMS.

gen′tle-man's-cane′, *n.* *Bot.* The prince's-feather.

gen′tle-man-ship′, *n.* See -SHIP.

gen′tle-peo′ple, *n. pl.* = GENTLEFOLK.

gen′tler-y, *n.* [Cf. GENTRY.] Gentlehood; also, gentry. *Obs.*

gen′tle-ship, *n.* Deportment or status of a gentleman. *Obs. or R.*

gen′tle-wom′an-li-ness, *n.* See -NESS.

gen′til-man. Gentleman. *Ref. Sp.*

gen′tly, *adv.* of GENTLE, *a.*

gent′man. = GENTLEMAN. *Vulgar.*

Gen-tu′. Var. of GENTOO.

gen′ty (jĕn′tĭ), *a.* [From F. *gentil*. Cf. JAUNTY.] *Obs., Scot., or Dial. Eng.* **1.** Noble; courteous. **2.** Neat; trim; graceful.

ge′nu (jē′nŭ), *n.*; *pl.* GENUA (jĕn′ū-ə). [L., the knee.] *Anat.* An abrupt flexure; specif., the bend in the anterior part of the corpus callosum.

gen′u-al (jĕn′ū-ăl), *n.* **a** Of or pertaining to the knee, or genu. **b** Pert. to or designating the fourth joint of a spider's leg.

gen′u-ant (-ănt), *a.* [L. *genu* knee] *Her.* Kneeling. [*Bib.*]

Ge-nu′bath (gē-nū′băth), **gen′u-clast** (jĕn′ū-klăst), *n.* [L. *genu* + Gr. κλᾶν to break.] *Surg.* An instrument for breaking up adhesions in the knee joint.

gen'u-flect' (jĕn'ū-flĕkt'; jĕn'ū-flĕkt), *v. i.*; GEN'U-FLECT'-ED; GEN'U-FLECT'ING. [See GENUFLECTION.] To bend the knee, as in worship.

gen'u-flec'tion, gen'u-flex'ion (jĕn'ū-flĕk'shŭn), *n.* [F. *génuflexion*, or LL. *genuflexio*, fr. L. *genu* knee + *flexio* a bending, fr. *flectere*, *flexum*, to bend. See KNEE; FLEXIBLE.] Act of bending the knee, particularly in worship.

gen'u-flec'tor (-flĕk'tĕr), *n.* One who genuflects. — **gen'u-flec'to-ry** (-tŏ-rĭ), *a.*

gen'u-ine (jĕn'ū-ĭn), *a.* [L. *genuinus*, fr. *genere*, *gignere*, to beget, in pass., to be born. See GENDER.] **1.** Native or natural; not foreign. *Obs.*

2. Actually belonging to, or proceeding from, the reputed source, origin, or author; having the origin or character which it appears or is claimed to have, authentic; not counterfeit, spurious, false, or adulterated; real; true; pure; as, a *genuine* note or signature is one actually made by the person whose name is on the note; a *genuine* text is one of the date, authorship, etc., which it purports or is claimed to have, a *genuine* production; *genuine* materials.

3. Of or pertaining to the original stock or source; as, the *genuine* breed of mastiffs; the *genuine* Aztecs.

4. Sincere; frank; free from hypocrisy or pretense.

Syn. — Real, true, pure, unalloyed, unadulterated. See AUTHENTIC.

— **gen'u-ine-ly**, *adv.* — **gen'u-ine-ness**, *n*

ge'nus (jē'nŭs), *n.*; *pl.* GENERA (jĕn'ĕ-rȧ). [L., birth, race, kind, sort; akin to Gr. γένος. See GENDER; cf. BENIGN.]

1. *Logic.* A class of objects divided into several subordinate species; a class more extensive than a species.

2 *Biol.* A category of classification ranking between the family and the species; a group of structurally or phylogenetically related species, or consisting of an isolated species exhibiting unusual differentiation (monotypic genus). Thus the species of oak collectively form the genus *Quercus;* of horses, asses, and zebras, the genus *Equus.* The genera of older naturalists, as Linnæus, were large and comprehensive groups, in many cases coextensive with the *families* of modern taxonomy. The present tendency is to restrict genera to much more closely related groups. The genus name is the first word of a binomial scientific name, and is capitalized.

3. A class; order; kind; sort.

genus of a curve (of m^{th} **order**), *Math.*, the greatest number of its intersections (with some other curve) that can be induced by other specified intersections (with that other curve). It cannot exceed $\frac{1}{2}(m-1)(m-2)$, thus 3 intersections on a quartic are induced by 5 intersections with a conic, by 9 with a cubic, etc.

-ge-ny (-jĕ-nĭ). [Gr. *-γένεια* (as in ὁμογένεια homogeny), fr. root of γίγνεσθαι to be born: cf. F. *-génie.*] A suffix denoting *generation, production, development;* as, chondr*ogeny*, morph*ogeny*, biog*eny*, dynam*ogeny*.

ge'o- (jē'ŏ-), **ge-** (jĕ-). [Gr γεω- (as in γεωγραφία geography), fr. γαῖα, γῆ, the earth.] Combining forms signifying *earth, ground, soil;* as, *geography, geophagism*, etc.

ge'o-car'pic (jē'ŏ-kär'pĭk), *a.* [*geo-* + *-carpic.*] *Bot.* Producing, or ripening, the fruit beneath the surface of the ground, as the peanut.

ge'o-cen'tric (-sĕn'trĭk) } *a.* [*geo-* + Gr. κέντρον center.]
ge'o-cen'tri-cal (-trĭ-kăl) } **1.** *Astron.* Pert. to, or measured from, the earth's center; having, or relating to, the earth as a center; — sometimes opposed to *heliocentric.*

2. Of, pertaining to, or characterized by, geocentricism.

geocentric latitude, *Astron.*, the celestial latitude of a body as seen from the earth's center. — **g. latitude** (of a place), the angle included between the plane of the equator and the radius of the earth through the place; — in distinction from *geographic latitude.* At latitude 45° the angle of the vertical reaches a maximum of 11′ 30″. Geocentric latitude plus angle of the vertical equals geographic latitude. — **g. longitude**, *Astron.*, the celestial longitude of a body as seen from the earth's center. — **g. parallax.** See PARALLAX.

ge'o-cen'tri-cism (-sĕn'trĭ-sĭz'm), *n.* Theory or belief that the earth is the center, or central object, of the universe, of divine plans, or the like.

There is also a touch of lingering *geocentricism* in this exaltation of man. *Goldwin Smith.*

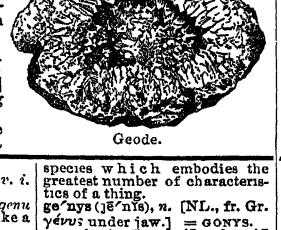
ge-och'ro-ny (jĕ-ŏk'rŏ-nĭ), *n.* [*geo-* + Gr. χρόνος time.] Geologic chronology; the system of time divisions used in geology. — **ge'o-chron'ic** (jē'ŏ-krŏn'ĭk), *a.*

ge-oc'ro-nite (jĕ-ŏk'rŏ-nīt), *n.* [*geo-* + Gr. Κρόνος Saturn, alchemistic name of lead.] *Min.* A lead-gray sulphide of lead and antimony, $5PbS\,Sb_2S_3$, usually massive. Sp.gr., 6.4.

ge'o-cyc'lic (jē'ŏ-sĭk'lĭk; -sī'klĭk), *a.* [*geo-* + *cyclic.*] **1.** Of, pertaining to, or illustrating, the rotation or revolution of the earth; as, a *geocyclic* machine.

2. Circling round the earth periodically

ge'ode (jē'ōd), *n.* [F. *géode*, L. *geodes*, fr. Gr. γεώδης earthlike; γαῖα, γῆ, the earth + εἶδος form.] *Geol.* **a** A nodule of stone having a cavity lined with crystals or mineral matter. **b** The cavity in such a nodule.



Geode.

ge'o-des'ic (jē'ŏ-dĕs'ĭk) } *a.* [*geo-* + Gr. κρός.] *Min.* A white waxy substance composed of carbon, hydrogen, and oxygen, occurring in brown coal.
ge'o-des'i-cal (-ĭ-kăl) }

Ge'o-coc'cyx (jē'ŏ-kŏk'sĭks), *n.* [NL.; *geo-* + Gr. κόκκυξ cuckoo.] *Zool.* The genus containing the chaparral cock.

Ge'o-co'res (-kŏ'rēz), **Ge'o-cor'i-se** (-kŏr'ĭ-sē), *n. pl.* [NL. *pl.*; *geo-* + Gr. κόρις bug.] *Zool.* The Gymnocerata.

geod. *Abbr.* Geodesy.

ge'o-dæ'si-a, -de'si-a (jē'ŏ-dē'shĭ-ȧ; -sĭ-ȧ), *n.* [NL.] Geodesy.

Ge'o-deph'a-ga (-dēf'ȧ-gȧ), *n. pl.* *Zool.* = GRADEPHAGA. — **ge'o-deph'a-gous** (-g ŭs), *a.* [*esist.*]

ge'o-dete (jē'ŏ-dēt), *n.* A geodete.

ge'o-det'i-cal-ly, *adv.* of GEODETIC. [GEODESY.]

ge'o-det'ics (-dĕt'ĭks), *n.* = GEODUCK (jē'ŏ-dŭk), *n.* [Amer. Ind. name.] A large edible clam (*Glycimeris generosa*) of the Pacific coast of North America.

ge'o-dy-nam'ic, ge'o-dy-nam'i-cal, *a.* [*geo-* + *dynamic.*] Of, pert. to, or noting, the forces or processes within the earth. — **ge'o-dy-nam'ics**, *n.* (See -ICS.)

Geof. *Abbr.* Geoffrey.

Geof'frey (jĕf'rĭ), *n.* [OF. *Jofrei*, F. *Geoffroi*, LL. *Gaufridus, Galfridus*, OHG. *Gaufrid*; cf. G. *gau* district, and *friede* peace, OHG. *fridu.*] Masc. prop. name.

geog. *Abbr.* Geographer; geographic; geographical; geography.

ge'o-gen'ic (jē'ŏ-jĕn'ĭk), **ge'o-gen'i-cal** (-ĭ-kăl), *a.* Of or pertaining to geogeny. *Rare.*

ge-og'e-nous (jē-ŏj'ĕ-nŭs), *a.* [*geo-* + *-genous.*] *Bot.* Growing on or in the ground.

ge'og-no'sis (jē'ŏg-nō'sĭs), *n.* Geognosy. *Rare.*

ge-og'no-sist (jē-ŏg'nō-sĭst), *n.* = GEOGNOST. *Rare.*

ge-og'ra-fer, ge'o-graf'ic, ge-og'ra-fy. Geographer, etc. *Ref. Sp.*

ge'o-graph'i-cal-ly, *adv.* of GEOGRAPHICAL.

ge'o-graph'ics (jē'ŏ-grăf'ĭks), *n.* [See -ICS.] Geography.

ge'o-i'so-therm, *n.* [*geo-* + *isotherm.*] = ISOGEOTHERM.

geol. *Abbr.* Geologic; geological; geologist; geology.

ge-ol'o-ger (jē-ŏl'ŏ-jĕr), **ge'o-lo'gi-an** (jē'ŏ-lō'jĭ-ăn), *n.* A geologist. *Rare.*

ge'o-log'i-cal-ly, *adv.* of GEOLOGICAL.

ge'o-lo-gi'cian (jē'ŏ-lō-jĭsh'ăn), *n.* = GEOLOGIST. *Rare.*

geom. *Abbr.* Geometer; geometric; geometrical; geometry.

ge'om-a-lism (jē-ŏm'ȧ-lĭz'm), *n.* [*geo-* + Gr. ὁμαλισμός a leveling.] *Biol.* The tendency of an organism to be influenced in growth by gravitation, so that one side or lateral organ balances with another. — **ge-om'a-lic**, *a.* [LISM.

ge-om'a-ly (-lĭ), *n.* = GEOMA-

ge'o-mance (jē'ŏ-măns), *v. i.* To practice geomancy. *Rare.* — *n.* Geomancy. *Obs.*

ge'o-mant (-mănt), **ge'o-man'tic**, *n.* A geomancer. *Obs. or R.*

geomesie. † GEOMANCY.

ge-om'e-tral (jē-ŏm'ē-trăl), *a.* [Cf. F. *géométral.*] Pert. or according to geometry. *Obs.*

geometrer, *n.* A geometer. *Obs.*

ge'o-met'ri-al, *a.* Geometrical. *Obs.*

ge'o-met'ri-an, *n.* A geometrician. *Obs.*

fixed point of a surface equal lengths on all geodesics on the surface and through the point — **geodesic curvature** (at a point of a surface), *Math*, the limit of the ratio of the infinitesimal angle between two geodesic tangents to the infinitesimal arc between the points of tangency. — **g. ellipse** (*or* **hyperbola**), *Math.*, the locus of a point on a surface, the sum (or difference) of whose geodesic distances from two fixed curves of the surface is constant. The curves may reduce to points, but must not be geodesic parallels. — **g. line of a surface**, *Math.*, a line that has for its principal normal at every point the normal to the surface at that point; a curve such that the intercept on it between two points (sufficiently near) is the shortest curve on the surface between the points. — **g. parallels**, *Math.*, geodesics drawn perpendicular to an arbitrary curve of a surface. — **g. parallel system**, *Math.*, a system composed of geodesic parallels and their orthogonal trajectories. — **g. polar system**, *Math.*, a system of geodesics through a point and their orthogonal trajectories. — **g. surface**, *Math.*, a pencil of geodesic lines. — **g torsion** (of a curve at a point of a surface), *Math.*, the torsion of the geodesic tangent to the curve at the point.

ge'o-des'ic (jē'ŏ-dĕs'ĭk), *n.* A geodetic line or curve.

ge-od'e-sist (jĕ-ŏd'ē-sĭst), *n.* One versed in geodesy; a geodetic surveyor.

ge-od'e-sy (-sĭ), *n.* [Gr. γεωδαισία; γαῖα, γῆ, the earth + δαίειν to divide: cf. F. *géodésie.*] *Math* That branch of applied mathematics which determines, by observation and measurement, the exact positions of points and the figures and areas of large portions of the earth's surface, or the shape and size of the earth, and the variations of terrestrial gravity, also, that branch of surveying that takes account of the curvature of the earth, as in the surveys of States, or of long lines of coast.

ge'o-det'ic (jē'ŏ-dĕt'ĭk) } *a.* **a** Of or pertaining to, or deter-
ge'o-det'i-cal (-ĭ-kăl) } mined by, geodesy; engaged in geodesy; geodesic; as, *geodetic* surveying. **b** Relating to the geometry of geodetic lines.

geodetic line *or* **curve**, one on which lies the shortest path (as given by a cord stretched) between two points on the geoid; a curve on any surface such that the osculating plane of the curve at every point is normal to the surface; a curve each of whose elements is the shortest path, on a given surface, between the ends of the element.

ge-od'ic (jĕ-ŏd'ĭk), *a.* Of, pert. to, or resembling, a geode.

ge'o-dif'er-ous (jē'ŏ-dĭf'ĕr-ŭs), *a.* [*geode* + *-ferous.*] *Geol.* Containing geodes.

Ge'of-fræ'a (jē'ŏf-frē'ȧ), *n.* Also **Ge'of-froy'a** (-froĭ'ȧ). [NL., after E. F. *Geoffroy*, French physician.] *Bot.* A genus of tropical American fabaceous trees including four species, having ill-scented flowers and edible fleshy pods. *G. superba* yields a fine timber

ge-og'e-ny (jĕ-ŏj'ĕ-nĭ), *n.* [*geo-* + *-geny.*] **1.** The study or science treating of the origin of the earth.

2. That branch of geology treating of the origin or the development of the earth's crust. *Rare.*

Ge'o-glos'sum (jē'ŏ-glŏs'ŭm), *n.* [NL See GEO-; GLOSSO-.] *Bot.* A genus of ascomycetous fungi of the family Helvellaceæ, allied to the morels, and known as *earthtongues.*

ge'og-nost (jē'ŏg-nŏst), *n.* [Cf. F. *géognoste.*] One versed in geognosy; a geologist.

ge'og-nos'tic (-nŏs'tĭk) } *a.* [Cf. F. *géognostique.*] Of or
ge'og-nos'ti-cal (-tĭ-kăl) } pertaining to geognosy. — **ge'og-nos'ti-cal-ly**, *adv.*

ge-og'no-sy (jē-ŏg'nŏ-sĭ), *n.* [*geo-* + Gr. γνῶσις knowing, knowledge, fr. γιγνώσκειν to know: cf. F. *géognosie.*] That part of geology which treats of the materials of the earth and its general exterior and interior constitution, — sometimes nearly synonymous with *geology.*

ge-og'o-ny (-ŏ-nĭ), *n.* [*geo-* + *-gony*] The science, or a theory, of the formation of the earth. Cf. GEOGENY. — **ge'o-gon'ic** (jē'ŏ-gŏn'ĭk), **ge'o-gon'i-cal** (-ĭ-kăl), *a.*

ge-og'ra-pher (jē-ŏg'rȧ-fĕr), *n.* [Cf. F. *géographe*, Gr. γεωγράφος.] One versed in geography.

ge'o-graph'ic (jē'ŏ-grăf'ĭk) } *a.* [L. *geographicus*, Gr.
ge'o-graph'i-cal (-ĭ-kăl) } γεωγραφικός: cf. F. *géographique.*] Of or pertaining to geography.

geographical botany. = PHYTOGEOGRAPHY. — **g. coördinates**, the latitude and longitude of a place. The height above sea level constitutes a third coordinate. — **g. county.** *Eng. Hist.* See COUNTY, 3. — **g. distribution**, *Biol.*, the natural arrangement and apportionment of the various forms of animals and plants in the different regions and localities of the earth. When referring to a single species or group it is practically equivalent to *range* or *habitat.* — **g. latitude.** See LATITUDE. — **g. mile.** See MILE. — **g. poles.** See POLE. — **g. tongue**, *Med.*, an affection of the tongue, marked by slightly elevated and circumscribed red patches, giving it a mapped appearance. — **g. variety**, *Biol.*, a variety of any species coincident with a geographical region, and usually dependent on, or caused by, peculiarities of climate.

ge-og'ra-phize (jē-ŏg'rȧ-fīz), *v. t.*; -PHIZED (-fīzd); -PHIZ-ING (-fīz'ĭng). To study, or describe, the geography of; to treat geographically. — *v. i.* To study geography.

ge-og'ra-phy (-fĭ), *n.*; *pl.* -PHIES (-fĭz). [F. *géographie*, L. *geographia*, fr. Gr. γεωγραφία; γαῖα, γῆ, the earth + γραφή description, fr γράφειν to write, describe. See GRAPHIC.] **1.** The science of the earth and its life; esp., the description of land, sea, and air, the distribution of plant and animal life, including man and his industries, with reference to the mutual relations of these diverse elements.

2. A treatise on this science; also, a geographic description. **Mathematical geography** treats of the figure and motions of the earth, of its seasons, tides, etc., of its measurement, and of its representation on maps and charts by various methods of projection. **Physical geography** treats of the exterior physical features and changes of the earth, in land, water, and air. **Biological geography**, or **biogeography**, has to do with the relation of living things to their physical environment, as evidenced in their distribution, habits, etc.; that part of it which relates to man has been called **anthropogeography**; that relating to plants, **phytogeography**; to animals, **zoogeography**. **Political geography** is the geography of human governments, and treats of the boundaries of states and their subdivisions, the situations of cities, etc. **Commercial geography** treats of commodities, their places of origin, paths of transportation, etc.

ge'o-hy-drol'o-gy (jē'ŏ-hī-drŏl'ŏ-jĭ), *n.* [*geo-* + *hydrology.*] Science of "earth waters" (generally understood as underground waters). — **ge'o-hy-drol'o-gist** (-jĭst), *n.*

ge'oid (jē'oĭd), *n.* [*geo-* + *oid:* cf. Gr. γεοειδής earthlike. Cf. GEODE.] The figure of the earth; the mean sea level conceived as extended continuously through all the continents. The figure of the geoid approximates closely to a spheroid of revolution. — **ge-oi'dal** (jē-oi'dăl), *a.*

ge-ol'a-try (jē-ŏl'ȧ-trĭ), *n.* [*geo-* + *-latry.*] Worship of the earth.

ge'o-log'ic (jē'ŏ-lŏj'ĭk) } *a.* Of or pert. to geology; as, a *geo-*
ge'o-log'i-cal (-ĭ-kăl) } *logic* epoch; a *geological* treatise. **geological hammer**, a hammer designed for the geologist's use. It usually has a square face, to facilitate the trimming of specimens. — **g. survey. a** A systematic examination of an area for the purpose of determining the character, relations, and distribution of its rock masses. **b** [*caps.*] A governmental bureau charged with geological investigations. — **geologic time**, the long period treated of by historical geology, esp. that previous to human history.

ge-ol'o-gist (jē-ŏl'ŏ-jĭst), *n.* [Cf. F. *géologiste.*] One versed in geology; a geological student or investigator.

ge-ol'o-gize (jĭz), *v. i.*; GE-OL'O-GIZED (-jīzd); GE-OL'O-GIZ-ING (-jīz'ĭng). To study geology or make geological investigations; to discourse as a geologist.

ge-ol'o-gize, *v. t.* To study or investigate geologically.

ge-ol'o-gy (-jĭ), *n.*; *pl.* -GIES (-jĭz). [*geo-* + *-logy.*] **1.** The science which treats of the history of the earth and its life, esp. as recorded in the rocks. Geology utilizes the principles of physics, astronomy, chemistry, mineralogy, zoology, botany, etc. Three principal branches or phases are usually distinguished: (1) **Structural**, or **geotectonic geology**, treating of the form, arrangement, and internal structure of the rocks. (2) **Dynamic geology**, dealing with the causes and processes of geological change. (3) **Historical geology**, which, aided by other branches, aims to give a chronological account of the events in the earth's history.

☞ See the *Chart* on p. 904.

Further subdivisions, emphasizing special aspects, are: **astronomical** or **cosmical geology**, which treats of the earth as a planet; **geognosy** (which see), including petrography; **physiographic geology**, a geologic study of topography; **paleontologic geology**, which deals with the succession and significance of past life; **stratigraphic geology**, dealing with the relations and succession of the rock strata; **economic geology**, which deals with geological materials of practical utility. Geology is of comparatively recent development. Its basis as a true science may be said to have been laid by James Hutton (1726-97). It was advanced by the investigations of William Smith (1769-1839), and notably by the teachings of Sir Charles Lyell (1797-1875).

CHART OF GEOLOGIC TIME AND FORMATIONS

According to the nomenclature adopted by the International Geological Congress.

According to the accompanying chart, geological history is divided into five great ERAS, the Archæozoic, Proterozoic, Paleozoic, Mesozoic, and Cenozoic. Each era except the first is divided into PERIODS, as the Paleozoic into Cambrian, Ordovician, Silurian, etc. The subdivisions of the Proterozoic era, however, are not regarded by all as periods, primarily because the history of this era is not yet well worked out. Periods are divided into EPOCHS.

The rocks formed during an era constitute a *group*, as the *Paleozoic group;* those of a period constitute a *system*, as the *Cambrian system;* those of an epoch, a *series*, as the *Lower Devonian series;* and a series may be divided into still smaller subdivisions, variously known as *formations, stages*, etc. The use of the terms *group, system, series, formation*, etc., as well as of the corresponding time terms, *era, period, epoch*, etc., is somewhat variable.

The ARRANGEMENT OF THE FORMATIONS conforms to that of the natural order of the rocks, proceeding from the oldest, at the bottom, upward to the most recent. The divisions for North America and Europe, which are represented in the two wide columns (headed "North America" and "Europe" respectively) are by far the best known geologically, but the larger divisions of the chart hold throughout the world. The smaller subdivisions are not as a rule applicable to wide areas. In many such cases a typical section has been selected for the chart and its locality noted in italics. This does not imply that the names of such subdivisions may not be extended also to other regions.

The BASIS OF CLASSIFICATION is primarily chronological. Thus, the Cambrian rocks of America are believed to have been formed at the same time as the Cambrian rocks of Europe, as nearly as can be determined. Similarly the Triassic rocks of the different continents are believed to have been formed at about the same time. The chronology for different regions, as for different continents, is established chiefly by means of the fossils in the rocks. The correlation is based on the general assumption that the life of the different parts of the earth at any one period was similar (though not necessarily identical) to the life of other parts of the earth at the same time. The words given in the chart are often used substantively in the sense either of time division or rock formation, as, the *Paleozoic;* the *Silurian;* the *Niagaran*.

In the Chart **Eras** (*or* **Groups**) are indicated by bold-face type, as CENOZOIC; **Periods** (*or* **Systems**) by capitals, as PLEISTOCENE, **Epochs** (*or* **Series, Formations**) by capitals and small letters, as Lafayette.

		NORTH AMERICA (*after* CHAMBERLIN & SALISBURY, 1906)	EUROPE (*after* A. GEIKIE, 1903)
CENOZOIC	AGE OF MAMMALS	QUATERNARY: RECENT, OR HUMAN; PLEISTOCENE, OR GLACIAL — Thirteen stages. See GLACIAL PERIOD	QUATERNARY: RECENT, OR HUMAN; PLEISTOCENE, OR GLACIAL — A series of which the Lower Bowlder Clay is lowest.
		TERTIARY: PLIOCENE — Lafayette *Atlantic & Gulf Coastal Plains.* De Soto, Caloosahatchie in *Florida.*	TERTIARY OR CAINOZOIC: PLIOCENE — Newer. Older.
		MIOCENE — Chesapeake or Yorktown, of the *Atlantic Coast*	MIOCENE — Tortonian, Helvetian, Langhian in *France*, etc.
		OLIGOCENE — Not differentiated by all authors.	OLIGOCENE — Aquitanian, Stampian, Tongrian in *France*, etc.
		EOCENE — Upper, Middle, Lower (*East.*) Uinta, Bridger, Wasatch, Fort Union (*West*)	EOCENE — Upper. Middle. Lower.
MESOZOIC	AGE OF REPTILES	CRETACEOUS (UPPER CRETACEOUS) — Manasquan, Rancocas, Monmouth, Matawan (*Atlantic Coast.*) Laramie, Montana, Colorado, Dakota (*Western Interior*)	CRETACEOUS — Upper: Danian, Senonian, Turonian, Cenomanian, Albian (Upper Chalk, Middle Chalk, Lower Chalk, Gault and Greensand); Lower: Aptian, Urgonian, Neocomian, Wealden. *England.*

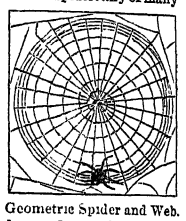
☞ In many of the phrases below either *geometric* or *geometrical* is in good usage, but the form shown is the more common one.

geometrical addition, *Math.*, the placing of vectors (or steps or strokes) in series (without change of direction of any), with the beginning of each following at end of the preceding; then the vector from the first beginning to the last end is the same, whatever be their order in the series, and is called their *sum*. — **g. chuck.** See CHUCK, *n.*, 4. — **g. clamp**, *Mech.*, a contrivance for applying and maintaining six mutual pressures between two rigid bodies touching each other at six points. — **geometrical construction**, *Math.*, one employing only ruler and compasses, or effected by drawing only right lines and circles; — opposed to *mechanical construction*, which may employ other means. — **g. continuity** *or* **principle of continuity**, *Math.*, the assumption, tacit or explicit in higher geometry, that extreme limiting forms are not dissociated from, but continuous with, the rest, with which they are to be classed and treated, and that general relations holding for an indeterminate state hold for all particular states derivable therefrom by continuous variation, even though in extreme cases the statement involve apparent absurdity: thus, since two lines in a plane meet in general, by this principle they are thought as meeting (at infinity) even when parallel; — first stated by Kepler, then employed by Desargues (1636), finally named and vindicated by Foncelet (1822). — **geometrical curve.** = ALGEBRAIC CURVE; — so called because its points may be constructed by the operations of elementary geometry. — **g. intuition**, intuitive apprehension or cognition of geometric or spatial relations and properties. — **g. isomerism**, *Chem.*, alloisomerism; stereoisomerism. — **g. lathe**, an instrument for engraving bank notes, etc., with complicated patterns of interlacing lines; — called also *cycloidal engine*. — **g. mean**, *Math.*, the second root of the product of two magnitudes. — **g. pace**, a length equal to 5 (or sometimes 4.4) feet; — so named as the average distance passed over by each foot from the time it leaves the ground to the time it next reaches it. See 1st PACE, 2. — **g. pen**, an instrument for drawing curves, in which the movements of a pen or pencil attached to a revolving arm of adjustable length may be indefinitely varied by changing the toothed wheels that move the arm. — **g. plane** *Persp.* = GROUND PLANE. — **g., *or* local, probability**, *Math.*, that part of the theory of probabilities that deals with problems in which the number of equally probable events is infinite, while the relative probabilities of total classes may yet be measured. — **g. progression** *or* **series**, one whose terms or elements progress by a constant factor, as 2, 6, 18, 54, . . . a, ar, ar^2, ar^3, . . . — **g. proportion**, *Math.* See PROPORTION. — **g. radius**, *Gearing*, the pitch-circle radius. — **g. ratio.** See RATIO. — **g. shadow**, *Physics*, the theoretical shadow outlined by drawing straight lines from the source through the edges of the opaque body. It differs from the actual shadow owing to diffraction (which see). — **g. solution**, *Math.*, one effected by geometry or analysis and hence exact; — opposed to *mechanical solution*, effected by actual measurements and hence empirical and inexact. — **geometric spider**, any of many species of spiders which spin a circular web, composed chiefly of radiating and spiral threads. They mostly belong to *Epeira* and allied genera, as the garden spider. — **geometrical square**, a portable instrument in the form of a square frame, used formerly for ascertaining distances and heights by measuring angles, a quadrat, a line of shadows. — **g. stairs**, continuous stairs turning or winding about a central well-hole which has rounded corners or is circular or elliptical, and having the strings and rails arranged upon geometric principles and running continuously from top to bottom. — **g. tracery**, in architecture and decoration, tracery arranged in geometrical figures. — **g. units**, *Math.*, units of length, area, volume, and angular magnitude both plane and solid; spatial units.



Geometric Spider and Web.

ge-om'e-tri'cian (jē-ŏm'ē-trĭsh'ăn), *n.* One skilled in geometry, a geometer, a mathematician

Ge'o-met'ri-dæ (jē'ō-mĕt'rĭ-dē), *n. pl* [NL., fr L. *geometra;* see GEOMETER] *Zoöl.* A very large and widely distributed family of moths. They are chiefly of medium size and slender build, with large wings, though in some the females are wingless. The larvæ, which often mimic stalks or twigs, usually have but two pairs of prolegs, and progress by a looping movement, bringing the posterior end forward, then advancing the anterior end, whence they are called *measuring worms, loopers*, etc. Many are injurious to trees and cultivated plants. The group is now often raised to the rank of a superfamily, and termed **Ge-om'e-tri'na** (jē-ŏm'ē-trī'nă). — **ge-om'e-trid** (jē-ŏm'ē-trĭd), *a. & n.* — **ge'o-met'ri-form** (jē'ō-mĕt'rĭ-fôrm), *a.* — **ge-om'e-trine** (jē-ŏm'ē-trĭn, -trīn), *a.*

Geometridæ Larva of a Geometrid Moth Nat. size.

ge-om'e-trize (jē-ŏm'ē-trīz), *v. i.* -TRIZED (-trīzd); -TRIZING (-trīz'ĭng). To investigate or make geometrical constructions; to work by geometrical principles or laws; — generally used with some reference to the passage in Plutarch, πῶς Πλάτων ἔλεγε τὸν θεὸν ἀεὶ γεωμετρεῖν (how often Plato used to say that God always geometrizes).

Nature *geometrizeth*, and observeth order in all things.
Sir T. Browne.

ge'o-met'ro-graph'ic (jē'ō-mĕt'rō-grăf'ĭk), *a. Geom.* Having the smallest possible index of simplicity.

ge'o-me-trog'ra-phy (-mē-trŏg'rā-fĭ), *n.* [*geometric* + *-graphy.*] *Math.* The analysis of geometric constructions into their most elementary operations, to determine the degree of their simplicity and their exactness.

ge-om'e-try (jē-ŏm'ē-trĭ), *n.; pl.* -TRIES (-trĭz). [F. *géométrie*, L. *geometria*, fr. Gr. γεωμετρία, fr. γεωμετρεῖν to measure land; γαῖα, γῆ, the earth + μετρεῖν to measure. So called because one of its earliest and most important applications was to the measurement of the earth's surface. See GEOMETER.] **1.** That branch of mathematics which investigates the relations, properties, and measurement of solids, surfaces, lines, and angles; the science that treats of the properties and relations of spatial magnitudes; the theory of space and of figures in space; as at present conceived, the doctrine of series of two or more dimensions.

2. A treatise on this science.

geometry of forces, *Math.*, the doctrine of complexes and congruences of forces (represented by vectors). — **g. of position**, *Math.*, the study of the change in position of a locus as determined by the change in its equation (*Carnot*); also, modern projective geometry, as not dealing with metrical properties. — **g. of the compasses**, *Math.*, a geometry that does not admit the straight edge in drawing, but allows only constructions and determinations by means of links rotating about pivots; the doctrine of linkages. See STRAIGHT-LINE MOTION. — **g. on an algebraic curve** *or* **surface**, the theory of only those properties of a curve or surface that belong to all curves or surfaces related in a birational manner to the fundamental curve or surface.

ge'o-mor'phic (jē'ō-môr'fĭk), *a.* [*geo-* + *-morphic*] Of or pertaining to the figure of the earth or the form of its surface; resembling the earth, geomorphological; as, *geomorphic* contour.

ge'o-mor-phog'e-ny (-môr-fŏj'ē-nĭ), *n.* [*geo-* + *morphogeny.*] Science that deals with the genesis of earth forms. — **ge'o-mor'pho-gen'ic** (-môr'fō-jĕn'ĭk), *a.*

ge'o-mor-phol'o-gy (jē'ō-môr-fŏl'ō-jĭ), *n.* [*geo-* + *morphology.*] **1.** That department of physical geography which deals with the form of the earth, the general configuration of its surface, the distribution of land and water, etc.

2. *Geol.* The investigation of the history of geologic changes through the interpretation of topographic forms.

ge'o-met'ri-cal-ly, *adv.* of GEOMETRICAL.

ge'o-mor'phist (jē'ō-môr'fĭst), *n.* A geomorphologist.

ge'o-mor-phog'e-nist (-môr-fŏj'ē-nĭst), *n.* A specialist, or one versed, in geomorphogeny.

ge'o-mor'pho-log'i-cal (-môr'fō-lŏj'ĭ-kăl), *a.* Of or pertaining to geomorphology.

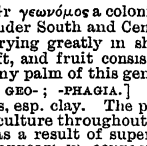
ge'o-mor'phy (jē'ō-môr'fĭ), *n.* = GEOMORPHOLOGY, 1.

Ge'o-mys (jē'ō-mĭs), *n.* [NL ; *geo-* + Gr. μῦς mouse.] *Zool.* A genus of North and Central American burrowing rodents containing the typical pocket gophers. It is the type of a family, **Ge'o-my'i-dæ** (-mī'ĭ-dē). — **ge-om'y-id** (jē-ŏm'ĭ-ĭd), *a. & n.*

Ge-on'o-ma (jē-ŏn'ō-ma), *n.* [Cf. Gr γεωνόμος a colonist.] *Bot.* A large genus of graceful slender South and Central American palms having leaves varying greatly in shape from nearly entire to pinnately cleft, and fruit consisting of a small dry berry. Also [*l. c.*], any palm of this genus.

ge-oph'a-gy (jē-ŏf'*a*-jĭ), *n.* [See GEO- ; -PHAGIA.] The practice of eating earthy substances, esp. clay. The practice is found among peoples of low culture throughout the world. Earth is sometimes eaten as a result of superstition, but ordinarily the practice appears in connection with malnutrition and often develops an appetite or craving the indulgence of which favors idiocy, chlorosis, etc.

Ge-oph'i-la (-*l*a), *n. pl.* [NL. ; *geo-* + Gr. φίλος loving.] *Zool.* The division of pulmonate gastropods which includes the land snails and slugs. It is equivalent to Stylommatophora.



Geophila. *a* A Snail (*Acanthinula harpa*). × 8 *b* A Slug (*Pallifera dorsalis*). Nat. size.

ge-oph'i-lous (-lŭs), *a.* [*geo-* + *-philous.*] *Biol.* **a** Living on or in the ground ; as, *geophilous* insects. **b** Of or pertaining to the Geophila.

ge'o-phys'ics (jē'ō-fĭz'ĭks), *n.* [*geo-* + *physics.*] *Geol.* The physics of the earth, or the science treating of the agencies which modify the earth, including dynamical geology and physical geography ; esp., the causes which bring about the movements and warpings of the surface of the lithosphere. — **ge'o-phys'i-cal** (-ĭ-kŭl), *a.* — **ge'o-phys'i-cist** (-ĭ-sĭst), *n.*

ge'o-pon'ic (jē'ō-pŏn'ĭk) } *a.* [Gr. γεωπονικός , γαῖα, γῆ, **ge'o-pon'i-cal** (-ĭ-kŭl) } earth + πονικός toilsome, fr. πόνος labor.] Pertaining to tillage or agriculture ; agricultural ; also, rustic. — **ge'o-pon'i-cal'i-ty** (-kăl'ĭ-tĭ), *n.*

ge'o-pon'ics (-ĭks), *n.* The art or science of cultivating the earth ; agriculture ; husbandry ; a treatise on agriculture

ge'o-ra'ma (-rā'ma), *n.* [*geo-* + Gr. ὅραμα sight, view, ὁρᾶν to see, view : cf. F. *géorama.*] A hollow globe on the inner surface of which a map of the world is depicted, to be examined by one standing inside.

George (jôrj), *n.* [OF *George, Jorge*, F. *Georges*, L. *Georgius*, Gr. Γεώργιος, fr. γεωργός a husbandman ; cf. γῆ, γαῖα, earth, and ἔργον work. Cf. WORK] **1.** Masc. prop. name. L. *Georgius* (jôr'jĭ-ŭs) ; F. *Georges, George* (zhôrzh) ; It. *Giorgio* (jôr'jō) ; Sp. *Jorge* (hôr'hā, 172, 189) ; Pg. *Jorge* (zhôr'zhē) ; G. *Georg* (gā-ôrg'). — Dim. *Georgie* (jôr'jĭ), *Geordie* (jôr'dĭ). — Fem. *Georgiana.*

2. A jewel showing a figure of St. George (the patron saint of England) on horseback, slaying the dragon, appended to the collar of the Order of the Garter ; also, a gold image of St. George on an oval of enamel encircled with a buckled garter, sometimes worn on a ribbon, crossing the breast, called the *little* or *lesser George.* See GARTER, 2, *Illust.*

3. A kind of brown loaf. Cf. BROWN GEORGE a. *Obs.*

4. An English coin bearing St. George's image ; as : **a** A half-crown. **b** A guinea. Called also *yellow George. Obs. Slang.*

Saint George, the patron saint of England The real St. George seems to have been a Cappadocian martyr of the 4th century. The story of the legendary St. George, who killed a dragon in Libya and rescued the princess Sabra, may be read in a ballad in Percy's "Reliques."

Geor'gi-a (jôr'jĭ-*a* ; -jā), *n.* One of the United States.

Georgia bark, the bark of a small tree of the southern United States (*Pinckneya pubens*) prized in cultivation for its large pink flowers. Its bitter bark is used as a tonic and febrifuge. — **G. pine.** **a** A valuable timber pine of the southern United States (*Pinus palustris*), frequently known as **long-leaf**, or **long-leaved, pine**, from its long leaves, borne three in a sheath. It is a prominent source of turpentine. **b** The hard yellow wood of this tree, much used in house building, esp. for flooring, partitions, etc. It is one of the most important American commercial timbers.

Geor'gi-an (-ăn), *a.* **1.** Of or relating to the reigns of the four Georges, kings of Great Britain , as, the *Georgian* era.

2. Of or pertaining to Georgia, one of the United States.

Georgian architecture, British or British colonial architecture of the period of the four Georges, especially that of the period before 1800. — **G. planet.** = GEORGIUM SIDUS.

Geor'gi-an (jôr'jĭ-ăn), *a.* Of or pertaining to Georgia, in Transcaucasia, or the Georgians.

Georgian version (of the Bible). See VERSION.

Geor'gi-an, *n.* A native of, or dweller in, Georgia, U. S. A.

Geor'gi-an, *n.* A member of a race of mountaineers of the Caucasus, noted for their physical beauty (see CAUCASIAN, *a.*, 2). They speak an agglutinative language not known to be related to any other. Its alphabet, of 40 letters (originally 28), is traditionally ascribed to Mesrob, about 400 A. D., and is closely related to the Armenian. Cf. ARMENIAN, *n.* ; MESROPIAN.

geor'gic (jôr'jĭk) } *a.* [L. *georgicus*, Gr. γεωργικός, fr.
geor'gi-cal (-jĭ-kŭl) } γεωργία tillage, agriculture. See GEORGE.] Relating to agriculture and rural affairs.

ge-os'co-py (jē-ŏs'kō-pĭ), *n.* [*geo-* + *-scopy.*] Knowledge of the earth, ground, or soil, obtained by inspection. — **ge'o-scop'ic** (jē'ō-skŏp'ĭk), *a.*

ge'o-sphere (jē'ō-sfēr), *n.* [*geo-* + *sphere.*] *Phys. Geog.* A spheroidal envelope or component of the earth ; specif., the solid earth, as disting. from hydrosphere and atmosphere.

ge'o-stat'ic (-stăt'ĭk), *a.* [*geo-* + *static.*] *Civil Engin.* Relating to the pressure exerted by earth or a similar substance. — **geostatic arch**, an arch having a form adapted to sustain pressure similar to that exerted by earth.

ge'o-stat'ics (-ĭks), *n.* [*geo-* + *statics.*] *Physics.* That part of the mechanics of rigid bodies which deals with balanced forces , statics as applied to rigid bodies.

ge'o-syn'cline (-sĭn'klīn), **ge'o-syn-cli'nal** (-sĭn-klī'năl), *n.* [See GEO- ; SYNCLINAL.] *Geol.* A great downward flexure of the earth's crust ; — opposed to *geanticline.* — **ge'o-syn-cli'nal**, *a.*

ge'o-tax'is (-tăk'sĭs), *n.* [NL. ; *geo-* + Gr. τάξις an arranging.] *Biol. & Physiol.* The influence of gravity on the movements of organisms — **ge'o-tac'tic** (-tăk'tĭk), *a.* — **ge'o-tac'ti-cal-ly** (-tĭ-kăl-ĭ), *adv.*

ge'o-tec-ton'ic (-tĕk-tŏn'ĭk), *a.* [*geo-* + *tectonic.*] *Geol.* Structural ; pertaining to the form, arrangement, and structure of the rock masses composing the earth's crust ; as, *geotectonic* geology.

ge'o-ther'mal (-thûr'măl) } *a* [*geo-* + *thermal, thermic.*]
ge'o-ther'mic (-thûr'mĭk) } *Geol.* Of or pertaining to the heat of the earth's interior. — **geothermic degree**, *Geophysics*, the average depth within the crust of the earth corresponding to an increase of one degree of temperature.

ge'o-ther-mom'e-ter (-thĕr-mŏm'ē-tĕr), *n.* [*geo-* + *thermometer.*] *Physics.* A thermometer, as a recording thermometer or an electrical-resistance thermometer, specially constructed for measuring temperatures at a depth below the surface of the ground.

Ger'man-ist, *n.* **1.** One learned in the German language or in Germanic philology; also, one familiar with or influenced by German life, customs, or modes of thought.

2. *Hist.* A historian who magnifies the influence of Teutonic, and esp. Germanic, institutions in the development of European civilization; — opposed to *Romanticist*.

ger-ma'ni-um (jĕr-mā'nĭ-ŭm), *n.* [NL., fr. L. *Germania* Germany.] *Chem.* A grayish white rare metallic element, found combined in argyrodite and a few other rare minerals. Symbol, *Ge*; atomic weight, 72.5. Germanium was discovered in 1886 by the German chemist Winkler. It is bivalent and quadrivalent, resembles carbon and silicon in some respects and tin in others, and in general fulfills the prediction of Mendelyeev, who described it under the name of *ekasilicon*. Cf. GALLIUM.

Ger'man-i-za'tion (jûr'măn-ĭ-zā'shŭn; -ī-zā'shŭn), *n.* Act of Germanizing, or state of being Germanized.

Ger'man-ize (jûr'măn-īz), *v. t.* = GER'MAN-IZED (-īzd); GER'MAN-IZ'ING (-īz'ĭng). **1.** To translate into German.

2. To make German, or like what is distinctively German; as, to *Germanize* a province, a language, a society.

Ger'man-ize, *v. i.* To adopt German ways of thought and action; to become German in sympathies, style, or habits.

Ger'ma-no- (jûr'mȧ-nŏ-). A combining form for *German*.

germ cell. *Biol.* A cell whose function is the perpetuation of the race; one which is set apart from the rest of the body, to develop, usually after union with another of the opposite sex, into a new individual; an egg or sperm cell, or one of their antecedent cells; — opposed to *somatic cell*.

ger'mi-cide (jûr'mĭ-sīd), *n.* [*germ* + *-cide*.] Any substance or agent which destroys microörganisms. See STERILIZE, ANTISEPTIC, DISINFECTANT. — **ger'mi-cid'al** (-sīd'ăl), **ger'mi-cide** (-sīd), *a.*

ger'mi-nal (-năl), *a.* [See GERM.] Pertaining to a germ, in any sense; incipient, esp., *Biol.*, pertaining to a germ cell or an early stage of an embryo.

germinal apparatus. *Bot.* = EGG APPARATUS. — **g. area.** *Embryol.* = GERMINAL DISK. **a.** — **g. corpuscle.** *Bot.* = OOSPHERE. — **g. disk.** *Embryol.* **a** A disklike or shield-shaped area of the blastoderm of eggs of amniote vertebrates, in which the first indications of the embryo proper appear. **b** In meroblastic eggs with much yolk, the disklike protoplasmic part, which undergoes segmentation. — **germinal epithelium,** *Embryol. & Anat.*, the epithelium covering the genital ridges and the glands (ovary and testis) derived from them. In this epithelium the primordial ova are found. See PRIMORDIAL OVA. — **g. layers.** *Biol.* = GERM LAYERS. — **g. membrane.** *Embryol.* = BLASTODERM. — **g. spot,** *Embryol.*, the nucleolus of the germinal vesicle. — **g. vesicle,** a *Embryol.* The nucleus of the egg before the formation of the polar bodies. **b** *Bot.* = OOSPHERE.

ger'mi-nant (jûr'mĭ-nănt), *a.* [L. *germinans*, p. pr.] Germinating; sprouting; sending forth germs or buds; having the capacity for sprouting and developing.

ger'mi-nate (-nāt), *v. i.*; GER'MI-NAT'ED (-nāt'ĕd); GER'MI-NAT'ING (-nāt'ĭng). [L. *germinatus*, p. p. of *germinare* to sprout, fr. *germen*. See GERM.] **1.** To begin to grow or develop; — said esp. of a spore or seed, and, by extension, of a bud or plant; to sprout.

2. To shoot forth like a plant; efflorescе, as salts. *Obs.*

ger'mi-nate, *v. t.* To cause to sprout or develop.

ger'mi-na'tion (-nā'shŭn), *n.* [L. *germinatio*, cf. F. *germination*.] **1.** Process of germinating; beginning of vegetation or growth; as: *Bot.* **a** Beginning of growth or development of a spore. **b** Resumption of growth by the embryo in a seed after planting; sprouting. **c** Development of a bud.

2. Efflorescence; ebullition. *Obs.*

ger'mi-na-tive (jûr'mĭ-nā-tĭv), *a.* [Cf. F. *germinatif*.] Pertaining to germination; having power to grow or develop. — **ger'mi-na-tive-ly,** *adv.* — **germinative spot, g. vesicle.** = GERMINAL SPOT, GERMINAL VESICLE

ger'mi-na'tor (-nā'tĕr), *n.* **1.** One that causes to grow.

2. A device for testing the germinating capacity of seeds.

germ layer. *Embryol.* Any of the layers of cells that are differentiated in the early stages of embryonic development. In the formation of a gastrula or equivalent embryonic form two layers, an outer, the *epiblast*, or *ectoderm*, and an inner, the *hypoblast*, or *endoderm*, are formed. They are both epithelial in character. Later a third, the *mesoblast*, or *mesoderm*, usually appears between them, being formed from the hypoblast in many cases at least. In the lower Metazoa the mesoblast (if not wanting, its place being taken by a jellylike mesoglœa) has entirely the character of mesenchyma, but in the higher forms it also forms two epithelial layers which take part in forming the somatopleure and splanchnopleure (see these terms) and bound a cavity, the *cœlom*, or *body cavity*. In the vertebrates the epiblast gives rise to the epidermis, the nervous system, the enamel of the teeth, the crystalline lens, the sensitive epithelia of the eye, ear, and nose, etc.; the hypoblast to the lining epithelium of most of the alimentary canal and its appendages (the lungs, liver, pancreas, etc.); and the mesoblast to the muscles, bones, dentine, cartilage, connective tissues, the vascular system, and most of the urogenital structures.

germ nucleus. a *Biol.* The nucleus of the egg or sperm cell. **b** *Bot.* The nucleus resulting from the fusion of male and female pronuclei.

germ plasm, *or* **germ plasma.** *Biol.* The substance contained in the germ cells, by which hereditary characters are transmitted; idioplasm (which see).

germ pore. *Bot.* A pore or pit in the integument of a spore through which the germ tube makes its exit on germination. It is prominent in the microspores (pollen grains) of seed plants.

germ theory. a *Biol.* The theory that living organisms can be produced only by the development of living germs. Cf. BIOGENESIS, ABIOGENESIS. **b** *Med.* The theory which attributes contagious and infectious diseases, suppurative lesions, etc., to the agency of germs or microparasites. The science of bacteriology was developed after the truth of this theory had been demonstrated.

germ tube. *Bot.* The slender tubular outgrowth first produced by a spore in germination.

ge-ron'tic (jĕ-rŏn'tĭk), *a.* [Gr. γεροντικός pertaining to an old man, fr. γέρων, -οντος, an old man.] *Biol.* Of or pertaining to decadence or old age, either of an individual or of a species or group approaching extinction.

ge-ron'tine (-tĭn; -tēn; 184), *n.* Also **-tin.** [Gr. γέρων, -οντος, an old man, old.] *Physiol. Chem.* A crystalline base, $C_5H_{14}N_2$, from the liver and kidneys, esp. of old dogs. It is an isomer of cadaverine, which it resembles.

ger'on-toc'ra-cy (jĕr'ŏn-tŏk'rȧ-sĭ), *n.*; *pl.* -CIES (-sĭz). [Gr. γέρων, -οντος, an old man + *-cracy*.] Government by old men; a governing body of old men.

ge-ron'to-ge'ous (jĕ-rŏn'tō-jē'ŭs), *a.* [Gr. γέρων, -οντος, an old man + γῆ earth + *-ous*.] Pertaining to the Old World, or the Eastern Hemisphere.

ger'o-pig'i-a (jĕr'ō-pĭj'ĭ-ȧ), **ger'o-pi'ga** (-pē'gȧ), *n.* [Pg *geropiga*.] A mixture, variously composed, for adulteration of wines. It is manufactured in Portugal.

-gerous (-jĕr-ŭs). [L. *-ger*, fr. *gerĕre* to bear, carry. See JEST.] A suffix signifying *bearing, producing*; as, crystalli*gerous*, producing crystals, dentiger*ous*. It forms derivatives freely with any Latin stems, always after *i* as a stem or connecting vowel.

☞ The reference "See -GEROUS" is sometimes given as the only definition of a word ending in *-gerous*, if its meaning can readily be gathered from the definitions of the suffix and the root word.

ger'ry-man'der (gĕr'ĭ-măn'dĕr), *v. t.*; GER'RY-MAN'DERED (-dĕrd); GER'RY-MAN'DER-ING. [*Gerry* + *salamander*.] To divide (a State, county, etc.) into election districts or

U. S. — **ger'ry-man'der-er** (gĕr'ĭ-măn'dĕr-ĕr), *n.*

In 1812, while Gerry was governor of that State, the Republican [corresponding to *Democratic* in modern nomenclature] legislature redistributed the districts in such wise that the shapes of the towns forming a single district in Essex County gave to the district a somewhat dragon-like contour. This was indicated upon a map of Massachusetts which Benjamin Russel, an ardent Federalist and editor of the "Centinel," hung up over the desk in his office. The celebrated painter, Gilbert Stuart, coming into the office one day and observing the uncouth figure, added with his pencil a head, wings, and claws, and exclaimed, "That will do for a salamander!" "Better say a *Gerrymander!*" growled the editor; and the outlandish name, thus duly coined, soon came into general currency.

Gerrymander. See *Citation.*

John Fiske.

☞ This division of northeastern Massachusetts was wrongly attributed to Gerry's influence.

ger'ry-man'der (gĕr'ĭ-măn'dĕr), *n.* The act or method of gerrymandering, or its result.

Grace was in all her steps, heaven in her eye,
In every *gesture* dignity and love. *Milton.*

3. The use of movements of the limbs or body as a mode of expression.

Syn. — GESTURE, GESTICULATION. In modern usage, GESTURE applies to any expressive bodily movement; GESTICULATION commonly suggests the use of (esp.) rapid, unrestrained, or undignified *gestures;* as, "The right [hand of Niobe] is drawing up her daughter to her; and with that instinctive *gesture* . . . is encouraging the child to believe that it can give security" (*Shelley*); "His [Poussin's] human figures are sometimes 'o'erinformed' with . . . feeling. Their actions have no such *gesticulation*" (*Hazlitt*).

ges'ture (jĕs'tūr), *v. t.;* GES'TURED (-tūrd); GES'TUR-ING (-tūr-ĭng). **1.** To accompany or illustrate with gesture or action.

get (gĕt), *v. t.; pret.* GOT (gŏt), *Archaic* GAT (găt), *p. p.* GOT, (*esp. in U. S.*) GOT'TEN (gŏt'n); *p. pr. & vb. n.* GET'TING. [ME. *geten*, fr. Scand.; cf. Icel. *geta*, akin to AS. *gītan, ġietan* (in comp.), Goth. *bigitan* to find, L. *prehendere* to seize, Gr. χανδάνειν to hold. Cf. BEGET, COMPREHEND, ENTERPRISE, FORGET, IMPREGNABLE, PREHENSILE.]

1. To come by; to come into possession of, as property, or to come to realization of, as fame; to take and have or to arrive at and have; to cause or suffer (something) to fall to one's self (or itself); — the most general word in English for this sense. It is equivalent: a In active senses to: Obtain, procure, acquire; as, to *get* money; to *get* possession; ascertain, learn, determine, induce; as, to *get* a lesson; to *get* knowledge; to *get* the range of; to *get* a conclusion or solution; hence, in a somewhat passive sense, to *get* wisdom or experience; gain, win, achieve; as, to *get* a victory, *get* glory; *get* favor, earn, derive; as, to *get* a living; to *get* a fair profit. b In passive senses, or without the notion of special effort or design, *get* is equivalent to: Receive; as, to *get* a rich gift; to *get* a pardon or a light sentence; meet with, attain, obtain; as, to *get* a good night's rest; to *get* an opportunity; contract, catch, take; as, to *get* the measles; suffer; as, to *get* a bad fall.

2. Hence, in idiomatic uses: a To obtain the right or privilege of; as, to *get* speech with some one; to *get* some one's ear, that is, to get access to, or speech with, him. b To obtain or reach by some understood process, as agriculture, hunting or fishing, sounding, etc.; as, to *get* a fine stag, or a big crop; to *get* bottom. c To obtain in marriage. "If I could *get* this foolish Imogen." *Shak.* d To capture; as, the policeman *got* the thief. e To receive a sentence of; as, to *get* three months. *Colloq.* f To pen in; corner; as, he *got* me in the argument. *Colloq.* g To find by or as if by search; as, what have you *got* now to worry about? *Chiefly Colloq.* h To reach; arrive at (a place); as, to *get* the west shore.

3. With *have* and *had:* Pleonastically, to come into or be in possession of; to have. "Thou hast *got* the face of man." *Herbert.* With *to*, to be obliged to; as, he has *got* to do it. *Colloq.*

4. To procure to be, or to cause to be, in any state, position, or condition; as, to *get* one's feet wet; to *get* the sails bent; to *get* the boat ready; to *get* one into a scrape.

They will have *got* spread through all ranks. *M. Arnold.*

Red deer had been *got* preserved. *Carlyle.*

5. To prevail on; to induce; to persuade.

Get him to say his prayers. *Shak.*

6. To betake; to remove; — in a reflexive use.

Get thee out from this land. *Gen.* xxxi 13.

7. To beget; to procreate; to generate; — now used of animals almost exclusively.

I had rather to adopt a child than *get* it. *Shak.*

Syn. — Obtain, gain, win, acquire, procure, secure. **to get ground,** to go ahead; to advance. *Obs. or R.* — **to g. ground of,** to get the better of; to encroach upon the territory or position of. *Obs.* — **to g. hand,** to gain influence. *Obs.* "Appetites have . . . *got* such a *hand* over them." *Barter.* — **to g. head.** To gain force, power, or ascendancy. *Obs. or R.* — **to g. in.** a To collect; secure; lay in; store as, to *get in* hay, collections, a supply of fuel, etc. b To plant. c To harness. d To include. e To make effective; to land (a blow). — **to g. it,** to receive punishment or something disagreeable; to "catch it." *Colloq.* — **to g. off.** a To utter; to discharge; to dispose of; as, *to get off* a joke; *to get off* his merchandise. b To secure the escape, or remission of the punishment, of; as, his lawyers *got* him *off* with a suspended sentence. c To learn; as, *to get off* a passage

Syn. — Deathly, deathlike, pale, pallid, wan, cadaverous, hideous, frightful, horrible, terrible. — GHASTLY, GRISLY, GRUESOME, GRIM, LURID agree in suggesting the terrifying aspects of death or bloodshed; it is frequently used as a strong intensive for *hideous, horrifying*; as, "smeared with gore, and *ghastly* pale" (*Gray*), "Death grinned horrible a *ghastly* smile" (*Milton*); "the image of a hideous — of a *ghastly* thing — of the gallows!" (*Poe*). That is GRISLY (in modern usage more commonly GRUESOME) which inspires shuddering or uncanny horror; as, "So spake the *grisly* Terror" (*Milton*); "See the *grisly* texture grow — 't is of human entrails made" (*Gray*), "Look down, and see a *grisly* sight; a vault where the bodies are buried upright!" (*Wordsworth*); the *gruesome* details of a murder. GRIM suggests a fierce and forbidding aspect; as, "So should a murderer look, so dead, so *grim*" (*Shak.*), "with countenance *grim* glared on him passing" (*Milton*). LURID (see *wan*, under PALE) comes into comparison with *ghastly* as referring to light or color; it suggests either wanness or pallor (as, "Death . . . pale as yonder wan and horned moon, with lips of *lurid* blue," *Shelley*) or more frequently, in modern usage, a sinister and murky glow; as, "He caught the color of what was passing about him . . . but mixed . . . with a *lurid* and portentous hue" (*Hawthorne*); "fitful and *lurid* . . . dreams" (*M. Hewlett*). See FEARFUL.

8. A false stellar image or foggy appearance produced in an optical instrument by some defect, as internal reflection in a lens.

9. One who does work, esp. of an artistic or literary nature, for another person who takes the credit. *Cant.*

Syn.—GHOST, SPECTER, PHANTOM, APPARITION, SHADE, PHANTASM, SPIRIT. GHOST is the familiar and general term for a disembodied spirit; SPECTER (not necessarily personal) connotes more of the mysterious or terrifying; PHANTOM emphasizes the idea of intangibility or illusion: as, "*Ghosts*, wandering here and there, troop home to churchyards" (*Shak.*); "grisly *specters*, which the Fiend had raised" (*Milton*); "strange *phantoms* rising as the mists arise" (*Pope*); cf. "Samminiato looms *ghostly* upon you and fades slowly out" (*M. Hewlett*); "One eye had lost its pupil, and was glaring and *spectral*" (*Irving*); "For lo! the new-moon winter bright! . . . with swimming *phantom* light o'erspread" (*Coleridge*); "shadowy valleys, *spectral* hollows, *phantom* slopes of pallid . . . green" (*Lafcadio Hearn*). APPARITION, though commonly referring to *ghosts* (esp. as visible), is applicable to preternatural appearances of whatever sort; as, "[Enter the *ghost* of Cæsar] . . . I think it is the weakness of mine eyes that shapes this monstrous *apparition*" (*Shak.*); "Lovely *apparitions* . . . shall visit us, the progeny immortal of Painting, Sculpture, and rapt Poesy" (*Shelley*). SHADE (a somewhat literary word, commonly with classical reference) agrees with *phantom* in connoting impalpability; it differs in emphasizing essential quality rather than mode of appearance; as, "mighty heroes' more majestic *shades*" (*Dryden*); "'How once we loved, remember still, till you are dust like me'—'Dear *Shade!* I will'" (*Pope*). PHANTASM (still occasionally poetic for *phantom*) may denote an illusion of any sort, esp. (in recent technical usage) the apparition of an absent person, whether living or dead; as, "*Phantasm* of Jupiter, arise, appear!" (*Shelley*); [title] "*Phantasms* of the Living" (*Gurney*). SPIRIT (see SOUL) is often synonymous with *ghost* or *specter* (as, "I can call *spirits* from the vasty deep," *Shak.*); in recent usage it is esp. associated with the doctrine of spiritualism; as, "What's a 'medium?' He's . . . the only means *spirits* can speak by" (*R. Browning*).

ghost dance. A religious dance of the North American Indians, participated in by both sexes, and looked upon as a rite of invocation the purpose of which is, through trance and vision, to bring the dancer into communion with the unseen world and the spirits of departed friends. The dance is the chief rite of the **ghost-dance,** or **messiah, religion,** which originated about 1890 in the doctrines of the Piute Wovoka, the Indian Messiah, who taught that the time was drawing near when the whole Indian race, the dead with the living, should be reunited to live a life of millennial happiness upon a regenerated earth. The religion inculcates peace, righteousness, and work, and holds that in good time, without warlike intervention, the oppressive white rule will be removed by the higher powers. The religion spread through a majority of the western tribes of the United States, only in the case of the Sioux, owing to local causes, leading to an outbreak.

GIGANTIC.] **1.** A mythical manlike or monstrous being of huge stature and strength, and of more than mortal, but less than godlike, power and endowment. In mythology the giants are commonly represented as an early race warring with and overcome by the gods. Thus, in classic myth the giants are an early savage race, represented as sprung from the blood of Uranus (heaven), when wounded by Cronus, as it fell upon the earth (Gæa), or as sons of Gæa and Tartarus (hell). They are overthrown by the Olympians in the Gigantomachy (which see). (Cf. ALOADÆ, TITAN.) In Teutonic mythology there is likewise hostility between the gods and the giants, or Jotuns (who join the forces of Hel at Ragnarok), although there are also friendly relations, the Teutonic giants and giantesses personifying kindly and beneficent as well as evil natural forces. Cf. ÆGIR, FAFNIR, FENRIR, *Gerth* (under FREY), *Grendel* (under BEOWULF), HYMIR, LOKI, MIDGARD SERPENT, MIMIR, WADE, YMIR. Celtic myth also has its god-contending giants (cf. FOMORS), and they appear in medieval romance and in nursery tales, where many of their mythical traits are preserved, such as the power of assuming animal forms, anthropophagy, and their wild, unsociable character. In the Bible the word is used variously to designate prehistoric or mythical races or beings, or men or peoples of unusual size and strength.

Behold the *giants* groan under the water.
Job XXVI. 5 (*Douay Ver.*)

2. A man of extraordinary stature; either a person of a race having an unusually great stature and strength, or an individual of abnormal stature; one characterized by giantism (which see).

See GIANT STRONGYLE, below. — **g. lily. a** A tropical American amaryllidaceous plant (*Furcræa gigantea*) having leaves and flowers like those of the agave. It is cultivated in several countries for its fiber, known as *Mauritius hemp*, which resembles sisal hemp. The plant is variously called also *cabuya, cocuisa*, and *giant fiber lily*. **b** The Australian amaryllidaceous plant *Doryanthes excelsa*, bearing spikes of showy crimson flowers. — **g. nettle,** a tall Australian nettle (*Urticastrum gigas*) which yields a strong fiber. — **g. parsley,** the cow parsnip. — **g. parsnip,** the cow parsnip. — **g. petrel.** = GIANT FULMAR. — **g. poppy,** a white-flowered papaveraceous shrub (*Romneya coulteri*) of California and Mexico. — **g. powder,** a form of dynamite consisting of a mixture of nitroglycerin and kieselguhr. — **g. puffball,** a common puffball (*Calvatia bovista*), edible when young. — **giant reed,** a tall bamboolike grass (*Arundo donax*) native of southern Europe, much cultivated as a garden ornamental, also, the closely related grass *Trichoon phragmites*. — **g. rye grass,** a rye grass (*Elymus condensatus*) of the western United States, used as a sand binder on railroad banks and as a garden ornamental. — **g. salamander,** the largest existing salamander (*Cryptobranchus* or *Megalobatrachus maximus*), found in mountain streams in Japan and China. It becomes three to five feet in length, and is eaten by the natives. — **g. scale,** any of several very large Australian scale insects of the genus *Monophlebus*, found on eucalyptus trees. Some of them are about an inch long. — **g. sequoia.** See SEQUOIA. — **g. squid,** any of several species of very large squids of *Architeuthis* (which see) and allied genera. — **g. strongyle.** A nematode worm (*Dioctophyme renale*) the female of which becomes nearly a yard long. It infests the kidneys of mammals, esp. dogs, and those which eat fish, and has been found in man. — **g. swelling,** *Med.*, a form of angioneurosis marked by a sudden and considerable swelling of the part of the surface of the body supplied by a particular nerve. — **g. swing,** *Gymnastics*, a complete swing of the body at full arms' length around a horizontal bar. — **g. tortoise,** any of a number of species of large land tortoises of the genus *Testudo*, which were formerly found abundantly on the islands of the western Indian Ocean, esp. the Mascarenes, and on the Galapagos Islands. On these islands there were no large animals to harm them, but since their discovery by man they have been rapidly exterminated, and most of the species (there being usually but one species on a single island) are already extinct. Large specimens measure three or four feet in length of shell and weigh several hundred pounds. They move slowly and feed on grass and vegetable substances. They may attain an age of at least 200 years. One of the best-known kinds is the elephant tortoise (*T. gigantea*), native of North Aldabra Island, but still existing on the Seychelles, where it was introduced. — **g. urticaria,** *Med.*, a form of urticaria marked by an eruption of unusually large wheals.

Giant Despair. In Bunyan's "Pilgrim's Progress," a giant, the owner of Doubting Castle, who, finding Christian and Hopeful asleep upon his grounds, takes them prisoners, and thrusts them into a dungeon.

gift (gĭft), *n.* [ME. *gift*, prob. fr. Scand.; cf. Icel. *gift, gipt*, akin to D. & G. *gift*, Goth. *gifts* (in comp.), and AS. *gift* amount paid for a wife, whence prob. ME. *yift, yefi, 3ift, 3eft.* See GIVE, *v. t.*] **1.** The act, right, or power of giving or bestowing; as, the office is not in his *gift.*

2. Anything given; anything voluntarily transferred by one person to another without compensation; a present.

3. *Law.* **a** With respect to real estate, formerly, any form of alienation; later, specif., the conveyance of an estate tail, as distinguished from a *feoffment* or from a *demise* or *lease.*

And so in the 13th century every sort and kind of alienation (that word being here used in its very largest sense) is a "*gift*," and yet it is a *gift* which always, or nearly always, leaves some rights in the giver. . . . In all these cases there will be a "*gift*," and precisely the same two verbs will be used to describe the transaction; the donor will say I have given and granted (*sciatis me dedisse et concessisse*) *Pollock & Mait.*

b A voluntary transfer of real or personal property without any consideration, or more strictly without a valuable consideration; — distinguished from *sale.* The essential elements of a *gift* are an intention to give, transfer of title or delivery, and acceptance by the donee. The gift can be perfected only by deed, or in case of personal property by such a delivery of possession as completely divests the giver of his *legal* possession and control, as by delivery to the donee in person or to some one for his use. A gift in anticipation of impending death is revocable until the death of the giver, and then becomes absolute.

On principle the delivery of possession essential to the validity of a *gift* should be satisfied by a constructive as well as by an actual delivery of possession. *Williams on Personal Property.*

4. A bribe; anything given to corrupt. *Obs.*

A *gift* doth blind the eyes of the wise. *Deut.* xvi. 19.

5. Some quality or endowment given to man by God or a deity; a preeminent and special talent or aptitude; as, the *gift* of wit; a *gift* of faith; *gifts* of the gods.

6. A white speck on the finger nail, which, according to an old superstition, portends a present. *Colloq. or Dial.*

Syn. — Ability, capacity; readiness, address; bent, turn, bias, tendency. — GIFT, ENDOWMENT, FACULTY, APTITUDE, TALENT, KNACK agree in the idea of ability, esp. as exercised with ease (see ACQUIREMENT). GIFT, as here compared (see PRESENT), connotes a quality conferred by favor of nature or fortune, and is a somewhat less formal term than ENDOWMENT or (more frequently) ENDOWMENTS; as, "Though the *knack* of versifying is a *gift*, the art is an acquirement" (*Southey*); "the tragic story of a high *endowment* with an insufficient will" (*Carlyle*). In FACULTY, as here compared, the suggestion of something bestowed gives place to the implication of native address or ability, happily or easily employed, whereas APTITUDE denotes a bent or turn, native or acquired, for some particular activity or pursuit; as, the happy *faculty* of ignoring rebuffs; an *aptitude* for affairs. TALENT (see GENIUS) combines with the implication of specific direction, as in *aptitude*, the suggestion of large capacity for cultivation and achievement; as, a rare *talent* for music. KNACK adds to *aptitude* the implication of dexterous and adroit performance, as if by a certain trick or sleight; as, "She has, certainly, something of a *knack* at characters" (*Mad. D'Arblay*), the *knack* of putting things. See BENT, TURN, PREDILECTION, VEIN.

Beaumont and Fletcher . . had, with the advantage of Shakespeare's wit, . . . great natural *gifts* improved by study. *Dryden*

Butler was compelled by the *endowment* of his nature to strive for a profound . . . conception of religious things *M. Arnold.*

The highest . . . of science is, one may say, an inventive power, a *faculty* of divination. *M. Arnold*

The art [of expression] . . . comes from an organic *aptitude* not less special, when possessed with fullness, than the *aptitude* for music and drawing. . . . To write well . . . is not an accomplishment, but a talent. *G. H. Lewes.*

These things are not to be learnt; they depend upon a *knack* that comes . . . with one's mother's blood. *Hawthorne.*

gift of gab, the gift of facile expression. *Slang.* — **g. of tongues,** a charism attributed to some of the Christians of New Testament times, the precise nature of which is uncertain, but which was apparently a kind of ecstatic utterance usually unintelligible to the hearers and even to the speakers, therefore requiring interpretation; glossolalia. Phenomena thought to be similar to this have in modern times been attributed to some of the early Friends, Jansenists, Methodists, Camisards, and members of the Catholic Apostolic Church.

gift (gĭft), *v. t.;* GIFT'ED; GIFT'ING. **1.** To endow with a gift, esp. of some power or faculty; — chiefly in *p. p.*

He was *gifted* . . . with philosophical sagacity. *I. Taylor.*

4. To give, as to iron, an appearance of being covered with ice or frost.

gla'ci-a'tion (-ā'shŭn), *n.* Process of glaciating, or state of being glaciated; also, the production of glacial phenomena.

gla'cier (glā'shẽr; glă'sĭ-ẽr; 277), *n.* [F. *glacier*, fr. *glace* ice, L. *glacies.*] A field or body of ice, formed in a region of perpetual snow, and moving slowly down a mountain slope or valley, as in the Alps, or over an extended area, as in Greenland. The mass of granular snow forming the upper part of a glacier is called the **firn**, or **névé.** The body of the glacier consists of solid ice, formed from snow by pressure, by the freezing of descending water, etc. The surfaces of glaciers are sometimes smooth, but they are more commonly crevassed, the crevasses being due to irregularities of bed, to inequalities of movement, and perhaps to other causes. **Ice caps**, such as those of Greenland and Antarctica, are the largest glaciers known, and cover areas whose topography (beneath the ice) is unknown; small ice caps occur on plains or plateaus, esp. in high latitudes. **Piedmont glaciers** occur at the bases of mountains, and are formed by the union of the deploying ends of valley glaciers. A valley glacier usually carries rock débris (accumulations of stones and earthy matter), called **moraines**, upon its surface. See MORAINE, DRIFT. Glaciers also carry rock débris in their basal parts, and this grinds, scores, and polishes the surface over which the ice moves. Many alpine glaciers move from ten to twenty inches per day in summer, and about half as fast in winter; the larger valley glaciers of the polar regions move several feet per day, but the edge of the ice cap of Greenland probably moves but few inches per week. If the end of a glacier reaches the sea it may break off and float away as an **iceberg.**

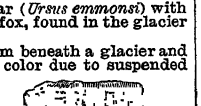
The Viesch Glacier, with Medial Moraine.

glacier bear. A rather small bear (*Ursus emmonsi*) with fur resembling in color the silver fox, found in the glacier region of southern Alaska.

glacier milk. Water issuing from beneath a glacier and exhibiting a characteristic white color due to suspended particles of triturated rock.

glacier table. A block of stone left and supported above the surface of a glacier on a column of ice formed by the melting away of the surrounding glacier ice.

glacier theory. Also **glacial theory.** *Geol.* The theory that the drift was deposited by the agency of glaciers during the glacial period (which see).



Glacier Table.

gla'ci-ol'o-gy (glā'shĭ-ŏl'ŏ-jĭ; glă'sĭ-), *n.* [See GLACIER; -LOGY.] The branch of geology which treats of glaciers. — **gla'ci-o-log'i-cal** (glā'shĭ-ŏ-lŏj'ĭ-kȧl; glă'sĭ-), *a.* — **gla'ci-ol'o-gist** (-ŏl'ŏ-jĭst), *n.*

gla'ci-o-na'tant (-ō-nā'tănt), *a.* [See GLACIER; NATANT.] Pertaining to, characterizing, or resulting from, floating ice, esp. that which has its origin in glaciers.

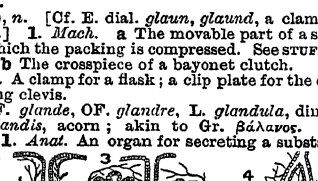
gland, *n.* [F. *glande,* OF. *glandre,* L. *glandula,* dim. of L. *glans, glandis,* acorn; akin to Gr. βάλανος. Cf. GLANDERS.] **1.** *Anat.* An organ for secreting a substance or substances to be used in, or eliminated from, the body; as, the sebaceous *glands* of the skin; the salivary *glands* of the mouth. The essential elements of a gland are the epithelial cells, which select out from the blood (and in many cases build up into new chemical compounds) the constituents of the secretion. In typical glands these cells are arranged in the form of a membrane lining a pit, tube, or more complex cavity, into which the secretion is discharged and from which it passes out by the mouth or duct of the gland. The cells rest on a more or less distinct *basement membrane,* external to which is a plexus of blood capillaries, through whose walls the cells absorb the required materials. Glands are classified, according to form, into *simple* and *compound* (in the latter the cavity is branched or subdivided), *tubular, saccular,* etc. *Racemose* glands are compound saccular glands of great complexity. In some glands (see DUCTLESS GLAND) the blood itself carries away the secretion, and there is no cavity or duct. Certain structures, not true glands, are still often called glands in conformity with old usage, esp. the lymphatic glands, pineal gland, and pituitary gland.



Forms of Glands. 1 Simple Tubular; 2 Simple Saccular; 3 Racemose; 4 Compound Tubular.

2. *Bot.* **a** An acorn; also, the nut of any other fagaceous tree or shrub, as the chestnut, beech, etc. *Obs.* **b** Any special secreting organ, as the hairs on the leaves of sundew, the extrafloral nectaries of many plants, etc. **c** Any small protuberance, whether serving as a secreting organ or fulfilling any other function.

gland of Lusch'ka (lŏosh'kä). [After H. von *Luschka* (1820–75), German anatomist.] *Anat.* = COCCYGEAL GLAND. — **glands of Bar'tho-lin** (bär'tō-lĭn) [after Kaspar *Bartholin,* Danish physician], two round or oval yellowish racemose glands lying one on each side of the lower part of the vagina. They correspond to Cowper's glands in the male, and produce a muco-serous secretion. — **glands of Bow'man** (bō'măn) [after Sir William *Bowman* (1816–92), English anatomist], *Anat.,* tubular, often branched, glands occurring beneath the epithelium in the mucous membrane of the nose. — **glands of Brunner.** *Anat* = BRUNNER'S GLANDS. — **glands of Cowper.** *Anat.* = COWPER'S GLANDS. — **glands of Lie'ber-kuhn.** *Anat.* = CRYPTS OF LIEBERKÜHN. — **glands of Lit're** (lĭ'tr') [after Alexis *Littre* (1658–1725), French physician], *Anat.,* small racemose glands found in the submucous tissue of the urethra. — **glands of Moll,** small glands near the free margin of each eyelid, and regarded as modified sweat glands. — **glands of Pac-chio'ni** (pät-chō'nē). *Anat.* = PACCHIONIAN GLANDS. — **glands of Ty'son** (tī'sŭn) [after Edward *Tyson,* English anatomist], *Anat.,* small glands at the base of the glans penis, which secrete a sebaceous substance.

gland cell. *Anat.* A cell whose function is secretion, whether isolated or a part of the epithelium of a gland.

glan'dered (glăn'dĕrd), *a.* Affected with glanders.

glan'der-ous (-dĕr-ŭs), *a.* Of or pertaining to glanders; of the nature of glanders.

glan'ders (-dĕrz), *n.* [OF. *glandres,* pl., glands. See GLAND.] *Far.* A highly contagious and very destructive disease of horses, asses, mules, etc., caused by the micro-organism *Bacillus mallei.* It is characterized by febrile symptoms, inflammation of the mucous membranes, esp. of the nose, with a constant discharge of sticky matter, and an enlargement and induration of the glands beneath and within the lower jaw. It ends fatally after an acute or chronic course. It may be transmitted to dogs, goats, sheep, and human beings. Bovines are immune.

glan'du-lar (glăn'dŭ-lăr), *a.* [Cf. F *glandulaire.* See GLANDULE.] Containing or bearing glands or gland cells; of, pertaining to, or like, a gland.
glandular epithelium, *Anat,* the epithelium which forms the secreting surface of a gland. The cells are of various forms, and often have the protoplasm more or less filled with particles of secretion. — **g. fever,** *Med.,* an acute infectious disease attacking children, and marked by pain and stiffness of the neck, fever, and swelling of lymphatic glands.

glan'dule (glăn'dūl), *n.* [L. *glandula,* dim. of *glans, glandis,* acorn: cf. F. *glandule.* See GLAND.] **1.** A gland. *R.*
2. *Med.* A morbid swelling or tumor in the body. *Obs.*

glan'du-lous (glăn'dŭ-lŭs), *a.* [L. *glandulosus:* cf. F. *glanduleux.*] Of or pert. to a gland, like a gland; consisting of glands; glandular. — **glan'du-lous-ness,** *n.*

glans (glănz), *n.; pl.* GLANDES (glăn'dēz). [L See GLAND.] **1.** *Anat.* The conical vascular body which forms the extremity of the penis and clitoris.

gloze, *v. i.* To look intently; to pore; peer. *Rare.*

glu'case (glōō'kās; 243), *n.* [Gr. γλυκύς sweet.] *Chem.* An enzyme capable of converting maltose into glucose and of decomposing certain glucosides. It is present in blood serum and other animal fluids, and also in yeast, maize, etc.

glu-ci'na (glōō-sī'nă), *n.* Formerly also **glu'cine** (glōō'sĭn; -sēn). [Gr. γλυκύς sweet: cf. F. *glycine, glucine*; — so called because it forms sweet salts.] *Chem.* Beryllia.

glu-ci'num (-năm), *n.* Sometimes also **glu-cin'i-um** (-sĭn'ĭ-ŭm). [Cf. F. *glycinium, glucinium.* See GLUCINA.] *Chem.* Beryllium. — **glu-cin'ic** (-sĭn'ĭk), *a.*

glu-con'ic (-kŏn'ĭk), *a. Chem.* Pert. to or designating an acid, $C_6H_{12}O_7$, of three optically different varieties. The dextro form, **d**-gluconic acid, is a sirupy liquid obtained by oxidation of dextro-glucose, maltose, cane sugar, etc.

glu'co-pro'te-id (glōō'kō-prō'tē-ĭd; 243), *n.* [*glucose* + *proteid.*] *Physiol. Chem.* Any of a class of compounds, as the mucins, amyloid, etc., made up of some form of proteid matter united to a carbohydrate group.

glu'cos-am'ine (glōō'kōs-ăm'ĭn; *-ā-mēn'*; 184), *n.* Also **-min.** [*glucose* + *amine*] *Physiol. Chem.* An amino derivative of glucose, $C_6H_{11}O_5NH_2$, obtained from the decomposition of chitin, cartilage, etc. Like many sugars, it has a reducing action, and is dextrorotary.

glu'cose (glōō'kōs; 243, 277), *n.* [F. The proposer of the name mentions Gr. γλευχος (a mistake for γλεῦκος) must, sweet wine, but does not explain the spelling *glucose* with *u* nor the ending *-ose.* Cf. GLUCINA.] **1.** *Chem.* **a** A sugar, $C_6H_{12}O_6$, of the class known as aldohexoses, occurring in three optically different forms. Of these only one, dextro-glucose, dextrose, grape sugar, or glucose proper, is found in nature. It occurs in very many plants and in the animal organism, and is obtained together with fruit sugar by the inversion of saccharose; but it is chiefly made from starch by the action of heat and acids. It is a white crystalline fermentable substance with about half the sweetness of cane sugar. **b** Any sugar of the formula $C_6H_{12}O_6$; a hexose. **c** Any simple sugar; a monosaccharide.
2. *Com.* An uncrystallizable sirup obtained by the imperfect conversion of starch into glucose proper, and containing, in addition to some glucose, maltose, dextrin, etc.; mixing sirup. It is harmless, but less than half as sweet as cane sugar, and is used to adulterate sirups, beers, etc.

glucose sirup *or* **syrup.** Glucose, unmixed or mixed with sirup or molasses. See GLUCOSE, 2.
Standard *glucose sirup* or corn sirup is *glucose sirup* or corn sirup containing not more than 25 per cent of water nor more than 3 per cent of ash. *U. S. Dept. Agric.*

glu-co'sic (glōō-kō'sĭk), *a.* Of or pertaining to glucose.

glu'co-side (glōō'kō-sīd; -sĭd; 184, 243), *n.* Also **glu'co-sid.** [See GLUCOSE.] *Org. Chem.* Any compound which by hydrolytic decomposition (as by the action of ferments or on boiling with dilute acids or alkalies) yields sugar (specif., the sugar glucose) and one or more other substances, usually cyclic compounds. The glucosides are in general white or colorless, optically active, usually crystalline, and often bitter. They occur chiefly in plants, as æsculin, amygdalin, salicin, and glycyrrhizic acid.

glu'co-sine (-sĭn; -sēn; 184), *n.* Also **-sin.** *Chem.* Any of several bases obtained by the action of ammonia on glucose.

glu'co-tan'noid (-tăn'oid), *n.* [*glucose* + *tannoid.*] *Org. Chem.* A compound of a tannoid with a sugar.

glu'cu-ron'ic (-kū-rŏn'ĭk), *a.* [*glucose* + Gr. οὖρον urine.] *Physiol. Chem.* Pertaining to or designating a monobasic acid, $C_6H_{10}O_7$, derived from glucose, and obtained as a sirup by the decomposition of euxanthic acid, and in other ways. It occurs (combined) in the urine after the administration of camphor, chloral, and other substances.

glu'cic (glōō'sĭk; 243), *a.* [Gr. γλυκύς sweet: cf. F. *glucique.*] *Chem.* Pertaining to, or obtained from, sugar; as, *glucic* acid.

gluck (glŭk), *n.* A certain sound;— an onomatopœic word. Hence: **gluck'-cluck',** *n.*

gluck, *v. i.* To make a gluck.

[gluck'li-che Rei'se (glŭk'lĭ-kē rī'zĕ). [G.] A prosperous journey: bon voyage; — an expression of farewell.

glu'co-gen (glōō'kō-jĕn), *n.*, **glu'co-gen'e-sis** (-jĕn'ē-sĭs), *n.*, **glu'co-gen'ic** (-jĕn'ĭk), *a.* = GLYCOGEN, etc. *Rare.*

glu-com'e-ter (glōō-kŏm'ē-tẽr), *n.* [Gr. γλεῦκος must + *-meter.*] A hydrometer for measuring the specific gravity of must and thus estimating the sugar in it.

glu'co-pro'te-ose, *n. Physiol. Chem.* A proteose formed from a glucoproteid. See PROTEOSE.

glu'co-san (glōō'kō-săn), *n.* Also **-sane.** *Org Chem.* A substance yielding glucose by hydrolysis. Cf. GLUCOSIDE.

glu-cos'a-zone (glōō-kŏs'ā-zōn), *n.* [*glucose* + *osazone.*] Osazone of glucose. See OSAZONE.

glu'co-sone (glōō'kō-sōn), *n. Org. Chem.* The osone ($C_6H_{10}O_6$) of glucose. See OSONE.

glu'co-su'ri-a (-s tū'rĭ-ă), *n.* [NL.] *Med.* = GLYCOSURIA.

glue (glōō ; 243, 277), *n.* [F. *glu*, L. *glus*, akin to *gluten*. Cf. CLAY, GLUTEN.] **1.** Birdlime. *Obs.*
2. A hard, brittle, brownish gelatin, obtained by boiling to a jelly the skins, hoofs, etc., of animals. When gently heated with water, it becomes viscid and tenacious, and is used for uniting substances. Liquid glue is a fluid preparation of glue with acetic acid, nitric acid, or alcohol.
3. Loosely, any of various adhesive or viscous substances.

glue, *v. t.* ; GLUED (glōōd) ; GLU'ING. [F. *gluer*. See GLUE, *n.*] **1.** To join with glue or a viscous substance ; to cause to stick or hold fast, as if with glue ; to fix or fasten.

This cold, congealed blood
That *glues* my lips, and will not let me speak. *Shak.*

2. To daub or smear with glue or the like. *Obs. or R.*

glue, *v. i.* To stick ; to adhere ; to be capable of being joined by glue ; as, the wood *glues* well.

glued (glōōd ; 243), *p. a.* Fastened by glue.

glue'pot' (glōō'pŏt'), *n.* **1.** A utensil for melting glue ; specif., one with an inner pot for the glue and an outer one for water.

Glue-pot (section-al view)

2. A part of a road marked by deep, sticky mud. *Colloq., Australia.*

glu'ey (-ĭ), *a.* Of the nature of, or like, glue. — **glu'ey-ness,** *n.*

glum (glŭm), *a.* ; GLUM'MER (-ẽr) ; GLUM'MEST. [Cf. GLOOM.] Moody ; frowning ; sullen ; gloomy ; dismal. "I frighten people by my *glum* face." *Thackeray.*
Syn. — See SULLEN.

glu-ma'ceous (glōō-mā'shŭs ; 243), *a.* [See GLUME.] *Bot.* **a** Consisting of, or of the nature of, glumes. **b** Pert. to the order Glumales.

Glu-ma'les (-lēz), *n. pl.* [NL. See GLUME.] *Bot.* **a** In Lindley's classification, an alliance comprising the grasses, sedges, etc. **b** In modern writings, an order synonymous with Poales (which see). — **glu'mal** (glōō'măl), *a. & n.*

glume (glōōm ; 243), *n.* [L. *gluma* hull, husk, fr. *glubere* to bark or peel.] *Bot.* One of the two-ranked chaffy scales or bracts of the spikelet in grasses and sedges, esp. in the former. The lowermost are usually sterile and are known as *empty glumes*, while those bearing flowers in their axils are known as *flowering glumes*. See POACEÆ.

glu-mif'er-ous (glōō-mĭf'ẽr-ŭs), *a.* [*glume* + *-ferous.*] *Bot.* Bearing glumes.

glu'mi-flo'rous (glōō'mĭ-flō'rŭs ; 201), *a. Bot* **a** Having flowers subtended by glumes. **b** Glumaceous.

glump (glŭmp), *v. i.* [Cf. GLUM.] To manifest sullenness ; to sulk. *Dial.*

glump'y (glŭm'pĭ), *a.* ; GLUMP'I-ER (-pĭ-ẽr) ; GLUMP'I-EST. Glum ; sullen ; sulky. *Colloq.*

James is rather *glumpy* and dumpy, chiefly, I believe, because his child is unwell. *Scott.*

glut (glŭt), *v. t.* ; GLUT'TED ; GLUT'TING. [OF. *glotir, glouti*r, L. *glutīre*. Cf. GLUTTON.] To swallow, or to swallow greedily ; to gorge ; gulp.

glut, *v. i.* **1.** To eat gluttonously or to satiety.
2. To look, gaze, think, etc., as much as one wills or pleases ; to gloat. *Rare.*

glut, *n.* **1.** Act of glutting, or state of being glutted ; gratification to the full ; plenty, to satiety or repletion ; a full supply ; hence, often, a supply beyond sufficiency or to loathing ; overabundance ; surfeit.

A *glut* of those talents which raise men to eminence. *Macaulay*

2. A supply of mercantile goods in excess of the demand at the seller's price ; a supply of a commodity, or some object of supply and demand, in excess of the effective demand for it. Cf. DEMAND, SUPPLY, OVERPRODUCTION.

Ricardo, following J. B Say and James Mill, denies the possibility of a "universal *glut*" — a *glut*, that is, of all commodities taken together simultaneously. *Dict. of Pol. Econ.*

3. An excessive amount, quantity, or number, as of persons, of water, rain, etc.
4. Something that fills or chokes up an opening ; a clog.

glut (glŭt), *n.* [Of uncertain origin.] **1.** A more or less wedge-shaped piece of wood or iron ; as : **a** A wooden wedge used in conjunction with iron wedges in splitting blocks. **b** *Mining.* A piece of wood for filling up behind cribbing or tubbing. **c** A fulcrum block. **d** *Mach.* A false key.
2. A small brick used to fill out a course.
3. An arched opening to the ash pit of a kiln.
4. *Naut.* A piece of canvas with a thimble, or pieces of rope with a thimble or becket, sewed or spliced near the center of the head of a square sail, to which a buntwhip, jigger, or the like is hooked in hauling up the bunt for furling.

glu'ta-con'ic (glōō'*ta*-kŏn'ĭk ; 243), *a.* [*glutaric* + *citraconic.*] *Chem.* Pertaining to or designating a white crystalline acid, $C_3H_4(CO_2H)_2$, isomeric with citraconic acid.

glu-tam'ic (glōō-tăm'ĭk ; 243), *a.* [*gluten* + *amic.*] *Chem.* Pertaining to or designating a crystalline nitrogenous acid, $C_3H_5NH_2(CO_2H)_2$, existing in three optically different forms. The dextro variety occurs in certain plants and is also obtained by boiling gluten and other albuminoids.

glu-tam'ine (-ĭn ; -ēn ; 184), *n.* Also **-min.** *Chem.* The amide of glutamic acid, crystallizing in fine needles. It is widely distributed in the vegetable kingdom, and, like asparagine, is undoubtedly an intermediate product in the synthesis of proteids by plants.

glu-tar'ic (-tär'ĭk), *a.* [*glut*amic + tar*taric.*] *Chem.* Pert. to or designating a crystalline organic acid, $C_3H_6(CO_2H)_2$, variously prepared, — called also *normal pyrotartaric acid.*

glu-te'al (glōō-tē'ăl ; glōō'tē-ăl ; 243, 277), *a.* [Gr. γλουτός rump, pl., the buttocks.] *Anat.* Pertaining to, or in the region of, the gluteus muscles or buttocks.

gluteal artery, *Anat.*, the largest branch of the internal iliac artery. It passes out of the pelvis above the pyriformis muscle and supplies chiefly the gluteal muscles. — **g. nerves,** nerves arising from the sacral plexus and distributed to the gluteal muscles, etc. The *superior* leaves the pelvis above the pyriformis muscle ; the *inferior*, below that muscle. — **g. ridge,** *Anat.*, the most external of the upper prolongations of the linea aspera of the femur. It gives attachment to a part of the gluteus maximus.

glu'ten (glōō'tĕn ; 243), *n.* [L., glue : cf. F. *gluten.* See GLUE.] **1.** **a** An adhesive, as gum or glue. *R.* **b** Fibrin. *Obs.*
2. The viscid, tenacious substance which gives adhesiveness to dough, esp. that made from wheat flour. It is regarded as the product of the interaction, in the presence of water, of gliadin and glutenin, which occur separately in the grain. Gluten is a very nutritious element of food. It may be separated from flour by washing out the starch and other soluble matters in a current of water.

gluten bread. Bread made of **gluten flour,** which is a flour containing a high gluten and a low starch content, prepared expressly for use of diabetics.

glu'ten-in (-ĭn), *n.* [From GLUTEN.] *Physiol. Chem.* A proteid substance in the seeds of cereals. See GLUTEN.

glu-te'us (glōō-tē'ŭs ; 243), *n. ; pl.* -TEI (-ĭ). [NL.] *Anat.* Any of certain muscles of the buttocks. In man there are three : the ‖ **glu-te'us max'i-mus,** arising from the sacrum, coccyx, back part of the ilium and adjacent structures, and inserted into the fascia lata of the thigh and the gluteal ridge of the femur ; and the ‖ **glu-te'us me'di-us** and ‖ **glu-te'us mi'ni-mus** (mĭn'ĭ-mŭs), arising from the outer surface of the ilium and inserted into the great trochanter of the femur, the latter of these two being situated deepest.

glu'tin (glōō'tĭn), *n.* [See GLUTEN.] *Chem.* **a** Ghadin. **b** Gelatin.

glu'ti-nate (-tĭ-nāt), *v. t.* ; -NAT'ED (-nāt'ĕd) ; -NAT'ING (-nāt'ĭng). [L. *glutinatus*, p. p. of *glutinare* to glue, fr. *gluten* glue.] To unite with or as with glue, specif., to heal (a wound). *Obs. or R.*

glu'ti-na'tion (-nā'shŭn), *n.* [L. *glutinatio.*] Act or process of glutinating. *Obs. or R.*

glu'ti-na-tive (glōō'tĭ-nā-tĭv ; 243), *a.* [L. *glutinativus.*] *Obs. or R.* Glutinating. — *n.* A glutinative agent.

glu'ti-nos'i-ty (-nŏs'ĭ-tĭ), *n.* Quality or state of being glutinous ; viscousness.

glu'ti-nous (glōō'tĭ-nŭs ; 243), *a.* [L. *glutinosus*, fr. *gluten* glue : cf. F. *glutineux.* See GLUTEN.] **1.** Of the nature of glue ; resembling glue ; viscous ; adhesive ; gluey.
2. *Bot.* Having a moist or adhesive surface, as a leaf or stem.

glu-ti'tion (glōō-tĭsh'ŭn ; 243), *n.* [L. *glutire* to swallow.] Act of swallowing ; deglutition.

glut'ton (glŭt'n), *n.* [ME. *glotoun, glotun*, F. *glouton*, fr. L. *gluto, glutto.* See GLUT to swallow, GLUT to satiate.]
1. One who eats voraciously, or to excess ; a gormandizer, one who gluts himself in any way.

Gluttons in murder, wanton to destroy. *Granville.*

2. A vile wretch, a rascal ; a scoundrel, or the like ; — a general term of opprobrium. *Obs.*
3. A carnivorous mammal (*Gulo luscus*) of the family Mustelidæ, related to the martens and sables, but about two and one half feet long, and of heavy build with long shaggy fur. It is found in the northern parts of Europe and Asia, also in northern North America (chiefly north of the United States), where it is known as the *wolverene*, and is exceedingly cunning and difficult to trap.

Glutton, 3. ($\frac{1}{20}$)

Syn. — See EPICURE.

glut'ton (glŭt'n), *a.* Gluttonous ; greedy ; voracious ; gormandizing. *Dryden.*

glut'ton-ize (glŭt'n-īz), *v. i. & t.* ; -IZED (-īzd) ; -IZ'ING (-īz'ĭng). To eat to excess ; eat voraciously ; gormandize.

glut'ton-ous (-ŭs), *a.* Given to gluttony ; eating to excess ; indulging the appetite extravagantly ; voracious. — **glut'ton-ous-ly,** *adv.* — **glut'ton-ous-ness,** *n.*

glut'ton-y (-ĭ), *n. ; pl.* -TONIES (-īz). [ME. *glotonie*, OF. *glotonie, gloutonnie.*] Excess in eating ; extravagant indulgence of the appetite for food.

Their sumptuous *gluttonies*, and gorgeous feasts. *Milton.*

glut weld. *Mech.* A weld made by presenting together two wedge-shaped pieces of metal and hammering a triangular piece (called a glut piece) in the cavity on each side.

gly-cæ'mi-a, gly-ce'mi-a (glĭ-sē'mĭ-*ă*), *n.* [NL. See GLUCOSE ; *-EMIA.*] *Med.* The presence of glucose in the blood.

glyc'er-ate (glĭs'ẽr-āt), *n.* Salt or ester of glyceric acid.

gly-cer'ic (glĭ-sĕr'ĭk ; glĭs'ẽr-ĭk), *a. Chem.* Pertaining to, or derived from, glycerin. — **glyceric acid,** an acid, $C_3H_5(OH)_2CO_2H$, obtained by partly oxidizing glycerin, and in other ways. It is a thick liquid having both acid and alcoholic properties.

glyc'er-ide (glĭs'ẽr-īd ; -ĭd ; 184), *n.* Also **-id.** [See GLYCERIN.] *Chem.* An ester of glycerin, either natural, as various fats, or artificial. See ESTER.

glyc'er-in, glyc'er-ine (-ĭn), *n.* [F. *glycérine*, fr. Gr. γλυκερός, γλυκύς, sweet. Cf. GLUCOSE, LICORICE.] **1.** *Chem.* A sweet, sirupy liquid, $C_3H_5(OH)_3$, colorless, odorless, and hygroscopic, obtained by the saponification of the natural fats and oils, which are compounds of it with various acids. It is a triatomic alcohol, and hence according to strict scientific usage is called *glycerol*. It is used as an ointment, as a solvent and vehicle for medicines, as a preservative in food products, as an adulterant in wine, beer, etc., and in very large amounts for the manufacture of nitroglycerin. Glycerin is almost always manufactured in connection with soap and candle making, in which it is a by-product.
2. *Pharm.* = GLYCERITE.

glyc'er-in-ate (-ĭn-āt), *v. t.* ; -AT'ED (āt'ĕd) ; -AT'ING (-āt'ĭng). *Med.* To mix or treat with glycerin. — **glyc'er-in-a'tion** (-ā'shŭn), *n.*

glycerin, *or* **glycerine, cement.** A cement of glycerin and litharge, used for packing joints, in galvanoplastic operations, etc.

glyc'er-ite (glĭs'ẽr-īt), *n. Pharm.* A medicinal preparation made by mixing or dissolving a substance in glycerin.

glyc'er-o- (glĭs'ẽr-ō-). A combining form for *glycerin.*

glyc'er-o-phos'phate (-fŏs'fāt), *n. Chem.* A salt of glycerophosphoric acid.

glyc'er-o-phos-phor'ic (-fŏs-fôr'ĭk), *a. Chem.* Pert. to or designating a dibasic acid, $C_3H_9O_6P$, which is derived from glycerin and phosphoric acid. It occurs in animal fluids and tissues as a cleavage product of lecithin, and is also made artificially.

glyc'er-ose (glĭs'ẽr-ōs), *n.* [*glycerin* + *-ose.*] *Org. Chem.* A mixture of two isomeric compounds, $C_3H_6O_3$, an aldehyde and a ketone, formed by the oxidation of glycerin. Caustic soda condenses it to inactive fructose.

glyc'er-yl (-ĭl), *n.* [*glycerin* + *-yl.*] *Chem.* A trivalent radical, $CH_2{\cdot}CH{\cdot}CH_2$, of which glycerin is the hydroxide.

glyceryl trinitrate. *Chem.* Nitroglycerin.

glyc'ide (glĭs'ĭd ; -īd ; 184), *n.* Also **-id.** [*glyceric* + anhydride.] *Chem.* A colorless liquid, $C_3H_6O_2$, obtained from certain derivatives of glycerin, and regarded as a partially dehydrated glycerin ; — called also *glycidic alcohol.*

gly-cid'ic (glĭ-sĭd'ĭk), *a. Chem.* Pert. to, or derived from, glycide.—**glycidic acid,** a volatile mobile liquid, $C_3H_4O{\cdot}CO_2H$.

gly'cine (glĭ'sĭn ; glĭs'ĭn ; -sēn ; -ēn ; 184), *n.* Also **gly'cin** (-sĭn ; -ĭn). [Gr. γλυκύς sweet.] *Chem.* Glycocoll.

Glyc'i-ne (glĭs'ĭ-nē ; glĭ-sī'nē), *n.* [NL., fr. Gr. γλυκύς sweet ; — in allusion to the sweet taste of the root.] *Bot.* A genus of Old World trailing or climbing fabaceous herbs having trifoliolate leaves, small hairy racemose flowers, and globose seeds. *G. hispida* of China is the soy bean.

gly'ci-nin (glĭ'sĭ-nĭn ; glĭs'ĭ-), *n.* [From GLYCINE.] *Physiol. Chem.* The chief proteid constituent of the soy bean (*Glycine hispida*). It is a typical globulin.

gly'co-cho'late (glĭ'kō-kō'lāt ; -kŏl'āt), *n.* [*glycocoll* + *cholic.*] *Chem.* A salt or ester of glycocholic acid.

gly'co-cho-le'ic (-kō-lē'ĭk), *a.* [*glycocoll* + *choleic.*] *Chem.* Pert. to or designating a crystalline acid in bile, and yielding on hydrolysis glycocoll and choleic acid.

gly'co-chol'ic (-kŏl'ĭk), *a.* [*glycocoll* + *cholic.*] *Chem.* Pert. to or designating a crystalline acid, $C_{26}H_{43}O_6N$, in human and ox bile. It yields on hydrolysis glycocoll and cholic acid. Also, by extension, any of several related acids.

gly'co-coll (glĭ'kō-kŏl), *n.* [Gr. γλυκύς sweet + κόλλα glue.] *Physiol. Chem.* **a** A crystalline, nitrogenous substance, $CH_2NH_2CO_2H$, with a sweet taste, formed from hippuric acid, gelatin, glycocholic acid, etc., by boiling with acids, and in other ways. Chemically, it is amino-acetic acid. **b** Hence, any amino acid.

gly'co-gen (-jĕn), *n.* [Gr. γλυκύς sweet + *-gen* : cf. F. *glycogène.*] *Physiol. Chem.* A white, amorphous, tasteless carbohydrate, related to starch and dextrin, found abundantly in the liver of most animals, and in smaller quantity in other organs and tissues, particularly in the embryo. It is also found in fungi. Glycogen forms an opales-

cent solution with water. See LIVER. It is quickly changed into sugar when boiled with dilute acids, and also by the action of amylolytic enzymes.

gly/co-gen/ic (glī/kō-jĕn′ĭk), *a.* Pertaining to, or caused by, glycogen; as, the *glycogenic* function of the liver.

gly-cog′e-ny (glī-kŏj′ē-nĭ), **gly/co-gen/e-sis** (glī/kō-jĕn′ē-sĭs), *n. Physiol.* Production or formation of sugar from glycogen, as in the liver. — **gly/co-ge-net/ic** (-jē-nĕt′ĭk), *a.*

gly/col (glī′kŏl; -kōl), *n.* [*glycerin* + *-ol.* See GLYCERIN.] *Chem.* **a** A thick, sweet, colorless liquid, $C_2H_4(OH)_2$, produced artificially from certain ethylene compounds. B. P., 197° C. It is a diacid alcohol, intermediate between ordinary ethyl alcohol and glycerin. **b** Any of the large class of diacid alcohols, of which glycol proper is the type.

gly/co-late (-kō-lāt), *n.* [*glycol* + *-ate.*] *Chem.* A salt or ester of glycolic acid.

gly-col′ic (glī-kŏl′ĭk), *a. Chem.* Pert. to, or derived from, glycol; as, *glycolic* ether or acid.

glycolic acid, a crystalline substance, $CH_2(OH)CO_2H$, found naturally in unripe grapes and in the leaves of the wild grape (*Parthenocissus quinquefolia*), and produced artificially in many ways, as by oxidation of *glycol*. It has the properties both of an alcohol and an acid, and is a type of the hydroxy acids. Called also *hydroxyacetic acid.*

gly/co-lide (glī′kō-līd; -lĭd; 184), *n.* Also **-lid.** [*glycol* + anhydride.] *Chem.* A white amorphous powder, $C_4H_4O_4$, obtained by heating and dehydrating glycolic acid.

gly/co-lu/ril (-lū′rĭl), *n.* [*glycolyl* + *uric.*] *Chem.* A white, crystalline, nitrogenous substance, $C_4H_6N_4O_2$, got from glyoxal and urea, and also by reduction of allantoin.

gly/co-lyl (glī′kō-lĭl), *n.* [*glycolic* + *-yl.*] *Chem.* A bivalent radical, $CO{\cdot}CH_2$, the radical of glycolic acid and a large series of related compounds.

gly-col′y-sis (glī-kŏl′ĭ-sĭs), *n.* [NL. See GLUCOSE; -LYSIS.] *Physiol. Chem.* Hydrolytic decomposition of sugar. — **gly/co-lyt/ic** (glī/kō-lĭt′ĭk), *a.*

Gly-con′ic (-kŏn′ĭk), *a.* [After its inventor, *Glycon:* cf. Gr. Γλυκώνειος.] *Gr. & Lat. Pros.* Of or pert. to a kind of verse, a logaœdic tetrapody, usually catalectic, three feet being trochees, and one — usually the second — a dactyl: thus, – > | – ⏑ – | – ⏑ | – ∧. See PROSODY. — *n.* A Glyconic verse.

gly/co-nin (glī′kō-nĭn), *n. Pharm.* An emulsion of glycerin and the yolk of eggs, used as an ointment.

gly/co-se-cre/to-ry (-sē-krē′tō-rĭ), *a.* [*glycogen* + *secretory.*] *Physiol.* Of or pertaining to the formation of glycogen; as, *glycosecretory* nerve fibers, which are thought to influence the formation of glycogen in the liver cells.

gly/co-sine (glī′kō-sĭn; -sēn; 184), *n.* Also **-sin.** *Chem.* An organic base, $C_6H_4N_4$, produced artificially as a white, crystalline powder, by the action of ammonia on glyoxal.

gly/co-som/e-ter (-sōm′ē-tēr), *n.* [Cf. F. *glycose*, E. *glucose*, and see -METER.] *Med.* An apparatus for determining the amount of sugar in diabetic urine.

gly/co-su/ri-a (-sū′rĭ-ȧ), *n.* [NL. Cf. GLUCOSE; -URIA.] *Med.* A condition in which glucose is excreted in the urine, diabetes mellitus. — **gly/co-su/ric** (-sū′rĭk), *a.*

Glyc/yr-rhi/za (glĭs/ĭr-rī′zȧ), *n.* [L., fr. Gr. γλυκύρριζα; γλυκύς sweet + ῥίζα root. Cf. LICORICE.] **1.** *Bot.* A genus of fabaceous herbs of wide distribution in temperate regions, with odd-pinnate leaves, purple racemose flowers, and prickly pods. *G lepidota*, the wild licorice, is the only American species. See LICORICE.

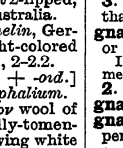
2. [*l.c.*] *Pharm.* Licorice root.

glyc/yr-rhi/zic (-rī′zĭk), *a. Chem.* Pertaining to or designating a yellow amorphous organic acid with a sweet taste, the active constituent of licorice root (*glycyrrhiza*). It is found also in other plants, as in the rhizomes of some ferns.

glyc/yr-rhi/zin (-rī′zĭn), *n.* [See GLYCYRRHIZA.] *Chem.* Glycyrrhizic acid.

gly-ox′al (glī-ŏk′săl), *n.* [*glycol* + *oxalic* + *aldehyde.*] *Chem.* A white, amorphous, deliquescent substance, $(COH)_2$, obtained by the action of nitric acid on alcohol, etc. It is a double aldehyde, between glycol and oxalic acid.

gly/ox-al′ic (glī/ŏk-săl′ĭk), *a. Chem.* Pertaining to or designating an aldehyde acid, $CHO{\cdot}CO_2H$ (or $CH(OH)_2CO_2H$), intermediate between glyoxal and oxalic acid.



Glyoxaline.

gly-ox′a-line (glī-ŏk′sȧ-lĭn; -lēn; 184), **-lin,** *n. Chem.* A white crystalline organic base, $C_3H_4N_2$, produced by the action of ammonia on glyoxal, and isomeric with pyrazole; hence, any of a large class of derivatives of it. Called also *imidazole.*

gly-ox′yl (glī-ŏk′sĭl), *n.* [*glyoxal* + *-yl.*] *Org. Chem.* The bivalent radical -CH(OH)CO-.

glyph (glĭf), *n.* [Gr. γλυφή carving, fr. γλύφειν to carve: cf. F. *glyphe.* Cf. CLEAVE to split.] **1.** *Arch.* A channel or groove, usually vertical. See TRIGLYPH.

2. *Archæol.* A carved figure or character, incised or in relief; a carved pictograph; hence, a pictograph representing a form originally adopted for sculpture, whether carved or painted; as, the Mayan *glyphs.*

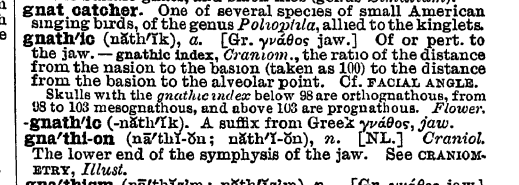
glyph′ic (-ĭk), *a.* [Gr. γλυφικός of or for carving.] *Fine Arts.* Of or pertaining to sculpture or carving of any sort, esp. glyphs; carved; sculptured. — *n.* = GLYPH, 2.

glyph′o-graph (-ō-grȧf), *n.* A plate made by glyphography, or an impression taken from such a plate.

gly-phog′ra-phy (glĭ-fŏg′ra-fĭ), *n.* [Gr. γλύφειν to engrave + *-graphy.*] A process in which, by electrodeposition, a raised printing plate is made from an engraved design. — **gly-phog′ra-pher** (-fēr), *n.* — **glyph/o-graph′ic** (glĭf/ō-grăf′ĭk), *a.*

glyp′tic (glĭp′tĭk), *a.* [Gr. γλυπτός fit for carving, carved. See GLYPH.] Of or pert. to carving or engraving, esp. gem engraving. — **glyptic period.** *Archæol.* = MAGDALENIAN PERIOD.

Glyp/to-don (glĭp′tō-dŏn), *n.* [Gr. γλυπτός carved, engraved + ὀδούς, ὀδόντος, tooth. See GLYPH.] *Paleon.* A genus of large extinct mammals of the order Edentata, related to the armadillos. Their remains are numerous in the Pleistocene of South America, and occur as far north as Mexico and Texas. The back was covered by a large



Skeleton of Glyptodon (*G. clavipes*) ($\frac{1}{24}$)

rigid carapace composed of small five-sided or six-sided bony plates covered with horny plates. There was a head shield, and the tail was encircled by rings of bony plates. The fore feet had four toes, the hind feet five toes. A number of species are known. *G. clavipes* sometimes attained a length of over fifteen feet. The genus is the type of a family, **Glyp/to-don′ti-dæ** (-dŏn′tĭ-dē), containing also *Dædicurus* and other genera. — **glyp′to-dont** (-dŏnt), *a. & n.*

glyp′to-graph (glĭp′tō-grăf), *n.* [See GLYPTOGRAPHY.] An engraving on a gem.

glyp-tog′ra-phy (glĭp-tŏg′rȧ-fĭ), *n.* [Gr. γλυπτός carved + *-graphy.*] Art or process of engraving gems; also, the description or study of engraved gems or other hard and fine stones, etc. — **glyp-tog′ra-pher** (-r ȧ-fẽr), *n.* — **glyp′to-graph/ic** (glĭp′tō-grăf′ĭk), *a.*

glyp-tol′o-gy (glĭp-tŏl′ō-jĭ), *n.* [Gr. γλυπτός carved + *-logy.*] The scientific study of engraving upon precious stones or the like. — **glyp/to-log′i-cal** (glĭp′tō-lŏj′ĭ-kăl), *a.* — **glyp-tol′o-gist** (glĭp-tŏl′ō-jĭst), *n.*

glyp/to-the′ca (glĭp′tō-thē′kȧ), *n.*; *pl.* -THECÆ (-sē). [NL.; Gr. γλυπτός carved + θήκη case, box.] A building or room devoted to works of sculpture.

Gmel′i-na (mĕl′ĭ-nȧ, mē-lī′nȧ), *n.* [NL.; after S. G. *Gmelin* (1744–74), Ger. botanist.] *Bot.* A small genus of Asiatic and Australian verbenaceous trees and shrubs, having simple leaves and yellow, panicled flowers with a cup-shaped, 4-5-toothed calyx and a tubular, somewhat 2-lipped, corolla. *G. leichardtii* is the native beech of Australia.

gmel′in-ite (mĕl′ĭn-īt), *n.* [After Prof. Ch. *Gmelin*, German mineralogist.] *Min.* A colorless or light-colored zeolite of the chabazite group. H., 4.5. Sp. gr., 2–2.2.

gna-pha′li-oid (nȧ-fā′lĭ-oid), *a.* [*Gnaphalium* + *-oid.*] *Bot.* Pertaining to or resembling the genus *Gnaphalium.*

Gna-pha′li-um (-ŭm), *n.* [NL., fr. Gr. γναφάλιον wool of the teasel.] *Bot.* A large genus of hoary or woolly-tomentose asteraceous herbs of wide distribution, having white or colored persistent involucres. Some species are cultivated as everlastings; the herbage is astringent.

gnar, gnarr (när), *v. i.*; GNARRED (närd); GNAR′RING. [See GNARL.] To snarl; growl.

A thousand wants
Gnarr at the heels of men. *Tennyson.*

gnarl (närl), *v. i*; GNARLED (narld); GNARL′ING. [From older *gnar*, prob. imitative; cf. G. *knarren*, *knurren*, D. *knorren*, Sw. *knorra*, Dan. *knurre.*] **1.** To growl; snarl.

And wolves are *gnarling* who shall gnaw thee first. *Shak.*

2. To gnaw; nibble. *Dial. Eng.*

gnarl (närl), *v. t.* [See GNARLED.] To twist or contort; to render knotty or rugged.

gnarl, *n.* A knot in wood; a large or hard knot, or a protuberance with twisted grain, on a tree.

gnarled (närld), *a.* [Var. of KNURLED. *Oxf. E. D.*] Knotty; full of knots or gnarls, twisted; crossgrained; rugged.

The unwedgeable and *gnarled* oak. *Shak.*

gnarl′y (närl′ĭ), *a.*; -LI-ER (-lĭ-ẽr); -LI-EST. Gnarled.

gnash (năsh), *v. i.*; GNASHED (năsht); GNASH′ING. [ME. *gnasten*, *gnaisten*, cf. Icel. *gnastan* a gnashing, *gnīsta* to gnash, Fries. *gnastern*, prob. of imitative origin.] To grind or strike the teeth together; of the teeth, to grind or strike together.

Gnashing for anguish, and despite, and shame *Milton.*

gnash, *v. t.* **1.** To strike or grind (the teeth) together, as in anger or pain.

2. To grind the teeth on; to bite with grinding teeth.

gnat (năt), *n.* [AS. *gnæt.*] Any of various small dipterous insects or flies, esp such as bite. The term is chiefly applied in England to mosquitoes, in America to smaller forms, as the buffalo gnats, and black flies (genus *Simulium*).

gnat catcher. One of several species of small American singing birds, of the genus *Polioptila*, allied to the kinglets.

gnath′ic (năth′ĭk), *a.* [Gr. γνάθος jaw.] Of or pert. to the jaw. — **gnathic index,** *Craniom.*, the ratio of the distance from the nasion to the basion (taken as 100) to the distance from the basion to the alveolar point. Cf. FACIAL ANGLE.

Skulls with the *gnathic index* below 98 are orthognathous, from 98 to 103 mesognathous, and above 103 are prognathous. *Flower.*

-gnath′ic (-năth′ĭk). A suffix from Greek γνάθος, *jaw.*

gna/thi-on (nā′thĭ-ŏn; năth′ĭ-ŏn), *n.* [NL.] *Craniol.* The lower end of the symphysis of the jaw. See CRANIOMETRY, *Illust.*

gna′thism (nā′thĭz′m; năth′ĭz′m), *n.* [Gr. γνάθος jaw.] *Anthropol.* The formation of the upper jaw, esp. with reference to the degree of its projection beyond the general plane of the face, or the classification of skulls according to such formation. The three degrees of gnathism usually distinguished are *orthognathism*, *mesognathism*, and *prognathism.* See GNATHIC INDEX, *Citation.*

Of all cranial measurements none is more important than that which determines the varying degrees of *gnathism.* *A. H. Keane.*

gna′thite (nā′thīt; năth′īt), *n.* [Gr. γνάθος the jaw] *Zool.* Any of the mouth appendages of Arthropoda. They are known as mandibles, maxillæ, and maxillipeds, and are limbs modified for conveying or masticating food, etc.

gna′tho- (nā′thŏ-; năth′ŏ-), **gnath-.** Combining form from Greek γνάθος, *jaw.*

-gnathous. A suffix from Greek γνάθος, *jaw.*

gnaw (nô), *v. t.; pret.* GNAWED (nôd); *p. p.* GNAWED or GNAWN (nôn); *p. pr. & vb. n.* GNAW′ING. [ME *gnawen*, AS. *gnagan;* akin to D. *knagen*, OHG. *gnagan*, *nagan*, G. *nagen*, Icel. & Sw. *gnaga*, Dan. *gnave*, *nage.* Cf. NAG to tease.] **1.** To bite so as to wear away or remove a part from, as something hard or tough, which is not readily separated or crushed; to bite off little by little, with effort; to wear or eat away by scraping or biting with the teeth; loosely, to bite or chew upon, as the mustache.

His bones clean picked; his very bones they *gnaw.* *Dryden.*
They *gnawed* their tongues for pain *Rev.* XVI. 10.
At this he turn'd all red and paced his hall,
Now *gnaw'd* his under, now his upper lip. *Tennyson.*

2. To corrode; to fret away; to waste.

A present in whose reign no grief shall *gnaw*
The heart. *Bryant.*

3. To produce a pain in (the stomach or bowels) likened to that caused by gnawing.

gnaw, *v. i.* **1.** To bite with repeated effort, as in eating or severing with the teeth something hard or unwieldy.

I might well, like the spaniel, *gnaw* upon the chain that ties me. *Sir P. Sidney.*

2. To have an effect like gnawing with the teeth.

gnaw′er (-ẽr), *n.* One that gnaws; a rodent.

gnaw′ing, *p. pr. & vb. n.* of GNAW. Specif.: *vb. n.* A persistent pain (in the stomach or bowels) likened to that caused by gnawing; *pl.*, pangs; as, *gnawings* of hunger.

gneiss (nīs), *n.* [G.] *Petrog.* A metamorphic rock, often corresponding in composition to granite or some other feldspathic plutonic rock, but having its constituents, esp. mica, arranged in planes so that it splits rather easily into coarse slabs. *Gneiss* is a useful general term for highly

gly-cog′e-nous (glī-kŏj′ē-nŭs), *a.* Glycogenic

gly/co-hæ′mi-a *or* **-hemia** (glī′kō-hē-mĭ-ȧ), *n.* [NL.] Glycæmia.

gly/col-late, gly-col′lic, gly′col-lide, etc. Vars. of GLYCOLATE, etc.

gly′col-lyl. Var. of GLYCOLYL.

gly/co-lu′ric (glī′kō-lū′rĭk), *a.* [*glycol* + *uric.*] = HYDANTOIC.

gly′cone (glī′kōn), *n.* [*glycerin* + *-one.*] *Pharm.* A suppository made of glycerin.

gly-co′ni-an (glī-kō′nĭ-ȧn), *a. & n.* Glyconic [COPROTEID.]

gly/co-pro′te-id Var. of GLU-

gly/cos-am′ine (glī′kŏs-ăm′ĭn; -ēn; -mēn′; 184) Var. of GLUCOSAMINE.

gly-cos′a-zone (glī-kŏs′ȧ-zōn). Var. of GLUCOSAZONE.

gly′cose (glī′kōs). Var. of GLUCOSE.

gly′co-side (glī′kō-sīd; -sĭd; 184). Var. of GLUCOSIDE.

gly/co-thym′o-line (-thĭm′ō-lĭn; -lēn; 184), *n.* [*glycerin* + *thymol* + *-ine.*] *Pharm.* An antiseptic preparation of thymol, glycerin, and other ingredients used as a local application in inflammatory conditions of the nose and throat; — a trade name.

gly′cu-ron′ic (glī′kū-rŏn′ĭk). *Chem.* Var. of GLUCURONIC.

glyc′y-phyl′lin (glĭs′ĭ-fĭl′ĭn), *n.* [Gr. γλυκύς sweet + φύλλον leaf.] *Chem.* A crystalline substance, $C_{21}H_{22}O_9$, got from the leaves of *Smilax glycyphylla.*

glyde. Var. of GLEYD. *Scot.*

glyf. Glyph. *Rejf. Sp.*

glyn, glynn (glĭn). + GLEN.

gly-ox′ime (glī-ŏk′sĭm; -sēm), *n.* Also **-im.** [*glyoxal* + *oxime.*] *Chem.* A white crystalline nitrogenous substance, $C_2H_4N_2O_2$, the oxime of glyoxal. See OXIME.

gly′ox-yl′ic (glī′ŏk-sĭl′ĭk), *a.* = GLYOXALIC.

glyoxyl uric. See ALLANTURIC

glyp′tic (glĭp′tĭk), *n.* [Cf. F. *glyptique.* See GLYPH.] The art of engraving on hard and fine stones; — usually *pl.*

glyp′ti-cal (-tĭ-kăl), *a.* Glyptic.

glyp-ti′cian (glĭp-tĭsh′ăn), *n* [From GLYPTIC.] A gem engraver; a lapidary. *Rare.*

Glyp′to-the′ri-um (glĭp′tō-thē′rĭ-ŭm), *n.* [NL.; Gr γλυπτός carved + *-therium.*] *Paleon.* A genus of glyptodonts based on a carapace and partially complete skeleton from the lower Pleistocene of Texas. [CLYSTER.]

glys′ter (glĭs′tẽr), *n. Med.* = glywering, *p. a.* Gluttering. *Obs.*

Gne-ta'ce-æ (nē-tā'sē-ē), *n. pl* [NL. See GNETUM.] *Bot.* A family of gymnospermous shrubs and trees, the joint-fir family, having mostly opposite articulated leaves and branches, and small dioecious flowers. It consists of three genera, the peculiar African *Tumboa* (which see), the tropical *Gnetum*, and *Ephedra*, which occurs in both Asia and America. — **gne-ta'ceous** (-shŭs), *a.*

Gne-ta'les (-lēz), *n. pl.* [NL.] *Bot.* An order of gymnospermous plants coextensive with the family Gnetaceæ.

Gne'tum (nē'tŭm), *n.* [NL., said to be fr. *gnemon*, a native name of species in the island of Ternate.] *Bot.* A genus of tropical shrubs or small trees, type of the family Gnetaceæ, having climbing jointed stems and terminal spikes of flowers, the fruit being usually drupaceous. Some species, as *G. gnemon* of India, yield valuable bast fiber.

gnome (nōm), *n.* [F. *gnome*, fr. NL. *gnomus*, in Paracelsus.] One of a fabled race of diminutive beings supposed to inhabit the inner parts of the earth, and to be the guardians of mines, quarries, etc. The name *gnome* was given by Paracelsus to beings having earth as their element, so that they can move through it as freely as a fish through water (cf. SYLPH, 1; SALAMANDER, 2; UNDINE). In later use the conception has been largely influenced by popular ideas about dwarfs, elves, and fairies, probably in particular by the Teutonic belief in "dark elves." See DWARF, ELF.

gnome, *n.* [Gr. *γνώμη*, fr. *γιγνώσκειν* to know. See KNOW.] A brief reflection or maxim, aphorism; saw.

gnome owl. Any of various small owls of the genus *Glaucidium*. *G. gnoma* is a well-known species of western North America.

2. *Bot.* = GNOMONICAL. *Obs.*

3. = GNOMIC. *Rare.*

gnomonic chart, *Navig.*, a chart on the gnomonic projection. — **g. projection**, the projection, by radials from the center, of the surface of a sphere on a plane tangent to a given point on the sphere. Great circles project as straight lines.

gno-mon'ics (-ĭks), *rarely* **gno-mon'to,** *n.* The art or science of dialing, or of constructing dials. *Obs. or Hist.*

gno'si-ol'o-gy (nŏ'sĭ-ŏl'ō-jĭ; nō'zĭ-), *n.* [Gr. *γνῶσις* knowledge + *-logy.*] The theory of the origin, nature, and validity of knowledge; epistemology. — **gno'si-o-log'i-cal** (-ō-lŏj'ĭ-kăl), *a.*

gno'sis (nō'sĭs), *n.* [NL., fr. Gr. *γνῶσις.*] *Metaph.* The deeper wisdom; knowledge of spiritual truth or of matters commonly conceived to pertain to faith alone, such as was claimed by the Gnostics.

gnos'tic (nŏs'tĭk), *a.* **1.** Of, pertaining to, or characterized by, knowledge, or gnosis; — sometimes used in contrast with *agnostic*.

2. [*cap.*] Of or pertaining to Gnosticism or the Gnostics.

3. Knowing; wise: shrewd. *Humorous or Slang.*
I said you were a . . . *gnostic* fellow. *Scott.*

Gnos'tic, *n.* [L. *gnosticus*, Gr. *γνωστικός* good at knowing, sagacious; as a n., a man that claims to have a deeper wisdom; fr. *γιγνώσκειν* to know: cf. F. *gnostique*. See KNOW.] One of a school of heretical Christian philosophers of the 2d century, of whom Saturninus, Marcion, Basilides, and Valentinus were the foremost.

Gnos'ti-cism (nŏs'tĭ-sĭz'm), *n. Philos.* One of the two systems of thought that attempt to explain nature and man by emanation, a process of creation conceived as a series of effluxes flowing forth from the godhead and forming the multiplicity of created beings. The other system of emanation is Neoplatonism (which see). Gnosticism begins earlier than Neoplatonism (before the end of the 1st century), but continues down to the 6th century. Neoplatonism begins a century later and continues also to the 6th century, and in the work of Dionysius Areopagita it has a new life and great influence in the church for another six hundred years. The writings of the Gnostics are known chiefly through the anti-heretical treatises of the early Christian Fathers, but many of the writings of the Neoplatonists have come down to us. The influence of the Parsis is found in nearly all of the Gnostics; but in the most elaborate systems there is much borrowing from Greek philosophy, such as the ideas of Logos and of Nous. The systems of Basilides and Valentinus appear to be an interpretation of Christian ideas by Greek ideas (See VALENTINIAN GNOSTICISM). *W. T. Harris*

gnu (nōō; nū; 277), *n.* [Kaffir *ngu*, where *q* is the sign for a click.] Any of several remarkable African antelopes which constitute the genus *Connochætes*. They are of rather large size and compact build, with a horselike head and long mane, while the horns, which are present in both sexes, curve downward and outward and then up, and their bases in old individuals form a frontal shield. The tail is long and flowing, and there is long hair on the throat. The white-tailed gnu, or black wildebeest (*C. gnu*), was formerly abundant on the plains of South Africa, but is now almost exterminated. Farther north the brindled gnu, or blue wildebeest (*C. taurinus*), which is marked with dark stripes on the neck and fore quarters, is still found in considerable numbers, while a third form (*C. albogulatus*) occurs in British East Africa.

Gnu (*Connochætes gnu*). (1/36)

go (gō), *v. i.*; *pret.* WENT (wĕnt); *p. p.* GONE (gŏn; 205); *p. pr. & vb. n.* GOING. *Went* comes from the AS. *wendan*. See WEND, *v. i.* [ME. *gan*, *gon*, AS *gān*, akin to D. *gaan*, G. *gehn*, *gehen*, OHG. *gēn*, *gān*, Sw. *gå*, Dan. *gaae*; cf. Gr. *κιχάνει* to reach, overtake, Skr. *hā* to go, AS. *gangan*, and E. *gang.*] **1.** To move on a course; to pass, or be passing, from point to point or station to station; to move onward; to proceed; as, to *go* slowly; to *go* at one's ease; also, with a definite course specified or implied: as, to *go* along the road; to *go* up stairs. (1) In contrast with the more neutral verb *move*, *go* carries primarily a notion of self-originated movement; as, to *go* post haste, to *go* full speed. (2) But in a sense almost identical with *move*, *go* is frequently used of motion externally initiated, or impelled, or controlled; as, the wheel *goes* round; the balloon *goes* freely. (3) *Go* is also used in what is practically the passive sense, to be conveyed; as, to *go* on a train or an elevator; also, with an indication of purpose; as, to *go* for a ride. (4) Frequently *go* is used with a cognate object; as, to *go* a journey; to *go* an easy pace; to *go* one's own way.

2. To move on one's feet at an ordinary pace; to walk; — contrasted with *run*, *creep*, *fly*, *swim*, *ride*, etc. *Obs.*
Whereso I *go* or ride. *Chaucer.*
He fell from running to *going*, and from *going* to clambering upon his hands and his knees. *Bunyan.*

3. To move hence or away; to leave; to depart; to pass, or be passing, from one station in space to another which is implied as farther away; — opposed to *come*; as, the hall was filled with people *coming* and *going*. *Go* may be used either alone or with an accessory adverb with the emphasis on the idea of departure or going away; as in "Let me *go*;" or the emphasis may be on the place of departure or destination, or the manner, purpose, or the like, of the one who goes, as expressed by other words; as in "The guests *went* by pairs;" "He is *going* to Paris;" "*Go* and see." Often as a word of command or in a somewhat impersonal sense *go* is used with especial reference to the inauguration of a movement away, as for the starting of a race, and hence of the inauguration of any of various actions; as, Here *goes!*
I will let you *go*, that ye may sacrifice to the Lord your God; . . . only ye shall not *go* very far away. *Ex.* VIII 28.
Who *goeth* a borrowing *goeth* a sorrowing. *Old Proverb.*

4. To pass or be conveyed or transferred by a process or to an end conceived as analogous to journeying; as, the message *goes* by wire; to *go* to the bottom of a mystery; the argument *went* home; the estate *goes* to the heirs.
The law shall *go* forth of Zion. *Micah* IV 2.

5. To pass about or abroad (in a certain state); to be habitually; as, to *go* armed; to *go* without comforts; to *go* unpunished; — sometimes with a mixture of sense 3: as, to *go* scot free; to *go* through the battle unhurt.
Oftentimes he *goes* but mean-apparel'd. *Shak.*

6. To pass away from scene, function, control, condition, or the like; variously: to be rejected, relinquished, displaced, or abolished; as, inadequate laws must *go*; to be lost; as, hope is *gone*; to be spent; as, money *goes* easily; to be sold; as, the book *went* for a low price; of mental powers, consciousness, etc., to cease to operate or be efficient; as, his mind is *going*; hence, of a person, to faint, of physical powers or condition, to deteriorate; to fail; as, strength is *going*; to leave life; to die.
By Saint George, he's *gone!*
That spear wound hath our master sped. *Scott.*

7. To give way; to be carried away; to break; as, the sails *went* in the gale.

8. To pass current or have currency; to pass from hand to hand, mouth to mouth, or the like; as, sound money *goes* everywhere; a good story is *going* about; hence, to be generally known (by); as, to *go* under an assumed name.
[The money] should *go* according to its true value. *Locke.*

9. To be expressed or phrased; to run; read; as, the second clause *goes* thus; to glide or run along, as, the verses *go* smoothly; to be suited, as a song to a tune.
A sleeping partner, as the commercial phrase *goes*. *Scott.*

10. Of time, to pass or be passed; to elapse.

11. To be pregnant, to be (with young); — usually with an adverb of period; as, the elephant *goes* with young nearly two years. "The fruit she *goes* with." *Shak.*

12. To proceed or happen in a given manner; to fare; to move on or be carried on; to have course; hence, to turn out, esp. in phrases such as, as things, the times, etc., *go*, according to the usual conditions or prevailing standard; to be as the result of a contest; as, the election, decision, verdict, etc., *went* against him; Ohio *went* Republican; specif., to proceed or be performed or executed in a specified way with regard to success; as, the play *went* well, to succeed, as, his plan would not *go*.
How *goes* the night, boy? *Shak.*
I think, as the world *goes*, he was a good sort of man enough. *Arbuthnot.*

13. To continue in a specified state or maintain or perform a specified action; to run, as, the note has several days to *go*; the seas *went* high; specif.: **a** To be kept in motion or action; to operate; to run; of a timepiece, to keep time; — said of a machine or something likened to one; as, the car *goes* by electricity; his pulse *goes* very rapidly.
'Tis with our judgments as our watches, none
Go just alike, yet each believes his own. *Pope.*
b To sound, as a bell or organ; to strike, as a clock.

14. To have recourse or resort; to carry an action or interest (*to* a source, judgment, remedy, extent, or the like, *before* a judge, bar, or the like), to turn, take, or venture *to*; as, to *go* to the country with a political issue; to *go* before a court; to *go* to war or to blows

15. **a** To apply one's self, to set one's self. *Obs.*
Confronted by so many, like a resolute orator, he *went* not to denial, but to justify his cruel falsehood *Sir P. Sidney.*
b To put one's self, as to trouble or expense.

16. To extend from point to point or along a denoted space; to lead; reach, run; as, this road *goes* to London; his land *goes* to the river; also, to open or lead; as, the gate *goes* into the pasture. Cf. COME, 6.

17. To operate so as to apply, conduce, tend, or contribute (*to* some end or result); as, qualities which *go* to make a hero, a hundred cents *go* to the dollar; the facts *go* to show guilt; these losses *go* to the general deficit.
Against right reason all your counsels *go*. *Dryden.*

18. To attain a given limit or condition; to reach; arrive (at); as, he is all *gone* to nothing; to *go* to seed; to *go* to pieces; of prices, bids, etc., to make an offer; as, I can *go* no higher; to be changed or reduced; as, to *go* mad.
They [the crowd] *go* wild over the catchwords and formulas that happen to be popular fetishes. *F. H. Giddings.*
She watched the trees *go* sere and bare. *Hamlin Garland.*

19. To follow a given course or procedure; of persons or other agents, to be guided, governed, or regulated; as, to *go* according to or with the times; to have meager information to *go* on; a good rule to *go* by; of things, etc., to be determined; as, dreams *go* by contraries.
Hanging and wiving *goes* by destiny. *Shak.*

20. With adverbs of quantity, to reach or follow a given proportion; as, to *go* shares, halves, etc.

21. To enter a given relation or undertake a task or obligation, as, to *go* apprentice; to *go* bail (see GO BAIL, below).

22. To be capable of assuming or holding a given relation or position; to admit of passing or being contained or put; as, the book will not *go* into my pocket; five will not *go* into four; hence, to have its usual or proper place; to be made or adapted for or capable of being put or inserted; to belong; as, that rod *goes* into a small hole near the bottom; that book *goes* on the second shelf.

☞ *Go* is used, in combination with many prepositions and adverbs, to denote motion of the kind indicated by the preposition or adverb, in which, and not in the verb, lies the principal force of the expression; as, to *go against*, to *go into*, to *go out*, to *go aside*, to *go astray*, etc.

☞ The present participle, **going**, is specially used: **a** With *in* and *of*, or occasionally without a preposition, in the sense: about to attain, or approaching (a given age). (Cf. to go on **c**, below.) *Obs. or R. Eng.* **b** With an infinitive, to express a future of intention or to denote design, *to be going to* being thus equivalent to *to be about to*; as, I was *going* to say, I am *going* to begin harvest.

☞ The past participle, **gone**, is used in many special senses: **a** Sent beyond the mark, as an arrow. **b** Very, or dead, drunk; — also, *gone in drink*. *Obs.* **c** Infatuated; with *on* or *upon*, enamored of; violently in love with. *Colloq.* **d** With *far*, much advanced; deeply engaged or involved; also, much wearied or fatigued. **e** Lost; ruined. **f** With an expression denoting a space of time, ago; since; as, we have not heard of him these ten years *gone*; two years, *gone* yesterday. Cf. COME, 1st note. **g** With a statement of age, more than; above; as, he is *gone* twenty-one and is of age.

☞ The auxiliary *be* is often used with *gone* in perfect tenses, to give the participle an adjectival force, as expressive of a condition, rather than the verbal force, emphasizing the action, which is normal with *have*; as, he *is* long *gone*; he *has gone* long ago. Cf. COME, 2d note.

☞ For various other phrases in which *go* is used with nouns, see the nouns.

to go a-begging. **a** To go about begging. **b** To be not in demand, to be undesired. — **to go about.** **a** To go hither and thither. **b** To set about; to undertake.
They never *go about* . . . to hide or palliate their vices. *Swift.*
c *Mil.* To turn round. *Obs.* **d** *Naut.* To tack; to wear. — **to go abroad.** **a** To go to a foreign country. **b** To go out of doors or away from home. *Obs. or Dial.* **c** To become public; to be published or disclosed; to be current; to circulate.
Then *went* this saying *abroad* among the brethren. *John* XXI. 23.

Gog and Ma'gog (gŏg, mā'gŏg). Popular names for two colossal wooden statues in the Guildhall, London, which were constructed in 1708 to replace older effigies burned in the Great Fire (1666). Connection has been suggested with Corineus and Goëmagot in Geoffrey of Monmouth. He professed to use a very old book, "Britannici sermonis," but he is not to be trusted. The Welsh translation of Geoffrey, the Brut Tysilio, says *Gogmagog*, and this may have been Geoffrey's real spelling.

gold (gōld), *n.* [AS. *gold*; akin to D. *goud*, OS. & G. *gold*, Icel. *gull*, Sw. & Dan. *guld*, Goth. *gulþ*, Russ. *zoloto*, OSlav. *zlato*; prob. akin to E. *yellow.* See YELLOW; cf. GILD, *v. t.*] **1.** A metallic element of characteristic yellow color, the most precious metal used as a common commercial medium of exchange. It is the most malleable and ductile of all the metals, and one of the heaviest substances known (sp. gr., 19.27 when cast, increased somewhat by hammering). It is quite unalterable by heat, moisture, and most corrosive agents, and therefore well suited for its use in coin and jewelry. Gold is also used in gilding (see GOLD LEAF), in photography (as the chloride), etc. Melting point, 1064° C. (1947° F.). Symbol, *Au* (*aurum*). At. wt., 197.2. Gold is found combined with tellurium, as in sylvanite, but occurs chiefly in the free state. Native gold contains usually eight to ten per cent of silver, but often much more. See ELECTRUM. Gold is very widely disseminated, but in very small quantity. It usually occurs in quartz veins (gold quartz), in slate and metamorphic rocks, in sheeted zones in igneous rocks, and disseminated in ancient conglomerates (South Africa), or in sand and alluvial soil, resulting from the disintegration of such rocks. It also occurs associated with other metallic substances, as in auriferous pyrites. Alluvial gold is usually separated by washing; auriferous rock is usually ground and treated by amalgamation, chlorination, or cyaniding (see CYANIDE PROCESS). Pure gold is too soft for ordinary use, and is hardened by alloying with silver or copper, the latter giving a characteristic reddish tinge (see CARAT, FINENESS). Gold is now the legal monetary standard of most nations. The fixed value of pure or 24-carat gold is $20.67, or 77s. 10½d., per troy ounce, from which the commercial price varies very slightly. Market quotations are for metal of standard fineness, i. e., 900 in New York and Paris, and 916.6 in London. Chemically, gold is comparatively inactive.

Heads (Front and Side view) of a typical set of Golf Clubs. 1 Driver; 2 Brassy; 3 Cleek; 4 Mid-iron; 5 Mashie; 6 Niblick; 7 Putter.

a series of holes (usually nine or eighteen) situated at varying distances on a course, or links, with natural or artificial obstacles, or hazards, irregularly interposed. The object is to put the ball into each hole in as few strokes as possible. See MATCH PLAY, MEDAL PLAY. Clock golf is a game which consists in putting the ball, in as few strokes as possible, into a hole in the interior — not necessarily the center — of a circle from twelve respective points placed at regular intervals circumferentially and numbered like the hours on the dial of a clock. A set of golf clubs necessary for the proper playing of the game of golf usually consists of a driver, brassy (or brassie), cleek, mid-iron, mashie, niblick, and putter. The driver is usually employed for the tee shot; the brassy through the green for long shots, and so on in a descending scale with the cleek, mid-iron, and mashie. The distance capable of being secured is determined by the degree of loft, or angle of the face of the club with the shaft, and by the length of shaft. The niblick is used for playing out of hazards; the putter, for putting the ball into the hole on the putting green.

The young count's *good nature* and easy persuadability were among his best characteristics. *Hawthorne.*
Syn. — GOOD NATURE, GOOD HUMOR, GOOD TEMPER. GOOD NATURE implies a disposition (sometimes unduly compliant) to please and be pleased; GOOD HUMOR, a spirit of ease and cheerfulness, esp. as displayed in one's demeanor or in social intercourse; GOOD TEMPER, a habit of mind not easily ruffled or provoked. See DISPOSITION, MOOD, WIT.
I grant you that he is rather too *good-natured*; that he's too much every man's man; that he laughs this minute with one, and cries the next with another. . . . His *good nature* arises rather from his fears of offending the importunate, than his desire of making the deserving happy. *Goldsmith.*
That solid imperturbable ease and *good humor* which is infectious, and, like great grassy hills in the sunshine, quiets even an irritated egoism. *G. Eliot.*

good'-na'tured (gōōd'nā'tŭrd), *a.* Characterized by good nature; naturally mild in temper; not easily provoked. — **good'-na'tured-ly,** *adv.* — **good'-na'tured-ness,** *n.*

good'ness, *n.* [AS. *gōdnes.*] **1.** Quality or state of being good; excellence; strength; virtue; kindness; benevolence; beneficence; generosity; as, the *goodness* of timber, of a soil, of food; *goodness* of character, of disposition, of conduct, etc. The word is used colloquially as an exclamation or in various exclamatory phrases, as, *for goodness' sake! goodness gracious!* — the reference being originally to the goodness of God.
2. That which is good; a good deed or action. *Obs.*
Syn. — GOODNESS, VIRTUE agree in the idea of excellence. In their nonmoral senses, GOODNESS is of general application, VIRTUE connotes efficacy or potency; as, "the *goodness* of his land" (*Hos.* x. 1); "the *virtue* of the ring" (*Shak.*). In their common ethical uses (for technical distinctions, see defs.), *goodness* (opposed to *evil*) is apt to suggest inherent quality or the more human and kindly moral attributes; *virtue* (opposed to *vice*) is rather *goodness* in its (sometimes coldly) formal aspects; as, "There is some soul of *goodness* in things evil" (*Shak.*); "As for her kindness, who ever . . . would look for aught else from one who was an angel of *goodness* and pity?" (*Thackeray*); "*Virtue* itself turns vice, being misapplied" (*Shak.*); "*Virtue* alone is happiness below" (*Pope*). *Goodness* (not *virtue*) is an attribute of God; as, "The Lord God, merciful and gracious, long suffering, and abundant in *goodness* and truth" (*Ex.* xxxiv. 6). *Virtue*, in its special sense, is a synonym for *chastity*; as, "Her *virtue* is her dowry" (*Shelley*).

goods (gōōdz), *n. pl.* Wares; chattels; merchandise (see GOOD, *n.*, 6); — often used attributively in relation to transportation; as, **goods engine, goods shed, goods train, goods wagon** *or* **waggon** (car), **goods yard.** This attributive use is chiefly British, the common word in the U. S. being *freight*.

2. Benevolence; well wishing; kindly feeling.
3. Cheerful consent; heartiness; readiness.
4. *Law.* The custom of any trade or business; the favor or advantage in the way of custom which a business has acquired beyond the mere value of what it sells, whether due to the personality of those conducting it, the nature of its location, its reputation for skill, promptitude, etc., or any other circumstance incidental to the business and tending to make it permanent. It is now generally held that one who sells his bare legal good will does not forfeit the right to continue in the same business in the same neighborhood and to deal with old customers, but that he must not use his formerly acquired knowledge to steal old customers away from his vendee, nor represent that he is carrying on the business as successor to the former concern; that is, he may do what any stranger to the former concern may do.
Syn. — See FAVOR.

1. Any of various lamellirostral birds in many respects intermediate between the swans and ducks, which constitute the subfamily Anserinæ of the family Anatidæ. They are usually larger and longer-necked than the ducks, though inferior in these respects to the swans; they have a high, somewhat compressed bill, legs of moderate length, completely feathered lores, and reticulate tarsi. Most of them are largely herbivorous and many are noted for their extensive migrations. The commonest wild species in America is the Canada goose (*Branta canadensis*), which is chiefly gray and brownish, with black head and neck, and white or whitish cheek patches. The domestic geese are apparently derived from several wild species; those of Europe and America chiefly from the graylag. They are extensively kept for their flesh and feathers, and in former times for their quills, which were made into pens. See BERNICLE GOOSE, BRANT, SNOW GOOSE, etc.

See COTTON.

Goth (gŏth), *n.* [L. *Gothi*, pl.; cf. Gr. Γόθοι, Goth. *Gutpuda* the Gothic people.] **1.** One of an ancient Teutonic race, who originally dwelt between the Elbe and the Vistula, or, according to some records, in northern Germany and southern Sweden, and in the early centuries of the Christian era overran the greater part of the Roman empire, of which, under Theodoric the Great, they were virtual masters. They had early taken possession of Dacia (modern Transylvania and adjoining regions), and, dividing into two groups, came to be known as **Ostrogoths** and **Visigoths**, or **East Goths** and **West Goths**. The former inhabited countries on the Black Sea up to the Danube; some of them took possession of the province of Mœsia, and hence were called **Mœsogoths**. The West Goths, after wandering to and fro over Europe, founded the Visigothic kingdom in Spain and southern France, forming the foundation of the later Spanish nationality.
2. One who is rude or uncivilized; a person without culture or refinement, a barbarian.

Got'ham (gŏt'ăm, *often improperly* gō'thăm, *Oxf. E. D.; the second pron.* (*or* gŏth'ăm) *is usual in America, as in sense* **2 b**), *n.* **1.** A village in England whose inhabitants were proverbial for their follies, as testified by a well-known nursery rime and by "The Merry Tales of the Mad Men of Gotham," compiled about 1568. It is not certain that Gotham in Nottinghamshire is the place alluded to.
2. Hence: **a** Newcastle, England. **b** (*usually* gō'thăm *or* gŏth'ăm) The city of New York; — a popular name first given to it in "Salmagundi" (a humorous work by Washington Irving, William Irving, and James Kirke Paulding), because the inhabitants were such wiseacres.

Goth'en-burg sys'tem (gŏt'ĕn-bûrg). A system of regulation of the sale of intoxicating liquors used in Sweden (orig. at Gothenburg, or Göteborg) and largely in Norway and Finland, in which, among other things, the control of the sale is given to a corporation which makes no profit beyond a certain per cent (6 in Sweden, 5 in Norway) from the sale, all other profits being required to be paid over to the local governments, or in some later legislation to the central government or to charitable institutions.

Goth'ic (gŏth'ĭk), *a.* [L. *Gothicus*: cf. F. *gothique*.] **1.** Of or pertaining to the Goths or their language.
2. Teutonic; Germanic. *Obs.*
3. [*often l. c.*] Of, pert. to, or characteristic of, the Middle Ages; medieval; romantic, as opposed to classical; derogatorily, of, pertaining to, or characteristic of, the dark ages; hence, rude; barbarous; rough; fierce. See GOTHICISM, 2.
Whatever was old was absurd; and *Gothic* — an epithet applied to all medieval art, philosophy, or social order — became a simple term of contempt. *Sir L. Stephen*
We have seen that, during the classical period, "*Gothic*," as a term in literary criticism, was synonymous with barbarous, lawless, and tawdry. *H. A. Beers.*
4. *Arch.* Of, pert. to, or designating, a style of building and ornament. See GOTHIC ARCHITECTURE. The term was originally applied derogatorily to any style not classical Greek or Roman, and has been objected to as inappropriate for an architectural system owing nothing to the Goths.
5. *Paleography.* Pertaining to or designating a style of writing which appeared in the 12th century, and which is the French minuscule with the curved parts replaced by angles. It is the origin of the modern black letter.
6. Designating, or pert. to, a style of type. See GOTHIC, *n.*, 3.
7. Of, pertaining to, or designating, a style of beautifully designed and well-made plate armor of the 15th century.
Gothic arch, the pointed arch, esp. one with a joint instead of a keystone at its apex. See ARCH, *Illust.* (6 & 7). — **G. architecture**, the architectural style developed in northern France and spreading through western Europe from about 1160 to the 15th century. The need of roofing with masonry large interiors for public meetings, with the least obstruction of light and sound, led to the converging of weights and strains at isolated points upon slender vertical piers and counterbalancing buttresses, until the Gothic building became fundamentally a stone skeleton of pillars, props, and ribs, upon which rest shells of vaulting. Inclosing walls were consequently made thin, or in the best examples almost wholly replaced by large windows of colored glass, stiffened with metal work and stone tracery. Pointed arches and vaulting replaced the round of the Romanesque, having the advantage of presenting less lateral thrust and simpler lines at the groins of intersection. See ARCHITECTURE, *Table.* — **G. stitch**, chain stitch. — **G. Version** (of the Bible). See VERSION.

Goth'ic, *n.* **1.** The Teutonic language of the Goths, chiefly known from the Mœsogothic translation of the Bible, by Ulfilas. The Gothic alphabet, invented by Ulfilas, was based on the Greek, but included several Latin characters and a few runic signs already used by the Goths. It consisted of 24 letters, to which were added two characters having only numerical values, and one used only in foreign proper names. See INDO-EUROPEAN.
2. Gothic style or decoration. See GOTHICISM, 2.
3. *Print.* **a** In England, black letter. **b** [*often l. c.*] In the United States, a square-cut type with no serifs; — called in England *grotesque* or, sometimes, *Dorc.*

☞ This line is in Nonpareil GOTHIC.

Goth'i-cism (gŏth'ĭ-sĭz'm), *n.* **1.** Rudeness; barbarousness; inelegance, or an inelegance.
2. Gothic principles or characteristics generally; conformity to, or practice of, the Gothic style As a critical term *Gothicism* denotes the principles, qualities, or informing spirit of medieval art. During the Renaissance, and until within the 18th century, this art was thought of as typically uncouth and extravagant, with unity of conception lost sight of in florid and fanciful or grotesque details. With fuller appreciation of Gothic architecture "*the Gothic*" has taken the favorable signification of rugged grandeur, of the blended effects of vivid imagery with an appeal to the mysterious and infinite. Gothicism has thus been akin to *romanticism*, in later critical thought, as opposed to *classicism*.
3. A Gothic idiom.

Goth'i-cist (-sĭst), *n.* A person who is familiar with or who is devoted to Gothic style, as in architecture.

Goth'i-cize (-sīz), *v. t.*; GOTH'I-CIZED (-sīzd); GOTH'I-CIZ'ING (-sīz'ĭng). To make Gothic; to give a medieval aspect or character to; to transform to the Gothic style, as of architecture. — *v. i.* To adopt or use the Gothic style, as of architecture. — **Goth'i-ciz'er** (-sīz'ẽr), *n.*

gō'thite, *or* **goe'thite** (gû'tīt), *n.* [After the poet *Goethe.*] *Min.* A hydrous oxide of iron, $Fe_2O_3 \cdot H_2O$, occurring in prismatic crystals, also massive, with a fibrous, reniform, or stalactitic structure The color varies from yellowish to blackish brown. gov'ern (gŭv'ĕrn), *v. t.* ; GOV'ERNED (-ĕrnd) ; GOV'ERN-ING. [OF. *governer*, F. *gouverner*, fr. L. *gubernare* to steer, pilot, govern, Gr. κυβερνᾶν. Cf. GUBERNATORIAL.] **1.** To direct and control the actions or conduct of, either by established laws or by arbitrary will ; to direct and control, rule, or regulate, by authority. "Fit to *govern* and rule multitudes." *Shak.*

2. Hence, to control or direct the action, conduct, or operation of ; to regulate ; influence ; restrain ; manage ; administer ; as, to *govern* the life ; to *govern* a horse.

Govern well thy appetite. *Milton.*

Govern these ventages with your fingers and thumb, and it will discourse most eloquent music. *Shak.*

3. To take care of ; to tend ; to treat. *Obs.*

4. To be a rule, precedent, law, or deciding principle for ; to apply to in a determining or deciding way.

5. *Gram.* To require to be (in a particular case or mood) ; as, a transitive verb *governs* a noun in the objective case ; or to require (a particular case or mood) ; as, a transitive verb *governs* the objective case. Formerly, also, to require (a verb) to be (in a particular person and number) ; — said of the subject.

Syn. — Regulate, influence, manage, direct, conduct, supervise. — GOVERN, RULE. GOVERN, the more general term, implies direction, control, or restraint; RULE frequently suggests more immediate, commanding or (sometimes) arbitrary authority or influence ; as, "the Right Divine of kings to *govern* wrong" (*Pope*) ; "resolved to ruin or to *rule* the state" (*Dryden*) ; "I have no tongue, sir. — And for mine, sir, I will *govern* it" (*Shak.*) ; "He that *ruleth* his spirit [is better] than he that taketh a city" (*Prov.* xvi. 32) ; "His wife . . . *ruled* her husband's opinions better than she could *govern* his conduct" (*Thackeray*). See COMMAND, CONDUCT, CHIEF.

2. One who governs ; a chief ruler or magistrate ; specif. : **a** The Deity, or a deity. **b** A person appointed to govern a province, territory, town, fortress, etc. ; esp. : (1) The official representing the crown in a British colony or dependency.

The *governor* of a colony constitutes the only political link connecting the colony with the mother country. So far as regards the internal administration of his government, he is merely a constitutional sovereign acting through his advisers ; interfering with their policy or their patronage, if at all, only as a friend and impartial counselor. But whenever any question is agitated touching the interests of the mother country, — such, for instance, as the imposition of customs duties, or the public defense, — his functions as an independent officer are called at once into play. He must see that the mother country receives no detriment. *H. Merivale.*

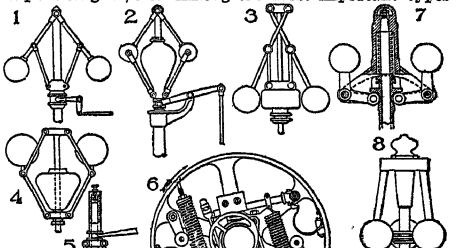
Colonial *governors* invariably hold office during the pleasure of the crown ; but their period of service in a colony is usually limited to six years. *Alpheus Todd.*

(2) The person elected as chief executive official of a State in the United States. In some States, as Massachusetts, he is assisted by an elected advisory body called the **governor's council**. (3) The agent, in a Prussian province, of the central government, or executive departments at Berlin, having very large powers of supervision over subordinate officials and local administration ; — called in German *Oberpräsident*. **c** The captain or commander of a company, esp. an armed body. *Obs.*

3. One who has the care of a young man's education and occupations ; a tutor. *Obs.*

4. One looked upon as governing, as an employer, one's father, an elderly person, etc. *Slang.*

5. *Mach.* An automatic attachment to an engine for controlling its speed, usually by regulating the supply of the working fluid. Governors usually work by the centrifugal action of two or more balls or weights which fly away from or towards their axis of revolution according as their speed is increased or diminished, and by suitable linkwork or other connections this motion is used to actuate a throttle valve or to vary the point of cut-off in an expansion gear, etc. Among the most important types



Governors, *Mach.*

are the following : (1) The **simple**, *or* **Watt's, governor** (fig. 1), in which two ball-carrying arms are connected by a pair of links to a sliding sleeve whose travel controls a throttle valve in the steam pipe. Governors having the balls attached as in Watt's governor are commonly called **pendulum governors**. (2) The **loaded governor**, as **Porter's** (fig. 2) and **Proll's** (fig. 4) governors, with a heavy sliding weight above the sleeve. (3) **Spring governor**, similar to this, but having the weight replaced by a spring, as in **Hartnell's governor** (fig. 7), in which the balls are fixed to the ends of bell cranks whose other ends control the sleeve against the pressure of a spring, or the **Pickering governor** (fig. 8), in which the balls or weights are fixed to the centers of spring links connected with the spindle sleeve. Isochronism is variously attained, as in the **parabolic governor** (fig. 5) by constraining the balls to move in a parabolic curve, or in other governors by approximating to this movement by crossing the rods, as in **Head's**, *or* **Farcot's, governor** (fig. 3), which may be either loaded or of the spring variety. Of a different action is the **disengagement governor**, which has an elongated sleeve, between the upper and lower flanges of which is a small wheel, which at a certain point engages with one of the flanges to operate a regulating mechanism. This governor is usually supplementary to a larger and more sensitive governor. Another class is the **differential**, *or* **dynamometric, governor**, a common form of which consists of a sort of friction brake driven through a differential gear. The **wheel governor**, a common variety of **shaft governor** (that is, a governor revolving

sisting of the crowned pigeons (which see). It is the type of a subfamily, **Gou-rĭ'næ** (-rĭ'nē).

LL. *gradalis*, which perh. originally meant a vessel divided into compartments for different kinds of food, and perh. was formed fr. L. *gradus* step; or cf. LL. *garalus* a vessel for liquids.] A platter; a cup; a chalice; — used only [*cap.*] of the *Holy Grail*. The *Holy Grail*, according to some legends of the Middle Ages, was the platter from which Christ ate at the Last Supper and in which Joseph of Arimathea later collected blood from Christ's body; according to others, erroneously, it is said, it was identified with the wine cup used by Christ at the Last Supper. The Grail was brought to England and there preserved for generations. If approached by any but a perfectly pure and holy person, it would be borne away and vanish. Its keepers having become impure, it disappeared, and thereafter was an object of search to numerous knights. The quest was to be undertaken only by one who was perfectly chaste in thought, word, and act. Percivale, Galahad, and Bors only, of King Arthur's knights, achieved the quest and saw the Grail.

1. That branch of linguistic science which treats of the classes of words, their inflections or other means of indicating relation to each other, and their functions and relations in the sentence, as employed according to established usage; the study of forms of speech, and their relations to one another, the art concerned with the right use and application of the rules of a language in speaking or writing. Treatises or books on grammar often include information on related subjects, as phonology, prosody, or the history of the language. The grammar of the classical languages (of which the term was first used) is usually treated under four heads, Orthography, Etymology (or Inflection), Syntax, and Prosody, to which a fifth head, Orthoëpy, is sometimes added. English grammar was at one time similarly divided, but its treatment is now usually grouped under Phonology, Accidence, and Syntax. **Historical grammar** is concerned with the study of the historical development of the sounds, inflections, and syntax of a language. **Comparative grammar** examines the phenomena of two or more kindred languages, to determine by comparison the character and extent of their relationship. **General, philosophical,** *or* **universal, grammar** is concerned with the general principles which underlie the grammatical phenomena of all languages.

sive because of physical, moral, or intellectual greatness; illustrious, stately, dignified, or noble (said of persons); majestic, splendid, magnificent, lofty, or sublime (said of things); as, a *grand* monarch; a *grand* man; a *grand* general; a *grand* view; a *grand* conception.

They are the highest models of expression, the unapproached masters of the *grand* style. *M. Arnold.*

9. Deserving of great admiration; fine; splendid. *Colloq.*

10. Standing in the second or some more remote degree of ancestry or descent; — generally used in composition; as, *grand*father, *grand*son, *grand*child, etc.

Syn. — GRAND, GRANDIOSE, MAGNIFICENT, GORGEOUS, SPLENDID, SUPERB, SUBLIME. That is GRAND which is imposing by virtue of its magnitude, majesty, or nobility; GRANDIOSE (esp. used with reference to literary or artistic style; see TURGID), in a good sense, adds to *grand* the implication of stateliness or becoming pomp; in a bad sense, it implies an affectation or mere outward appearance of grandeur; as, "The *grand* open curve . . . he drew . . . with a free hand in great sweeping lines" (*M. Hewlett*), "a *grand* old Italian air, requiring severity of tone and power" (*G. Meredith*); "The *grand* style arises in poetry, when a noble nature, poetically gifted, treats with simplicity or with severity a serious subject" (*M. Arnold*); "Milan always affected my imagination as representing . . . the noble, *grandiose* splendor and wealth [of the middle age], as Antwerp represents the bourgeois splendor and wealth" (*id.*); "Wooden verse, occasionally *grandiose* but never *grand*, and her [George Eliot's] purple passages have the purple of plush, not of velvet" (*G. Saintsbury*). MAGNIFICENT implies imposing beauty, amplitude, or power; GORGEOUS, sumptuousness, sometimes showiness, esp. of color; SPLENDID, brilliancy or luster (lit. or fig.); SUPERB, commanding stateliness or opulence; that is SUBLIME (the strongest term) which awakens, esp. through the impression of loftiness, whether physical or moral, mingled admiration and awe; as, "Its [the pine's] *magnificent* erectness. *Magnificent!* — Nay, sometimes, almost terrible" (*Ruskin*); "Where the *gorgeous* East . . . showers on her kings barbaric pearl and gold" (*Milton*); "*Gorgeous* curtains . . . of the tulip's crimson drapery" (*J. R. Drake*); "In each face he saw a gleam of light, but *splendider* in Saturn's, whose hoar locks shone like the bubbling foam about a keel" (*Keats*); "By the vision *splendid* is on his way attended" (*Wordsworth*), "In spite of the sensitive delicacy of this face, there was a something accipitrine about it — something sinister and *superb*, that made me think of a falcon" (*Lafcadio Hearn*), "O'er the breast's *superb* abundance where a man might base his head" (*R. Browning*); "A sense *sublime*, of something far more deeply interfused, whose dwelling is the light of setting suns" (*Wordsworth*); "As the greatest only are, in his simplicity *sublime*" (*Tennyson*). See AUGUST.

grang'er-ize (-īz), *v. t. & i.*; -IZED (-īzd'); -IZ'ING (-īz'ĭng). [After the Rev. James *Granger*, whose "Biographical History of England" (1769) was a favorite book for illustration in this manner.] To illustrate (a book) by inserting engravings, etc., collected from other sources, esp. from other books. — **grang'er-i-za'tion** (-ĭ-zā'shŭn), *n.* — **grang'er-iz'er** (-īz'ẽr), *n.*

granger railroads, *or* **granger roads.** *Finance.* Certain railroads whose traffic largely consists in carrying the produce of farmers or grangers; — specifically applied to the Chicago & Alton; Chicago, Burlington & Quincy; Chicago, Rock Island & Pacific; Chicago, Milwaukee & St. Paul; and Chicago & Northwestern, railroads. *U. S.*

granger stocks *or* **shares.** Stocks or shares of the granger railroads. *U. S.*

gra-nil'la (grȧ-nĭl'ȧ; *Sp.* grȧ-nēl'yȧ; 194), *n.* [Sp., prop., small seed.] Cochineal in small grains or dust or consisting of the dried bodies of small or half-grown insects.

gran'ite (grăn'ĭt), *n.* [It. *granito* granite, adj., grainy, p. p. of *granire* to make grainy, fr. L. *granum* grain: cf. F. *grani.* See GRAIN.] **1.** *Petrog.* A crystalline granular rock, mainly of plutonic origin, consisting essentially of quartz and feldspar, but usually containing also mica or hornblende, etc., and minute amounts of certain other minerals. The color of granite is usually whitish, flesh-red, or gray, caused by the mingling of small black and light-colored particles. The texture varies from fine to very coarse. Some varieties are named from the principal accessory mineral; as, *muscovite granite, biotite granite* (granitite), etc. In the restricted usage of petrographers typical granite contains wholly or mainly alkali feldspars, such as orthoclase; if the feldspar is mostly plagioclase the rock is diorite. Granite is very hard and durable, though great heat causes it to scale badly. It takes a fine polish. See APLITE, PEGMATITE, GRAPHIC GRANITE.

2. A kind of water ice in which somewhat coarse particles of ice are present.

3. Granite ware.

granite porphyry. *Petrog.* Porphyritic fine-grained granite; that is, granite in which large crystals of quartz and feldspar are embedded in a finer crystalline mass of the same minerals. Small amounts of mica, hornblende, etc., may be present. It is commonly found in dikes, intruded sheets, laccoliths, etc.

granite ware. **a** Pottery with a speckled appearance imitating that of granite. **b** A very hard kind of pottery resembling ironstone china. **c** A kind of ironware, coated with an enamel suggestive of granite.

gra-nit'ic (grȧ-nĭt'ĭk), *a.* [Cf. F. *granitique.*] **1.** Of or pertaining to granite; like granite in composition, color, etc.; having the nature of granite; consisting of granite; consisting of crystalline grains of nearly uniform size; as, *granitic* structure; *granitic* mountains.

2. Hard or unimpressionable as granite; austere; inflexible.

The *granitic* conventions of an old New England village. *C. G. D. Roberts.*

gra-nit'i-form (-ĭ-fôrm), *a.* [*granite* + *-form.*] *Geol.* Resembling granite in structure or shape.

gran'it-ite (grăn'ĭ-tīt), *n. Petrog.* A variety of granite containing biotite (and sometimes also hornblende), but not muscovite. It is the commonest kind of granite.

gran'it-ize (-tīz), *v. t.*; -IZED (-tīzd); -IZ'ING (-tīz'ĭng). *Petrog.* To permeate with granitic material (feldspar and quartz). — **gran'it-i-za'tion** (-tĭ-zā'shŭn; -tī-zā'shŭn), *n.*

gran'it-oid (-toid), *a.* Also **gran'it-oi'dal** (-toi'dăl). [*granite* + *-oid*: cf. F. *granitoïde.*] Resembling granite in granular appearance; granitic; as, *granitoid* gneiss.

gran'ny, gran'nie (grăn'ĭ), *n.*; *pl.* -NIES (-ĭz). **1.** A grandmother; — used familiarly, affectionately, or somewhat disrespectfully; also, loosely, an old woman.

2. A nurse. *Local, U. S.*

3. A simpleton; a person who is fussy or behind the times; an "old woman." *Dial. or Slang.*

4. A granny knot.

gran'ny knot, gran'ny's bend, gran'ny's knot (grăn'ĭ), a kind of readily jammed and insecure knot often made by the inexperienced instead of a reef knot. See KNOT, 1.

gran'o-di'o-rite (grăn'ō-dī'ō-rīt), *n.* [*granite* + *diorite.*] *Petrog.* A granular, intrusive, igneous rock, intermediate between granite and quartz diorite.

gran'o-lith (grăn'ō-lĭth), *n.* [L. *granum* a grain (or E. *granite*) + *-lith.*] An artificial stone of crushed granite cement, for paving. — **gran'o-lith'ic** (-lĭth'ĭk), *a.*

gran'o-phyre (grăn'ō-fīr), *n.* [L. *granum* a grain (or E. *granite*) + *-phyre.*] *Petrog.* **a** A porphyritic igneous rock, chiefly composed of alkalic feldspar and quartz, and having a granular ground mass. **b** A similar rock having the quartz and feldspar of the ground mass arranged in micropegmatite intergrowths. — **gran'o-phy'ric** (-fĭ'rĭk), *a.*

grant (grănt), *v. t.*; GRANT'ED, GRANT'ING. [ME. *graunten, granten*, OF. *graanter, craanter, creanter*, to promise, yield, (assumed LL.) *credentare* to make believe, fr. L. *credens*, p. pr. of *credere* to believe. See CREED, CREDIT.]

1. To agree or assent to; to allow to be fulfilled; to give by consent; to accord.

Wherefore did God *grant* me my request. *Milton.*

2. To bestow or confer, with or without compensation, particularly in answer to prayer or request; to give.

Grant us thy peace all the days of our life. *Bk. of Com. Prayer.*

3. To give or bestow formally, usually in answer to a petition, as a privilege; to make conveyance of; to give the possession or title of, esp. by a deed or formal writing; to convey. Formerly at common law the word *grant* used in a deed was held by some to impart a covenant for quiet enjoyment; this effect is expressly removed by statute (8 & 9 Vict. c. 106, sec. 4) in England.

4. To yield or relinquish; to give over. *Obs.*

5. Formerly, to admit, allow, or acknowledge; now, to admit as true (what is not yet satisfactorily proved); to allow or concede for the sake of argument; to concede to be.

Grant that the Fates have firmed by their decree *Dryden.*

Syn. — GRANT, CONCEDE agree in the idea of bestowal or acknowledgment (esp. of a right or privilege) in response to a petition or a claim. Of the two, GRANT often implies the more voluntary, CONCEDE, the more forced or reluctant, yielding. See ACKNOWLEDGE, ALLOW, GIVE.

grant, *v. i.* To assent; consent. *Obs. Chaucer.*

grant, *n.* [ME. *grant, graunt*, OF. *graant, creant*, promise, assurance. See GRANT, *v. t.*] **1.** Act of granting; specif.: **a** Consent, permission, promise, or acknowledgment. *Obs.* **b** A bestowing or conferring, concession, or allowance, esp. of something asked for or in dispute. **c** A gift or bestowal by one having control or authority over it, as of land, money, or a privilege by the government.

2. Thing or property granted; gift; boon; specif., a tract of land, a monopoly, or the like, granted by the government.

3. *Law.* A transfer of property, real or personal, by deed or writing; — in case of personal property often used as equivalent to *assignment* and distinguished from a *gift.* Formerly: *Eng. Law.* A conveyance of an incorporeal hereditament, which could pass only by deed, as distinguished from property transferable by *livery.*

4. Specif., in Maine, New Hampshire, and Vermont, a kind of minor territorial division; — usually unorganized or unincorporated, consisting of land which originally was laid off by the State authorities and granted to some individual or individuals, or to some educational institution for its support (the land having been in many cases later sold).

grant in aid. See AID, *n.*, 4. — **in g**, *Law*, transferable only by grant; as, to lie, or be, *in grant.*

gran-tee' (grăn-tē'), *n. Law.* The person to whom a grant or conveyance is made.

grant'er (grăn'tẽr), *n.* One who grants.

Gran'tha al'pha-bet (grăn't'hă). [Skr. *grantha* a fastening, tying, a knot; hence applied to leaves of a book tied together.] A literary script alphabet of the southern Dravidian type, used by the Tamil Brahmans for the Sanskrit transcriptions of their sacred books.

grant'or (grăn'tôr; grăn-tôr'), *n. Law.* The person by whom a grant or conveyance is made.

gran'u-lar (grăn'ū-lẽr), *a.* [See GRANULE.] **1.** Having a structure or texture consisting or appearing to consist of grains or granules; granulated.

2. *Med.* Having or marked by granulations; granulated.

3. Of the nature of granules.

granular degeneration, *Med.*, a form of degeneration in which the affected tissues become swollen and assume a granular, cloudy appearance; — called also *cloudy swelling.* — **g. kidney,** *Med.*, a diseased condition of the kidney in which it becomes atrophied, hard, and granular. — **g. layer,** *Anat.*, the deeper layer of the cortex of the cerebellum. It is of a reddish color and contains numerous small cells.

gran'u-late (grăn'ū-lāt), *v. t.*; -LAT'ED (-lāt'ĕd); -LAT'ING (-lāt'ĭng). [See GRANULE.] **1.** To form or crystallize into grains, granules, or small masses; as, to *granulate* sugar.

2. To raise in granules or small asperities; to make rough.

gran'u-late, *v. i.* **1.** To collect or be formed into grains; as, cane juice *granulates* into sugar.

2. *Med.* To undergo granulation.

gran'u-lat'ed (-lāt'ĕd), *p. a.* **1.** Consisting of, or resembling, granules or grains; crystallized in grains; granular; as, *granulated* sugar.

2. Having numerous small elevations on the surface, as shagreen; roughened by, or raised in, granular or small elevations; granular; also, appearing thus roughened.

3. *Med.* = GRANULAR, 2.

granulated steel, steel made by embedding granulated pig iron in powdered hematite, and heating in a furnace.

gran'u-la'tion (-lā'shŭn), *n.* **1.** Act or process of forming or crystallizing into grains; as, the *granulation* of gunpowder or sugar.

2. State of being granulated.

3. One of the small elevations of a granulated surface; also, something resembling such a formation.

4. *Med.* **a** One of the small, red, grainlike prominences which form on a raw surface (that of wounds or ulcers), and are the efficient agents in the process of healing. **b** Act or process of the formation of such prominences.

gran'u-la'tor (grăn'ū-lā'tẽr), *n.* One that granulates, as a rotating steam-heated cylinder in which sugar is dried and granulated.

gran'ule (grăn'ūl), *n.* [L. *granulum*, dim. of *granum* grain: cf. F. *granule.* See GRAIN a kernel.] A little grain; a small particle; a pellet; specif., *Bot.*, a small grain or particle, as a pollen grain, a *granule* of protoplasm, etc.; in certain thallophytes, a sporule.

granule cell. *Anat.* A variety of cell, occurring in connective tissue, in which the cytoplasm contains coarse granules staining deeply with aniline colors.

gran'u-lif'er-ous (grăn'ū-lĭf'ẽr-ŭs), *a.* [*granule* + *-ferous.*] Bearing, producing, or full of, granules.

gra-nu'li-form (grȧ-nū'lĭ-fôrm; grăn'ū-), *a.* [*granule* + *-form.*] Having a granular structure; granular.

gran'u-lite (grăn'ū-līt), *n.* [From GRANULE.] *Petrog.* **a** A whitish, granular rock, consisting of alkalic feldspar, quartz, and small red garnets intimately mixed, occurring with crystalline schists. **b** A fine-grained granite composed of quartz and alkalic feldspar; aplite. **c** Any rock which, by recrystallization after intense crushing, has acquired a peculiar granular structure. — **gran'u-lit'ic** (-lĭt'ĭk), *a.*

gran'u-lo'ma (-lō'mȧ), *n.*; *pl.* -MATA (-tȧ). [NL.; *granule* + *-oma.*] *Med.* A morbid growth resembling granulation tissue. — **gran'u-lom'a-tous** (-lōm'ȧ-tŭs; -lō'mȧ-tŭs), *a.*

gran'u-lose (-lōs), *n.* That constituent of starch granules soluble in saliva and dilute acids. See STARCH CELLULOSE.

gran'za (grăn'za), *n.* [Sp., pl. *granzas* siftings, dross.] *Ore Dressing.* Picked mercury ore in pieces over an inch in diameter. From it are screened the smaller pieces called collectively **gran-zi'ta** (-zē'tȧ), up to about 3½ inches.

grape (grāp), *n.* [OF. *grape, crape*, bunch or cluster of grapes, F. *grappe*, akin to F. *grappin* grapnel, hook; of G. origin; cf. OHG. *chrāpfo* hook, G. *krapfen*, akin to E. *cramp.* The sense perh. came from the idea of clutching. Cf. AGRAFFE, CRAMP, GRAPNEL, GRAPPLE.] **1.** A smooth-skinned, juicy berry, the fruit of vines of the genus *Vitis.* Through long cultivation, the grape exhibits more variation in characters than any other fruit. In color it ranges from pearly white to deep red, purple, or black; in shape from globose to narrowly oblong; and in size from that of the Delaware to that of the Black Hamburg.

Grapes, Leaves, and Tendrils.

2. The plant which bears this fruit; a grapevine. European grapes are derived from *Vitis vinifera*, and are cultivated chiefly for making wine or for raisins, though they also include hothouse grapes, as the muscat, black Hamburg, etc. The grapes of the eastern United States, as Concord, Delaware, etc., are from wild native species, as, *V. labrusca, V. riparia*, and *V. volundifolia.* Most California varieties are from European species.

3. The berrylike fruit or seed of certain other plants.

4. *Mil.* Grapeshot; — formerly also used in *pl.*

5. *pl. Veter.* **a** A cluster of warty nodules in the hollow of the fetlock of horses; an advanced or chronic form of grease. **b** Tuberculous disease of the pleura in cattle; — called also *grape disease. Colloq.*

grape of a cannon, the cascabel or knob at the breech of an old-time muzzle-loading gun.

grape berry moth. A small slate-colored moth (*Polychrosis viteana*) whose larvæ destroy the interior of the grape.

grape cane borer. The apple-twig borer (*Amphicerus bicaudatus*), which also bores into young grapevine shoots.

grape curculio. A minute black weevil (*Craponius inæqualis*) which in the larval state eats the interior of grapes.

grape fern. **a** Any fern of the genus *Botrychium*; — so called from the sporophylls, which resemble clusters of tiny grapes. **b** Any cultivated fern of the genus *Todea.*

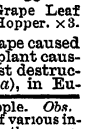
grape'flow'er (grāp'flou'ẽr), *n.* The grape hyacinth.

grape'fruit' (-frōōt'), *n.* A common globose citrous fruit extensively raised in tropical countries, with a very bitter rind and inner skin, but valued for its highly flavored somewhat acid pulp, — called also *pomelo.* It is a variety of shaddock.

grape hyacinth. Any liliaceous plant of the genus *Muscari*, esp. *M. botryoides* and *M. racemosum.* They have dense racemes of small oblong or globose blue flowers.

grape leaf folder. A black moth (*Desmia maculalis*) having a white border and white spots on the wings, whose larva eats the leaf of the grapevine, folding it and fastening it with silk to form a habitation.

grape leaf hopper, *or* **grape hopper.** A small yellowish leaf hopper, marked with red or brown bands, which sucks the juices of the leaves of the grapevine, often causing them to wither and fall off, and greatly damaging the vine. Different individuals vary much in color, and a number of species, as *Typhlocyba vitifex* and *T. comes*, have been described. They are commonly called *thrips* by vine growers.



Grape Leaf Hopper. ×3.

grape mildew. Any of several diseases of the grape caused by parasitic fungi of various orders; also, any plant causing such a disease. In the United States the most destructive is the downy mildew (*Plasmopara viticola*), in Eu-

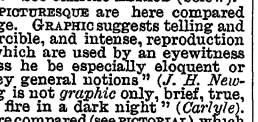
5. Having crystals resembling written or printed characters; exhibiting on the surface or in transverse section the appearance of such characters; having or designating a rock fabric in which two minerals inclose each other by mutual intercrystallization; as, *graphic* granite.

6. Of, pert to, or designating, representation by diagrams, lines, etc.; diagrammatic. See GRAPHIC METHOD (below).

Syn. — GRAPHIC, VIVID, PICTURESQUE are here compared with reference to language. GRAPHIC suggests telling and lifelike, VIVID, salient, forcible, and intense, reproduction in words; as, "Words which are used by an eyewitness to express things, unless he be especially eloquent or *graphic*, may only convey general notions" (*J. H. Newman*); "Dante's painting is not *graphic* only, brief, true, and of a *vividness* as of fire in a dark night" (*Carlyle*). That is PICTURESQUE, as here compared (see PICTORIAL), which is strikingly graphic or vivid; as, "the *picturesque* force of his style" (*Hawthorne*); "A certain warmth . . . and a certain dash of the *picturesque* are very poor essential qualities" (*Stevenson*). See CLEAR.

☞ In the phrases where only *graphic* or *graphical* is given, the form given is the more common.

graphic accent, *Gram.*, a written accent, as (′) in Spanish *Córdoba*, etc. — **g. algebra,** a branch of algebra in which equations are treated by the use of curves and straight lines. — **g. arts,** those fine arts, as drawing, painting, engraving, etc., which pertain to the representation on a flat surface of natural objects. — **graphic,** *or* **graphical, formula.** *Chem.* See FORMULA, 5. — **graphic geometry,** projective geometry. — **g. granite,** granite found in pegmatite veins or dikes, having the quartz crystals so arranged in the feldspar as to appear, in a transverse section, like written characters. — **graphic,** *or* **graphical, method,** a method making use of graphic figures, as diagrams, tracings, etc.; specif., the method of scientific analysis or investigation in which the relations or laws involved in tabular numbers are represented to the eye by means of curves or other figures; as the daily changes of weather by means of curves, in which abscissas represent the time of day, and ordinates the corresponding degrees of temperature. Graphic methods may use the metrical or the projective properties of space, or they may deal with relations holding only in the realm of order, as in graphs (see GRAPH, *n.*, 2). — **graphical statics,** *Math.*, a branch of statics in which the magnitude, direction, and position of forces are represented by straight lines, and unknown quantities are found by mechanical measurement. — **graphic tellurium,** sylvanite.



Graphic Granite (Pegmatite).

graph'ics (grăf'ĭks), *n.* Art or science of drawing, esp. according to mathematical rules, as in perspective, projection, and the like; specif., calculation, as of stresses in engineering, by the use of geometrical constructions.

at grass, at pasture; grazing; hence, in rural retirement; in rustication. — **g. of Parnassus**, any plant of the genus *Parnassia*. See PARNASSIA. — **g. of the Andes**, the tall oat grass of Europe (*Arrhenatherum elatius*). — **g. of Tong'a** (tŏng'ä). See GRASS, *Table II.* — **to go to g.** **a** To go to pasture; to graze; hence, to retire, rusticate, go for a holiday in the country, or the like. **b** To go or fall to the ground; to be knocked down. *Slang.* **c** In the imperative, a euphemism for "go to the Devil" and the like. — **to put** *or* **send to g., to put,** *or* **turn, out to g.,** to put out to pasture or to graze, as cattle; hence, to dismiss; rusticate; retire.

grass (grăs), *v. t.;* GRASSED (grăst); GRASS'ING. **1.** To plunge or lose in grass. *Rare.*
2. To graze (cattle or horses); to furnish with pasture.
3. To cover with grass or with turf.
4. To expose, as flax, on the grass for bleaching, etc.
5. To bring to the grass or ground; as, to *grass* a fish. *Slang, Colloq., or Mining.*

grass, *v. i.* **1.** To produce grass. *Rare.*
2. To graze.
3. *Printers' Slang.* To do casual or jobbing work. *Brit.*

grass cloth. Cloth of grass or vegetable fiber, as a thick cloth made in the Canary Islands; esp., a cloth woven from the tough fibers of the ramie, or grass-cloth plant.

grassed (grăst), *p. a.* **1.** Furnished or covered with grass.
2. *Golf.* Designating a club with a face that is slightly spooned or sloped backward.

‖ **gras'se-rie'** (grä's'-rē'), *n.* [F.] A noncontagious and nonhereditary disease of silkworms, causing them to have a thin stretched skin, through which a soiling liquid exudes.

grass fern. A polypodiaceous fern (*Vittaria lineata*) of Florida and the West Indies. Its narrow grasslike fronds grow in pendent tufts upon palmetto trees. Also, any of several other species of *Vittaria*.

grass finch. **a** A common American sparrow (*Pœcetes gramineus*) having the outer tail feathers partly white. It is also called **bay-winged bunting** and (from its habit of singing in the evening) **vesper sparrow.** **b** Any of various weaver birds, as the several Australian species of the genus *Poephila*. **c** = GRASS QUIT.

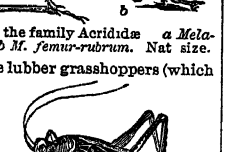
Grass Finch a.

grass'-green', *a.* Green with grass; of the color of grass; clear and vivid green.

grass hand. **a** A compositor on casual or job work. *Brit. Printers' Slang.* **b** [Chin. *ts'ao3 shou3.*] A style of Chinese and Japanese writing for business and private use, consisting of irregular cursive characters (**grass characters**).

grass'hop'per (grăs'hŏp'ẽr), *n.* **1.** Any of numerous leaping orthopterous insects of the families Acrididæ and Locustidæ. They feed on plants, and the abundance and considerable size of many species make them very destructive. The males (sometimes also the females) usually possess stridulating organs. (See STRIDULATION.) The ordinary grasshoppers belong to the family Acrididæ, which is distinguished by the short antennæ, three-jointed tarsi, and short ovipositor composed of four pieces. They are also called *locusts* (see LOCUST). Among the numerous American forms are the widely distributed red-legged grasshopper (*Melanoplus femur-rubrum*); the allied migratory Rocky Mountain grasshopper (*M. spretus*), which is about one inch long, and sometimes travels in vast hordes in the region west of the Mississippi, completely destroying the crops over large areas; and the lubber grasshoppers (which see). The Locustidæ have long slender antennæ, four-jointed tarsi, and a long ovipositor of six pieces. The species are mostly of slender and delicate build. They are called *meadow* grasshoppers, or, from the color of many species, *green* grasshoppers. The katydids also belong to this family.

Grasshoppers of the family Acrididæ. *a Melanoplus spretus, b M. femur-rubrum.* Nat size.

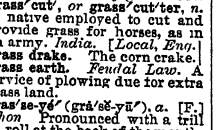


Grasshopper of the family Locustidæ. *Locusta viridissima* of Europe.

2. *Angling.* A kind of artificial bait formed of lead cast on the shank of a hook and covered with rings of colored wool or worsted.
3. *Mach.* A kind of locomotive crane. *U. S.*
4. = HOPPER, 3.

grass'hop'per, *a.* Suggesting in operation or appearance the grasshopper or its action; as, a *grasshopper* elevator (for grain); a *grasshopper* spring (for carriages); a *grasshopper* shim (used between rails); the *grasshopper* march (on parallel bars).

grasshopper engine, a steam engine having a walking beam pivoted to a swinging link at one end, the cylinder at the other end, and the connecting rod at an intermediate point. Hence, **grasshopper gear** *or* **motion.** — **g. gauge** *or* **gage,** a carpenter's marking gauge with a long fence, flat on one side and round on the other, used for riding over projections or marking in hollows. — **grasshopper lobster,** a young lobster. *Local, U. S.* — **g. sparrow,** any of several small American sparrows of the genus *Coturniculus*, esp. *C. savannarum passerinus*, called also **yellow-winged sparrow,** from a small yellow patch on the front edge of the wing. Their song resembles the stridulation of grasshoppers. — **g. warbler,** a small European warbler (*Locustella nævia*), so called from its note; — also applied to allied species.



Grasshopper Gauge.

grass'sant, *a.* [L. *grassans, -antis*, p. pr. of *grassari* to go about.] Prowling about; lurking; raging *Obs.*

Syn.—GRAY, GREY are etymologically and in general usage one and the same word, and no valid distinction in meaning can be drawn between them. A difference in connotation is nevertheless felt, apparently, by many persons, GRAY seeming to suggest a darker or colder shade than GREY, which is thought of as a lighter tint, more delicate or in some way more impalpable. But this distinction has not established itself in usage.

gree more remote in the direct line of descent; as *great-grandfather* (a grandfather's or a grandmother's father).

Syn. — GREAT, LARGE, BIG. As applied to material objects, GREAT has been practically displaced by LARGE or (*Colloq.*) BIG. Where *great* is used to denote physical magnitude, it now regularly connotes some impression (as of wonder, surprise, amusement, annoyance) associated with the size; as, a *large* (or *big*) dog; cf. a *great* dog (i. e., a dog whose size is imposing, terrifying, disconcerting, etc.); a *large* (or *big*) head; cf. "the *great* head that seemed so weighted down with thought and study" (*The Nation*); "their classical profiles, . . . their *large* black eyes" (*Byron*); "[She] on the trembling man with *great* eyes gazed" (*W. Morris*); "He 's as *big* again as he used to be, with eyes like saucers" (*Dryden*); a *big* boy, a *great* boy. *Great* alone expresses degree; as, *great* kindness, haste, *great* heat. Fig., *great* suggests importance, eminence, distinction; *large*, breadth, comprehensiveness, generosity; *big* carries over the implication of mere extent or bulk; as, a *great* cathedral, symphony, a *great* general; *large* tolerance, discretion; "that *large* utterance of the early gods" (*Keats*); "There is something in Webster that reminds me of Victor Hugo. There is the same confusion of what is *big* with what is *great*" (*Lowell*); "We 're no longer a small people living and dying for a *great* idea; we 're a *big* people living and dying for money" (*Owen Wister*). See BROAD, ENORMOUS, MONSTROUS, CAPACIOUS.

Mother**, the great nature goddess of ancient Anatolia, whose chief name is *Cybele*. She is also known as the **Earth Mother**, the **Mountain Mother**, the **Idæan Mother**; at her reputedly original shrine at Pessinus she was known as **Agdistis**, or **Angdistis**, from the rock Agdus on Mount Dindymus, and as **Dindymene**, from the mountain itself. Here she was worshiped under the form of a stone said to have fallen from heaven (one of the *bætuli*, perhaps meteorites, characteristically her emblems), and this stone was taken to Rome when her worship was inaugurated there. Traces of an analogous worship, esp. in Crete and Thrace, have led to the opinion that the *Great Mother* was a chief deity of Mycenæan times. The Cretan goddesses Rhea, Britomartis, Dictynna, Semele, possibly also Ariadne and Europa, and the Thracian Bendis, Cotys, and Hecate, are all probably related forms of the goddess, and are all largely amalgamated with the similar Hellenic goddesses, Artemis and Demeter. Semitic influence on the nature of the Great Mother came from the group including Astarte, Atargatis, Derceto (cf. APHRODITE, ISHTAR), in connection with whose worship Adonis or Tammuz takes the place held by Attis in the Phrygian cult and (though the parallel is less obvious) by Kore, or Persephone, or by Dionysus, in the Hellenic. Diana of Ephesus was a form of the Anatolian goddess influenced first by Semitic and later by Hellenic conceptions. See esp. CYBELE, MAGNA MATER, RHEA; cf. ADONIS, ARTEMIS, ATTIS, CORYBANT, DIONYSUS, DEMETER. — g. **mullein**, the common mullein. — g. **nettle**, a European and Asiatic nettle (*Urtica dioica*), naturalized in the United States. Skr. *grdh* to be greedy.] **1.** Having a keen appetite for food or drink; ravenous; voracious; very hungry; — followed by *of*; as, a lion that is *greedy* of his prey.

2. Having, or characterized by, eager or keen desire; specif., eager for wealth; avaricious; as, *greedy* of gain.

3. Sought or pursued greedily. *Obs. & R.*

Syn. — Insatiate, gluttonous, avid, edacious, devouring; grasping, avaricious. — GREEDY, VORACIOUS, RAVENOUS, RAPACIOUS. GREEDY implies keen and excessive appetite or craving for food or (fig.) gain; VORACIOUS suggests rather excess or gluttony in the act of eating or (fig.) acquiring; as, "His little eyes . . . were like a pig's, sly and *greedy* at once, and bloodshot" (*M. Hewlett*); "I think I make no habit of feeding on praise, and despise those whom I see *greedy* of it, as much as I should an underbred fellow, who, after eating a cherry tart, proceeded to lick the plate" (*Scott*); "*voracious* birds, that hotly bill and breed, and largely drink, because on salt they feed" (*Dryden*); "Many crude lumps of Speed, Rapin, Mezeray . . . etc., I devoured like so many novels; and I swallowed with the same *voracious* appetite the descriptions of India and China, of Mexico and Peru" (*Gibbon*). RAVENOUS suggests violent or grasping voracity (often due to excessive hunger), as of a bird or beast of prey; as, "Being often very hungry when he sat down to his meals, he [Dr. Johnson] contracted a habit of eating with *ravenous* greediness. . . . The sight of food affected him as it affects wild beasts and birds of prey" (*Macaulay*); "Allegra is prettier, I think, but as obstinate as a mule and as *ravenous* as a vulture" (*Byron*). RAPACIOUS suggests a violent tendency to seize or appropriate to one's self, but has less specific reference to the seizure of food; "the Indians, who, though often *rapacious*, are devoid of avarice" (*Parkman*); "A fond mother . . . in pursuit of praise for her children [is] the most *rapacious* of human beings" (*Jane Austen*). See COVETOUS, CUPIDITY.

gree'gree', gri'gri' (grē'grē'), *n.* [Prob. fr. a native name: cf. F. *gris-gris.*] An African talisman, charm, or fetish. See FETISH. — **greegree,** *or* **grigri, man,** an African magician or fetish priest.

Greek (grēk), *n.* [AS. *Grēcas*, *Crēcas*, pl., L. *Graecus*, sing., Gr. Γραικός.] **1.** A native or citizen of Greece; one of the Greek people; often, specif., a person of one of the races of ancient Greece. The earliest-known civilizations of Greece, the Minoan and the Mycenæan (see these terms), were characteristic of a primitive population, the *Pelasgians*, belonging to the Mediterranean race. In times antedating historical record they came (according to the probable theory) under the partial domination of the invading Achæans, who were ascendant in the era described in the Homeric poems. Later (according to Greek tradition, 1104–3 B. C.) came immigrations of conquering tribes from the north (the **Dorian migration**) who occupied chiefly the Peloponnesus, and Crete, Rhodes, Melos, and other islands, and whose inroads were followed by the **Æolian** and **Ionian migrations**, originating from the mainland of Greece and extending to the islands and the shores of Asia Minor. The **Hellenic period** of Greek history, characterized by the growth of a sense of solidarity among the Greek states, is generally dated from the first Olympiad, 776–5 B. C., and lasts until the era of conquest of Alexander (d. 320 B. C.), which mark the beginning of the **Hellenistic period**, characterized by the spread of Greek civilization and the lapse of the political independence of the Greeks.

2. A person using the Greek language as his native tongue, or one belonging to the Greek Church.

> There can be no doubt that in Asia Minor, at least, the word *Greek* is devoid of any racial significance. It merely denotes a man who speaks Greek, or else one who is a Greek Catholic, converted from Mohammedanism. *W. Z. Ripley.*

3. One whose character, feelings, and sympathies are Greek; one strongly affected by Greek culture and thought.

> I, the joy of life unquestioned — I, the *Greek* —
> I, the everlasting Wonder Song of Youth! *Kipling.*

4. [*l. c.*] A swindler or sharper; esp., a card cheat; also, a roisterer; a boon companion.

5. [From GREEK, *a.*] The language of the Greeks, primarily of the classical Greeks; broadly, the whole family of Hellenic idioms (see INDO-EUROPEAN). The Hellenic family is a compact body of dialects comparatively isolated among the Indo-European languages (most nearly related to the Italic tongues), characterized by retention of many inflectional forms, complexity and expressiveness of the verbal conjugations, and marvelous facility for word formation. The use of pitch accent and variety of vowel sounds gave the language euphony without loss of consonantal vigor. Of the numerous local dialects of the classical period, four stand preëminent: **a** The **Ionic**, spoken on the Asiatic coast and many of the islands of the Ægean. This is characterized by care for melody and the freedom and richness of the vowel system. It is divided into **Old Ionic**, or **epic**, the language of Homer, possibly always a somewhat artificial tongue; and **New Ionic**, the language of Herodotus, Hippocrates, and others, spoken in the Ionian cities of Asia and the isles. **b Attic**, originally the dialect of Attica, a branch of Ionic, taken as the standard form of classical Greek. From the other forms of Ionic it differs chiefly in its contraction of vowels, giving it greater vigor without loss of grace. It is the language of Æschylus, Sophocles, Euripides, Plato, Demosthenes, Xenophon, Thucydides; and from it sprang the later *Hellenic* (or *Hellenistic*) tongue which spread throughout the ancient world, and in which were composed the works of Aristotle, Polybius, Plutarch, the New Testament, etc. **c Æolic**, comprising the dialects spoken chiefly in Æolis, Thessaly, and Bœotia, **Arcadian, Elean,** and **Cyprian** being sometimes included. An avoidance of oxytones and rough breathings and instability of vowel sounds distinguish Æolic, in which were written the poems of Alcæus and Sappho and three of the idyls of Theocritus. **d Doric**, used by Pindar and Theocritus, and spoken in the Peloponnesus, northern Greece, and Crete, as also in colonies in Asia Minor, Sicily, and Italy. Slowness, deliberation, and emphasis, rather than polish, are its salient traits. **Modern Greek** has lost, besides pitch accent and vowel variety, a number of the inflectional forms of the ancient language, but is still not far removed from it. It is divided into **Romaic**, the common speech, and **Neo-Hellenic**, which seeks to preserve ancient forms and idioms. The Greek alphabet, received by the Greeks from the Phœnicians at an early unknown date (previous to 650 B. C.), is the parent of all modern European alphabets. At first consisting of twenty-two symbols, it was variously modified, the Ionic form with twenty-four letters finally prevailing. Capital letters only were used at first.

6. [From GREEK, *a.*] Something unintelligible; esp., unintelligible speech; gibberish.

> But, for mine own part, it was *Greek* to me. *Shak.*

7. *pl.* Greek types or characters.

when Greek meets Greek, an expression derived from, "When Greeks joined Greeks, then was the tug of war," in the drama of "Alexander the Great," by Nathaniel Lee (1655–92), which refers to the resistance offered to Philip and Alexander of Macedon by the Greek states.

Grimm's law (grĭmz). *Philol.* A statement of the regular changes (*Lautverschiebungen,* or sound shiftings) which the stops, or mute consonants, of the primitive Indo-European consonant system (best seen in Sanskrit and, with some variations, in Greek and Latin) have undergone in the Teutonic languages; — so called from Jakob Grimm, who made the first full statement (1822) of the observed changes. Grimm's statement was that original aspiratæ (aspirates, as *bh, dh, gh*) became mediæ (voiced stops, *b, d, g*) in the Low German languages (Gothic, Low German, English, etc.), and tenues (voiceless stops, *p, t, k*) in High German (including mod. literary German); original mediæ became tenues in Low German, and "aspiratæ" (at that time not clearly distinguished from affricates and spirants) in High German; and original tenues became "aspiratæ" in Low German, and mediæ in High German. Examples are: Skr. *bhrātr,* E. *brother,* G. *bruder,* Alemannic *pruader* (the Alemannic dialect having carried out the High German changes most completely); Skr. *go,* E. *cow,* G. *kuh*; L. *tres,* E *three,* G. *drei.* The original form of Grimm's law is no longer accepted as entirely correct. It has been supplemented by later investigators, who have formulated various observed exceptions; as, esp., *Verner's* and *Grassmann's* laws (which see). The following table, necessarily incomplete, gives roughly the shiftings covered by Grimm's law, the correspondences given being of letters rather than sounds:

	ASPIRATÆ.	MEDIÆ.	TENUES.
I.E.	gh dh bh	g d b	k t p
L.G.	g d b	k t p	h th f
H G.	k(g) t p(b)	ch(k) z(sz,ss) pf,f	h d t

Griz'zel, *n.* = GRISELDA.

grizzly bear, a very large and powerful bear (*Ursus horribilis*) of the hills and mountains of western North America, from Alaska to southern California and Arizona. Several subspecies are distinguished in different parts of its range. It is a close ally of the brown bear (*U. arctos*) of Europe, but much larger and heavier, and its strength and ugly temper make it very dangerous when brought to bay. It now seldom ventures to attack human beings except in defense of itself or young. In color it is usually brownish yellow, but there is great individual variation. Those whose hairs are tipped with white or gray are called *silvertips*.
